

PROSPER AWUNI

Senior Cyber Security Analyst | SIEM | EDR/XDR | Azure Cloud Security | Stakeholder Engagement

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with over five years of experience delivering efficient, effective, and proactive day-to-day cyber security operations within complex, multi-stakeholder enterprise environments. I have a strong track record of minimising the risk of security incidents through alert monitoring, incident response, threat intelligence, and vulnerability management, and I bring demonstrable experience providing cyber security expertise and requirements to change programmes to ensure that security good practice is fully embedded in change initiatives. I have significant experience managing Microsoft Azure cloud security technologies and concepts, including Microsoft Entra ID, Conditional Access, and Microsoft Defender for Endpoint (MDE), and I am well versed in Security Information and Event Management (SIEM) platforms, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) solutions, firewalls, and Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) technologies. I have a proven ability to engage confidently with senior and non-technical stakeholders, translating complex security risk into clear, actionable guidance. I hold the Certified Information Systems Security Professional (CISSP) certification and bring an organised, risk-focused mindset to protecting enterprise environments at scale.

CORE SKILLS AND TECHNICAL STACK

- **Day-to-Day Cyber Security Operations:** Alert monitoring and triage, incident management, cyber security operations centre (SOC) processes, proactive threat intelligence analysis
- **Security Information and Event Management (SIEM):** Microsoft Sentinel (with Kusto Query Language (KQL)), CrowdStrike NG-SIEM, Splunk; detection rule development, correlation and investigation
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Microsoft Azure Cloud Security:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA), role-based access control (RBAC), Microsoft Purview, Azure Security Centre
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; risk prioritisation, remediation coordination, penetration testing lifecycle
- **Firewalls / Network Security:** Check Point Harmony, Intrusion Detection System (IDS), Intrusion Prevention System (IPS), network traffic analysis
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, incident documentation, root cause analysis, lessons learned
- **Security for Change Programmes:** Security requirements in change initiatives, security by design, risk assessments, technical architecture review
- **Stakeholder Management:** Translating technical risk to business language, board-level reporting, cross-functional collaboration
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell, Security Orchestration, Automation and Response (SOAR) playbook development

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Deliver efficient and proactive day-to-day cyber security operations, monitoring and triaging alerts from SIEM and EDR/XDR platforms and managing the full incident response lifecycle across a complex multi-site enterprise environment.

- Provide cyber security expertise and requirements to the organisation's change programme, conducting security reviews of new systems, cloud migrations, and infrastructure changes to ensure security good practice is embedded from the outset.
- Manage Microsoft Azure cloud security technologies including Microsoft Entra ID, Conditional Access, MFA, and Microsoft Defender for Endpoint for over 8,000 users, ensuring robust identity security and access governance.
- Administer and tune SIEM platforms (Microsoft Sentinel, CrowdStrike NG-SIEM), developing detection rules using KQL and building SOAR playbooks to automate repetitive analyst tasks and improve response consistency.
- Lead vulnerability management operations using Tenable.io and Pentera BAS, coordinating remediation with technical teams and providing risk-based reporting to senior leadership.
- Manage threat intelligence feeds and perform threat hunting using CrowdStrike Falcon Insight, identifying adversary behaviour aligned to MITRE ATT&CK and proactively improving detection coverage.
- Engage confidently with senior stakeholders, presenting security risk assessments, incident summaries, and vulnerability posture reports in clear, accessible language.
- Maintain and improve cyber security operational documentation, playbooks, and policies in line with ISO 27001, NIST CSF, and Cyber Essentials Plus requirements.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Delivered day-to-day cyber security operations including alert triage, incident investigation, threat intelligence analysis, and vulnerability management across a large enterprise environment.
- Provided security requirements and guidance to infrastructure and application change projects, ensuring security controls were designed in at the architecture stage rather than retrofitted.
- Managed Microsoft Entra ID and Azure AD, administering Conditional Access policies, MFA deployments, and identity governance controls to reduce identity-related risk.
- Conducted vulnerability assessments using Tenable.io, AppCheck, and Nessus, prioritising findings by business impact and coordinating remediation with infrastructure and application owners.
- Administered SIEM and EDR platforms, developing and refining detection rules, triaging alerts, and escalating incidents in line with established procedures.
- Maintained cyber security operational documentation, policies, and incident records in line with ISO 27001 and NIST CSF, supporting annual internal and external audits.
- Collaborated with cross-functional teams including IT, legal, and HR to manage security incidents and fulfil data breach reporting obligations.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered proactive cyber security operations within a SaaS/FinTech environment, monitoring alerts, managing vulnerability remediation, and responding to security incidents.
- Provided security input to infrastructure change projects, conducting risk assessments and ensuring compliance with CIS Controls and Cyber Essentials Plus standards.
- Managed identity and access controls including MFA, SSO, and role-based access, ensuring secure user lifecycle management across the organisation.
- Engaged with senior stakeholders and external partners on security matters, providing clear and concise risk communication to both technical and non-technical audiences.
- Maintained security documentation, policies, and procedures, supporting audit and compliance activities.

KEY ACHIEVEMENTS

- Led and supported numerous cyber security incident responses across high-severity events, performing containment, root cause analysis, and post-incident review with full documentation and lessons-learned reporting to senior leadership.
- Provided security expertise to multiple change programmes, successfully embedding security requirements into cloud migrations, system upgrades, and third-party integrations, reducing post-deployment risk exposure.

- Directed the enterprise-wide deployment of Microsoft Defender for Endpoint and Identity across 8,000 users, achieving full EDR/XDR coverage and significantly improving the organisation's detection and response capability.
- Delivered a mature vulnerability management programme using Tenable.io and Pentera BAS, enabling continuous risk visibility and prioritised remediation across hybrid cloud and on-premises infrastructure.
- Built and optimised SIEM detection rules and SOAR playbooks, reducing false positive rates and improving mean time to detect and respond across the security operations function.
- Successfully engaged senior non-technical stakeholders, translating complex cyber security risk into actionable business language and securing organisational buy-in for security investment and improvement initiatives.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
