

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Entra ID | PAM | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience securing enterprise environments across higher education and Software as a Service (SaaS) technology sectors. I specialise in managing and optimising CrowdStrike Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, alongside web and email security gateways, Mobile Device Management (MDM) and Mobile Application Management (MAM), Multi-Factor Authentication (MFA), Single Sign-On (SSO), Privileged Access Management (PAM), and firewall administration. I have deep expertise in alert triage, threat hunting, incident response, vulnerability scanning and remediation, penetration test finding remediation, and delivering security awareness training programmes. I am now seeking a hybrid Senior Cyber Security Engineer role where I can bring this breadth of technical skill to help protect a financial services organisation's critical infrastructure and data assets.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE)
- **SIEM / SOAR:** Microsoft Sentinel, CrowdStrike Falcon Next-Generation Security Information and Event Management (NG-SIEM), Kusto Query Language (KQL), automated playbooks, alert triage
- **Email and Web Security:** Mimecast email security gateway, anti-phishing policy configuration, sandboxing, Data Loss Prevention (DLP), web proxy management
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory / Azure AD), Conditional Access, MFA enforcement, Single Sign-On (SSO), Group Policy
- **Privileged Access Management (PAM):** BeyondTrust PAM, least-privilege governance, session recording, credential vaulting
- **MDM / MAM:** Microsoft Intune, endpoint compliance policies, Windows, iOS and Android device management
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS), risk prioritisation and remediation tracking
- **Firewall and Perimeter Security:** Check Point Harmony firewall, Web Application Firewall (WAF) / Distributed Denial of Service (DDoS) mitigation, Intrusion Detection and Prevention System (IDS/IPS), firewall rule review
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat hunting, penetration test finding remediation
- **Automation and Scripting:** PowerShell, SOAR playbook engineering
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) | Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead the deployment, configuration, and ongoing management of CrowdStrike Endpoint Detection and Response (EDR) across an 8,000-user environment, utilising Falcon Prevent, Insight, Discover, and Next-Generation Security Information and Event Management (NG-SIEM) for continuous threat visibility and automated containment
- Administer the Microsoft Sentinel Security Information and Event Management (SIEM) platform, authoring Kusto Query Language (KQL) detection analytics, correlation rules, and SOAR playbooks to automate alert triage and streamline incident escalation

- Manage web and email security gateways, including Mimecast anti-phishing, anti-spoofing, and sandboxing policies, reducing phishing exposure across the organisation
- Oversee Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) compliance policies across Windows, iOS, and Android endpoints, ensuring security baselines are enforced estate-wide
- Administer Microsoft Entra ID (formerly Azure Active Directory / Azure AD) including Conditional Access policies, Multi-Factor Authentication (MFA) enforcement, Single Sign-On (SSO) configuration, and Group Policy management
- Operate BeyondTrust Privileged Access Management (PAM) to govern administrative credentials, enforce least-privilege access principles, and provide session recording for audit and compliance purposes
- Manage Intrusion Detection and Prevention System (IDS/IPS) rules, tuning signatures to reduce false positives while maintaining detection fidelity for high-severity events
- Lead vulnerability scanning programmes using Tenable.io, Nessus, AppCheck, and Pentra Breach and Attack Simulation (BAS), prioritising and tracking remediation of critical and high-risk findings
- Remediate penetration test findings in collaboration with infrastructure and development teams, ensuring timely closure and risk acceptance where appropriate
- Lead incident response activities in accordance with NIST 800-61 procedures, mapping adversary Tactics, Techniques, and Procedures (TTPs) to the MITRE ATT&CK framework and conducting post-incident reviews
- Manage firewall policy reviews and rule changes on Check Point Harmony, supporting Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection configuration
- Design and deliver security awareness training programmes and phishing simulation campaigns, reducing end-user risk across the institution through targeted education and measured improvements in click-through rates
- Contribute to ad-hoc security projects and provide technical advisory support to senior stakeholders and the wider IT team on emerging threats and security improvements

University of the Arts London (UAL) | Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored, triaged, and investigated SIEM/SOAR/EDR alerts from Microsoft Sentinel and CrowdStrike Falcon, handling phishing reports, malware detections, lateral movement indicators, and suspicious authentication activity
- Supported the deployment and management of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the Microsoft 365 environment, establishing baseline detection coverage and alert policies
- Performed vulnerability scans using Tenable.io and Nessus, producing remediation reports and tracking findings through to closure with infrastructure owners
- Managed Mimecast email security configurations, refining anti-phishing, impersonation protection, and URL-click policies to reduce user exposure to social engineering attacks
- Administered Entra ID (Azure AD) user provisioning, group policy management, Conditional Access rule creation, and MFA rollout for new user cohorts
- Managed and tuned Intrusion Detection and Prevention System (IDS/IPS) alerts, maintaining detection coverage for network-based threats while minimising noise
- Contributed to PAM administration tasks and supported privileged account lifecycle management processes
- Delivered security awareness communications and supported incident response activities including containment, evidence collection, and stakeholder reporting

HICX Solutions Ltd (SaaS/FinTech) | IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed endpoint security controls and patch management across a cloud-first Software as a Service (SaaS) FinTech environment, including antivirus deployment, compliance monitoring, and device hardening
- Administered identity and access management, supporting MFA and SSO implementations to secure employee access to cloud-hosted business applications

- Conducted vulnerability assessments across cloud and on-premises infrastructure, producing risk-rated findings and supporting remediation prioritisation
- Maintained security documentation and supported ISO 27001 compliance activities, contributing to internal audits and policy reviews
- Supported IT infrastructure quality assurance processes, coordinating security improvements across network, endpoint, and application layers

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon Endpoint Detection and Response (EDR) across a large university estate, achieving full endpoint visibility and measurably reducing threat dwell time through automated containment policies
- Engineered Microsoft Sentinel Security Information and Event Management (SIEM) detection rules and Security Orchestration, Automation and Response (SOAR) playbooks, automating tier-1 alert triage and significantly reducing mean time to respond to high-severity incidents
- Delivered Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users at University of the Arts London, achieving comprehensive coverage and improved incident detection fidelity
- Led a vulnerability remediation programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), systematically closing critical exposures and reducing the organisation's exploitable attack surface
- Implemented BeyondTrust Privileged Access Management (PAM) for administrative credential governance, achieving least-privilege compliance and providing full session audit trails for the infrastructure estate

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
