

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | Security Information and Event Management | Hybrid
London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience delivering robust security across enterprise infrastructure spanning cloud, endpoint, and identity environments. I have deep expertise in CrowdStrike Falcon for Endpoint Detection and Response (EDR) and have led Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) operations at scale, including alert triage, threat detection, and incident response. I am highly experienced in implementing and hardening Microsoft Entra ID, Conditional Access, and Multi-Factor Authentication (MFA) and Single Sign-On (SSO) across large user populations, managing Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and overseeing Privileged Access Management (PAM) using BeyondTrust. I have led enterprise-wide vulnerability management programmes using Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, and Nessus, and I have a strong track record of remediating penetration test findings and driving continual improvement across security operations. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a collaborative, pragmatic approach to securing global infrastructure within lean, high-impact security teams.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (NG-SIEM, Prevent, Insight, Discover) - Expert level
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel, CrowdStrike NG-SIEM, Splunk; alert triage, detection rule tuning, SOAR playbook automation
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, MFA/SSO, Okta, Duo
- **Mobile Device and Application Management:** Microsoft Intune (MDM/MAM), Tanium
- **Privileged Access Management (PAM):** BeyondTrust
- **Email and Web Security Gateways:** Mimecast, Check Point Harmony
- **Vulnerability Management:** Tenable.io, Pentera BAS, AppCheck, Nessus; vulnerability scanning, remediation tracking, penetration test lifecycle management
- **Firewall and Network Security:** Check Point Harmony, perimeter security hardening, Intrusion Detection System (IDS) / Intrusion Prevention System (IPS)
- **Frameworks and Standards:** National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF), NIST 800-61 Incident Response, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell, Kusto Query Language (KQL)
- **Cloud Security:** Microsoft Azure, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Lead the technical ownership of CrowdStrike Falcon across the enterprise, managing Endpoint Detection and Response policies, alert triage, and proactive threat hunting using CrowdStrike Falcon Insight and Discover.
- Administer and optimise the SIEM and SOAR platform, creating and tuning detection rules, building automated playbooks, and reducing mean time to detect and respond across a complex multi-site environment.

- Manage Microsoft Entra ID, Conditional Access policies, MFA, and SSO configurations for over 8,000 users, ensuring robust Identity and Access Management (IAM) and least-privilege principles are enforced.
- Oversee MDM and MAM via Microsoft Intune, enforcing device compliance policies and securing mobile endpoints across the organisation.
- Lead vulnerability management operations using Tenable.io and Pentra BAS, coordinating remediation activities, tracking risk exposure, and reporting to senior stakeholders.
- Manage BeyondTrust Privileged Access Management to control and audit privileged account activity across critical systems.
- Configure and maintain Mimecast email security, managing threat policies, URL protection, and anti-phishing controls.
- Manage penetration test engagements, coordinate findings with technical and business teams, and drive remediation to closure.
- Deliver security awareness training, translating complex threat intelligence into actionable guidance for non-technical users.
- Respond to security incidents following NIST 800-61 procedures, performing containment, eradication, recovery, and post-incident review.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Deployed and managed CrowdStrike Falcon EDR and Microsoft Defender for Endpoint and Identity across a distributed estate, reducing endpoint compromise risk and improving detection coverage.
- Triaged and investigated alerts from SIEM and EDR platforms, correlating events to identify attack patterns aligned with MITRE ATT&CK tactics and techniques.
- Administered Microsoft Entra ID and Azure AD, implementing Conditional Access, MFA, and identity governance controls as part of a university-wide Zero Trust initiative.
- Conducted vulnerability assessments using Tenable.io, AppCheck, and Nessus, prioritising findings by risk severity and coordinating remediation with infrastructure and development teams.
- Developed and automated security runbooks and SOAR playbooks using PowerShell, reducing analyst workload and improving response times.
- Monitored and managed Mimecast email security, investigating phishing campaigns, data loss prevention alerts, and email-borne threats.
- Supported penetration testing activities and contributed to the remediation of identified vulnerabilities.
- Maintained security documentation, incident reports, and contributed to the continuous improvement of cyber security policies aligned to ISO 27001 and NIST CSF.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed endpoint security and infrastructure hardening across a SaaS/FinTech environment, implementing security controls aligned to CIS Controls and Cyber Essentials Plus.
- Administered identity and access controls including MFA, SSO, and role-based access control (RBAC), supporting secure onboarding and offboarding workflows.
- Conducted security assessments, vulnerability scans, and supported incident investigations, escalating findings with clear technical documentation.
- Managed MDM and device compliance policies, ensuring endpoints met security baselines prior to network access.
- Delivered IT security awareness training and maintained technical documentation for security processes and procedures.

KEY ACHIEVEMENTS

- Led the enterprise-wide deployment of Microsoft Defender for Endpoint and Identity across 8,000 users, delivering full EDR coverage and significantly reducing the organisation's attack surface.
- Built and optimised CrowdStrike Falcon detection policies and response workflows, achieving measurable reductions in mean time to detect (MTTD) and mean time to respond (MTTR) across the enterprise.

- Designed and implemented a SOAR automation programme using PowerShell and platform-native tooling, automating repetitive alert triage and reducing analyst toil by over 40%.
- Delivered a comprehensive vulnerability management programme integrating Tenable.io, Pentera BAS, and AppCheck, providing continuous risk visibility across on-premises and cloud infrastructure.
- Implemented BeyondTrust PAM to enforce least-privilege access across privileged accounts, reducing the risk of lateral movement and credential abuse.
- Streamlined Mimecast email security configuration, reducing successful phishing attempts and improving threat response times through automated policy enforcement.
- Led multiple penetration test programmes, coordinating technical teams to remediate findings within agreed timescales and providing clear risk reporting to senior management.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
