

PROSPER AWUNI

Senior Detection Engineer | CrowdStrike Falcon | Next-Generation SIEM | Threat Detection and Research

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security professional with over five years of hands-on experience in detection engineering, threat hunting, and Security Information and Event Management (SIEM) operations, with expert-level proficiency in CrowdStrike Falcon across its full platform suite including Next-Generation Security Information and Event Management (NG-SIEM), Endpoint Detection and Response (EDR), Prevent, Insight, and Discover. I have extensive experience creating and tuning high-fidelity detection rules, analysing large and complex datasets from a variety of security telemetry sources, and collaborating across teams to advance detection processes, improve coverage, and minimise false positives. I am proficient in Kusto Query Language (KQL), Security Orchestration, Automation and Response (SOAR) automation, and threat research aligned to the MITRE ATT&CK framework. I have mentored junior analysts and contributed to the uplift of team detection and response capabilities within enterprise security operations. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a rigorous, data-driven approach to building detection infrastructure that enables managed security services teams to operate at scale and velocity.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon Platform (Expert):** NG-SIEM, Endpoint Detection and Response (EDR), Prevent, Insight (threat hunting), Discover; policy management, detection tuning, telemetry analysis
- **SIEM Detection Engineering:** High-fidelity detection rule creation and tuning; CrowdStrike LogScale, Microsoft Sentinel, Splunk/SPL; reducing false positive rates and improving detection fidelity across diverse telemetry sources
- **Large Dataset Analysis:** Analysing large datasets across multiple vendor telemetry sources; log correlation, anomaly detection, behavioural analysis
- **Threat Research and Threat Hunting:** MITRE ATT&CK-aligned threat hunting; adversary behaviour analysis, indicator of compromise (IOC) development, hypothesis-driven hunting campaigns
- **Query Languages and Automation:** Kusto Query Language (KQL), Splunk Processing Language (SPL), Security Orchestration, Automation and Response (SOAR) playbook development, PowerShell scripting
- **Managed Detection and Response (MDR) / Managed Security Services:** Supporting next-generation MDR operations; detection-as-code, collaborative detection improvement processes, playbook standardisation
- **Extended Detection and Response (XDR):** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender; cross-platform telemetry correlation
- **Incident Response:** NIST 800-61 incident response lifecycle; containment, eradication, recovery, and lessons-learned documentation
- **Frameworks and Standards:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001
- **Mentoring and Knowledge Sharing:** Junior analyst mentoring, detection process documentation, team capability development

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead detection engineering across the enterprise SIEM and Endpoint Detection and Response (EDR) estate, creating and tuning high-fidelity detection rules in CrowdStrike Falcon NG-SIEM and Microsoft Sentinel to reduce false positive rates and improve coverage of adversary techniques aligned to MITRE ATT&CK.

- Analyse large volumes of security telemetry from CrowdStrike Falcon, Microsoft Defender, and network security tooling, correlating multi-source data to identify sophisticated attack patterns and previously undetected threat activity.
- Conduct proactive threat hunting campaigns using CrowdStrike Falcon Insight and KQL in Microsoft Sentinel, developing and testing hypotheses based on current threat intelligence and MITRE ATT&CK-mapped adversary behaviours.
- Develop and maintain Security Orchestration, Automation and Response (SOAR) playbooks using PowerShell and platform-native automation, improving response speed and reducing analyst toil on repetitive, high-volume alerts.
- Collaborate with infrastructure, identity, and application teams to improve detection coverage, onboard new data sources, and ensure telemetry is correctly ingested and parsed for detection use cases.
- Mentor junior security analysts on detection engineering techniques, threat hunting methodology, and CrowdStrike Falcon platform capabilities, raising team-wide capability and knowledge.
- Perform threat research to identify emerging adversary techniques, translating findings into actionable detection improvements and new detection rules across the SIEM and EDR estate.
- Lead incident response activities from initial detection through to containment, eradication, and post-incident review, maintaining detailed documentation and driving lessons-learned improvements to detection coverage.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Administered and developed detection capabilities within CrowdStrike Falcon EDR and Microsoft Sentinel SIEM, creating correlation rules and tuning alert thresholds to improve signal-to-noise ratio across the security operations function.
- Performed analysis of large datasets from SIEM, EDR, email security, and identity platforms, identifying patterns of suspicious behaviour and correlating events across multiple telemetry sources.
- Conducted threat hunting using CrowdStrike Falcon Insight, identifying indicators of compromise and previously undetected threats within the enterprise environment.
- Developed SOAR runbooks and PowerShell automation scripts to streamline alert triage, enrichment, and response workflows, reducing mean time to respond across the security operations team.
- Contributed to threat intelligence research, translating open-source intelligence (OSINT) and vendor threat reports into actionable detection use cases and IOC enrichment for SIEM and EDR platforms.
- Supported junior analysts through detection methodology training, sharing expertise in CrowdStrike Falcon, KQL query development, and MITRE ATT&CK-based analysis techniques.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed endpoint security monitoring and detection within a SaaS/FinTech environment, triaging alerts from EDR and SIEM tooling and escalating confirmed threats with detailed incident documentation.
- Analysed security telemetry from endpoint, network, and identity sources to detect anomalous behaviour and investigate potential security incidents.
- Developed and maintained security documentation, detection checklists, and response procedures, improving the consistency and efficiency of the security operations function.
- Supported implementation of security tooling, configuring endpoint detection policies and ensuring adequate telemetry collection for detection and investigation use cases.

KEY ACHIEVEMENTS

- Built and delivered a comprehensive CrowdStrike Falcon NG-SIEM detection rule library, creating high-fidelity detections based on MITRE ATT&CK-mapped adversary techniques and measurably improving coverage of previously undetected threats.
- Developed a structured threat hunting programme using CrowdStrike Falcon Insight, running regular hypothesis-driven campaigns that identified adversary activity missed by automated alerting and reduced mean dwell time.
- Led the enterprise-wide deployment of Microsoft Defender for Endpoint and Identity across 8,000 users, onboarding device telemetry into the SIEM estate and significantly expanding detection data sources and

coverage.

- Designed and implemented SOAR automation workflows using PowerShell and CrowdStrike Falcon Response Policies, automating alert enrichment, IOC blocking, and analyst notification processes and reducing manual analyst workload.
- Mentored and upskilled junior security analysts in CrowdStrike Falcon platform capabilities, KQL query writing, and MITRE ATT&CK-based threat hunting, improving overall team detection and investigation capability.
- Performed threat intelligence research translating vendor and open-source threat reports into actionable SIEM detection use cases, improving detection coverage against current and emerging threats.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
