

PROSPER AWUNI

Senior Security Engineer | Incident Response | SIEM/SOAR Detection Engineering | CrowdStrike EDR/XDR | Threat Hunting

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Security Engineer with over five years of hands-on experience in incident response, Security Information and Event Management (SIEM) detection engineering, Security Orchestration, Automation and Response (SOAR) development and Endpoint Detection and Response (EDR/XDR) operations. I have expert-level proficiency with CrowdStrike Falcon across EDR, Extended Detection and Response (XDR), endpoint prevention and Next-Generation SIEM (NG-SIEM), and I am highly experienced strengthening EDR and XDR configurations, defining automated detections within SIEM platforms, and building SOAR playbooks to improve automatic security alert triage and incident response workflows. I lead threat hunting activities using MITRE ATT&CK intelligence, conduct root-cause investigations across complex multi-platform environments and produce actionable post-incident reports. I have strong experience with Microsoft Sentinel and KQL detection engineering, Mobile Device Management (MDM), Privileged Access Management (PAM) and PowerShell automation. I hold the Certified Information Systems Security Professional (CISSP) certification and am well suited to a fully remote senior engineering role in a dynamic, fast-paced technology-driven organisation.

CORE SKILLS AND TECHNICAL STACK

- **Incident Response:** NIST 800-61 framework; MITRE ATT&CK-aligned investigations; containment, eradication and recovery; post-incident reporting; Tier 3 escalation handling
- **EDR/XDR:** CrowdStrike Falcon (Endpoint Detection and Response, Extended Detection and Response, Prevent, Insight, Discover, NG-SIEM) - Expert; strengthening EDR/XDR configurations and detection rules; Microsoft Defender for Endpoint (MDE)
- **SIEM and SOAR:** Microsoft Sentinel (Kusto Query Language (KQL), detection engineering, automated SOAR playbooks); CrowdStrike Falcon NG-SIEM; defining automatic SIEM detections; Security Orchestration, Automation and Response (SOAR) playbook development
- **Threat Detection and Hunting:** MITRE ATT&CK; CrowdStrike Falcon Insight; threat hunting; Indicators of Compromise (IoCs); Tactics, Techniques and Procedures (TTPs); Breach Attack Simulation (BAS)
- **Vulnerability Management:** Tenable.io; AppCheck; Nessus; Pentra BAS
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (AD); Conditional Access; Multi-Factor Authentication (MFA); Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust
- **Mobile Device Management (MDM):** Microsoft Intune (MDM / Mobile Application Management (MAM))
- **Email Security:** Mimecast
- **Firewall:** Check Point Harmony (Next-Generation Firewall (NGFW))
- **Scripting and Automation:** PowerShell; KQL; SOAR playbook automation
- **Security Frameworks:** NIST CSF; CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

Senior Cyber Security Analyst (Engineer)

March 2022 - Present

- Strengthen EDR and XDR configurations in CrowdStrike Falcon, deploying and refining detection rules, prevention policies and behavioural indicators to improve coverage against advanced threats across an 8,000-user estate
- Define and deploy automated detections of security events in Microsoft Sentinel SIEM, authoring KQL queries mapped to MITRE ATT&CK Tactics, Techniques and Procedures (TTPs) to detect threats at each stage of the attack lifecycle

- Develop and maintain SOAR playbooks to improve automatic security alert triage and incident response workflows, reducing Mean Time to Respond (MTTR) for high-volume alert types
- Lead critical incident response investigations following NIST 800-61, performing containment, eradication and recovery, and producing post-incident reports with root-cause findings and remediation actions
- Conduct proactive threat hunting campaigns using CrowdStrike Falcon Insight and NG-SIEM, identifying latent threats, Indicators of Compromise (IoCs) and novel attack patterns not caught by automated detections
- Administer Mobile Device Management (MDM) and Mobile Application Management (MAM) policies via Microsoft Intune, enforcing endpoint compliance and application protection across 8,000+ devices
- Manage BeyondTrust Privileged Access Management (PAM), enforcing least-privilege principles and securing administrative access to critical infrastructure
- Lead vulnerability scanning and remediation using Tenable.io, AppCheck and Pentera BAS, validating SIEM and EDR detection coverage through continuous attack simulation
- Manage Mimecast email security and Check Point Harmony firewall, maintaining perimeter defences and data loss prevention controls
- Enforce Multi-Factor Authentication (MFA) and identity controls across the estate via Entra ID Conditional Access

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed Tier 2 and Tier 3 incident response, triaging and investigating security alerts from Microsoft Sentinel SIEM and CrowdStrike Falcon NG-SIEM, containing confirmed incidents and escalating as required
- Built and refined SIEM detection rules and SOAR automation playbooks to reduce manual triage burden and improve detection accuracy for known adversary TTPs
- Conducted threat hunting exercises in CrowdStrike Falcon Insight and Discover, proactively surfacing threats that evaded automated detection rules
- Managed Entra ID and Azure Active Directory (AD) Conditional Access, RBAC and privileged account reviews, enforcing least-privilege access controls
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users as a major security improvement initiative
- Administered Check Point Harmony NGFW and Intrusion Detection System (IDS) / Intrusion Prevention System (IPS) rules, monitoring and blocking malicious network activity
- Conducted vulnerability assessments using Nessus and AppCheck, tracking remediation and reporting metrics to senior management
- Maintained Intune MDM and MAM configurations and managed Mimecast email security policies

HCX Solutions Ltd (Software as a Service (SaaS) / FinTech)

February 2021 - March 2022

- Implemented and maintained endpoint security controls, EDR tooling and firewall configurations across a cloud-first SaaS FinTech environment
- Monitored SIEM alerts and responded to security events, conducting investigations and escalating incidents as required
- Managed identity controls including MFA rollout, SSO configuration and user lifecycle management
- Applied NIST CSF and CIS Controls to harden infrastructure and meet compliance obligations

KEY ACHIEVEMENTS

- Strengthened CrowdStrike Falcon EDR/XDR configurations across an 8,000+ user estate, deploying targeted detection rules and prevention policies that reduced endpoint threat dwell time
- Authored 60+ SIEM detection rules in Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, mapped to MITRE ATT&CK, improving high-fidelity detection coverage across the attack lifecycle
- Developed SOAR playbooks in Microsoft Sentinel automating incident triage, containment notification and remediation actions, cutting manual analyst effort for recurring alert types by over 50%
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users, consolidating EDR and identity threat detection under a unified platform

- Led Breach Attack Simulation (BAS) programme using Pentera, continuously validating SIEM detection coverage and identifying gaps in EDR/XDR configurations for proactive remediation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
