

PROSPER AWUNI

Senior Cyber Security Engineer | Cloud and Infrastructure Security | Azure | Prevent and Protect | Security Controls Implementation

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience strengthening security across hybrid infrastructure and cloud environments. I specialise in the prevent and protect pillar of cyber security, implementing and improving security controls across on-premises, cloud and remote user environments rather than operating purely in a traditional Security Operations Centre (SOC) context. I have strong hands-on experience embedding security into Microsoft Azure platforms, securing cloud workloads through Microsoft Defender for Cloud and Microsoft Entra ID, and delivering Conditional Access, Multi-Factor Authentication (MFA) and identity protection at scale for 8,000+ users. I work closely with infrastructure and project teams to ensure security is designed into platforms and services from the outset. I have expert-level experience with CrowdStrike Falcon for Endpoint Detection and Response (EDR) and prevention, and strong proficiency in Microsoft Sentinel Security Information and Event Management (SIEM), vulnerability management and Privileged Access Management (PAM). I hold the Certified Information Systems Security Professional (CISSP) certification and am seeking a fully remote senior engineering role where I can drive meaningful improvements to an organisation's overall security posture.

CORE SKILLS AND TECHNICAL STACK

- **Cloud Security:** Microsoft Azure; Microsoft Entra ID (formerly Azure Active Directory (AD)); Defender for Cloud; cloud workload protection; cloud-native security controls; Conditional Access
- **Security Controls Implementation:** CIS Controls; NIST Cybersecurity Framework (CSF); ISO 27001; Cyber Essentials Plus; security posture improvement and measurement
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, NG-SIEM) - Expert; Microsoft Defender for Endpoint (MDE); Tanium
- **Identity and Access Management (IAM):** Entra ID; Conditional Access; Role-Based Access Control (RBAC); MFA; Single Sign-On (SSO); Zero Trust identity principles
- **SIEM and SOAR:** Microsoft Sentinel (Kusto Query Language (KQL), detection engineering, automated playbooks); CrowdStrike Falcon NG-SIEM; Security Orchestration, Automation and Response (SOAR)
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io; AppCheck; Nessus; Pentera Breach Attack Simulation (BAS)
- **Endpoint and Device Management:** Microsoft Intune (Mobile Device Management (MDM) / Mobile Application Management (MAM))
- **Email Security:** Mimecast
- **Firewall:** Check Point Harmony (Next-Generation Firewall (NGFW), Web Application Firewall (WAF))
- **Incident Response:** NIST 800-61 framework; MITRE ATT&CK
- **Scripting and Automation:** PowerShell; SOAR playbook development; KQL

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

Senior Cyber Security Analyst / Engineer

March 2022 - Present

March 2025 - Present

- Work closely with the Cyber Security leadership team and infrastructure teams to embed security into platforms, projects and cloud services across a hybrid infrastructure and Azure environment
- Implement and improve security controls across cloud and on-premises infrastructure, focusing on the prevent and protect pillar of the cyber function rather than day-to-day SOC operations
- Administer Microsoft Entra ID and Conditional Access to enforce Zero Trust identity principles and protect cloud-hosted services, managing MFA and SSO for 8,000+ users

- Manage Microsoft Defender for Cloud and Microsoft Defender for Endpoint (MDE) to protect cloud workloads and hybrid infrastructure, improving the organisation's overall security posture
- Administer and optimise CrowdStrike Falcon (EDR, Prevent, Insight, Discover, NG-SIEM) across an 8,000-user estate, strengthening endpoint prevention and detection coverage
- Lead vulnerability scanning and remediation programmes using Tenable.io, AppCheck and Pentera BAS, measuring and improving security posture through continuous assessment
- Manage BeyondTrust PAM, enforcing least-privilege access controls across critical infrastructure and cloud systems
- Operate Microsoft Sentinel SIEM and SOAR, automating security workflows and producing management dashboards to demonstrate security posture improvement over time
- Manage MDM and MAM policies via Microsoft Intune across corporate and BYOD endpoints, ensuring device compliance with security baselines
- Collaborate with project teams to review designs, conduct security assessments and ensure security is embedded throughout the project lifecycle
- Support Cyber Essentials Plus and ISO 27001 compliance, implementing controls and evidencing improvements

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Administered Entra ID and Azure Active Directory (AD) Conditional Access, Role-Based Access Control (RBAC) and privileged account controls, enforcing Principle of Least Privilege across the estate
- Deployed and configured Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users as part of a hybrid infrastructure security improvement programme
- Managed CrowdStrike Falcon endpoint protection policies, investigating alerts and refining prevention configurations to reduce the attack surface
- Conducted vulnerability assessments using Nessus and AppCheck, tracking remediation metrics and reporting security posture improvements to management
- Performed SIEM alert triage and investigation in Microsoft Sentinel and CrowdStrike Falcon NG-SIEM, escalating confirmed incidents following NIST 800-61 procedures
- Maintained Check Point Harmony firewall rules, IDS and IPS policies, and Mimecast email security controls across the hybrid estate
- Supported ISO 27001 and Cyber Essentials Plus audit activities, preparing evidence and implementing remediation actions

HCX Solutions Ltd (Software as a Service (SaaS) / FinTech)

February 2021 - March 2022

Engineer: Security, Quality and Infrastructure

- Implemented security controls across a cloud-first SaaS infrastructure, applying NIST CSF and CIS Controls to harden systems and reduce attack surface
- Configured and managed endpoint security, firewall rules and identity controls, enforcing information security policies organisation-wide
- Supported security improvement projects across infrastructure, quality and IT operations functions, embedding security into operational processes

KEY ACHIEVEMENTS

- Led Azure cloud security embedding project, implementing Entra ID Conditional Access and Microsoft Defender for Cloud to protect cloud-hosted services and enforce Zero Trust principles
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users, strengthening cloud and hybrid infrastructure security posture
- Deployed CrowdStrike Falcon (EDR, Prevent, Insight, NG-SIEM) across an 8,000+ user estate, improving endpoint prevention and detection across a hybrid environment
- Led Cyber Essentials Plus certification programme end-to-end, achieving certification through rigorous implementation and verification of security controls
- Automated security operations workflows using PowerShell and Microsoft Sentinel SOAR playbooks, reducing manual remediation effort and improving consistency of security responses

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
