

PROSPER AWUNI

Senior Cyber Security Analyst | Incident Response | Threat Hunting | Security Information and Event Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with over five years of experience monitoring, investigating, and responding to cyber security alerts and incidents within complex enterprise environments. I have led and supported incident response activities from initial triage through to containment, eradication, and post-incident review, following National Institute of Standards and Technology (NIST) 800-61 procedures and aligned to the MITRE ATT&CK framework. I conduct threat hunting and threat modelling exercises using CrowdStrike Falcon Insight, Microsoft Sentinel, and Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) tooling to proactively identify adversary behaviour before it escalates. I have managed vulnerability remediation and penetration testing programmes across large, multi-site enterprise estates and provided security guidance to infrastructure and change projects to embed security by design. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a collaborative, improvement-focused approach to maturing cyber security operations across global environments. I am now seeking an opportunity to shape and develop enterprise-wide cyber security operations at an international professional services organisation.

CORE SKILLS AND TECHNICAL STACK

- **Security Monitoring and Incident Response:** Alert monitoring, investigation and response; NIST 800-61 incident response lifecycle; containment, eradication, recovery and post-incident review
- **Threat Hunting and Threat Modelling:** CrowdStrike Falcon Insight, Microsoft Sentinel, Kusto Query Language (KQL), MITRE ATT&CK-aligned threat hunting; proactive adversary behaviour identification
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel, CrowdStrike NG-SIEM, Splunk; detection rule development, alert tuning, SOAR playbook automation
- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; vulnerability assessment, remediation management, penetration test coordination
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Security Documentation and Playbooks:** Incident response playbooks, SOAR runbooks, security policy development, risk reporting
- **Security Best Practice and Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, security by design principles
- **Cloud Security:** Microsoft Azure, Microsoft 365 Security and Compliance Centre
- **Scripting and Automation:** PowerShell, KQL

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 - Present

Senior Cyber Security Analyst / Engineer

- Monitor, investigate, and respond to cyber security alerts and incidents from Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR), and Extended Detection and Response (XDR) platforms across a complex multi-site enterprise environment.
- Lead and support incident response activities from initial triage through to containment, eradication, recovery, and post-incident review, maintaining detailed incident documentation and reporting to senior

stakeholders.

- Conduct proactive threat hunting exercises using CrowdStrike Falcon Insight and Microsoft Sentinel, applying MITRE ATT&CK-aligned hypotheses to identify adversary activity not surfaced by automated alerting.
- Perform threat modelling assessments to evaluate attack vectors across infrastructure, applications, and identity, informing detection rule development and control improvements.
- Manage vulnerability remediation activities using Tenable.io and Pentera BAS, coordinating with infrastructure and application teams to resolve findings within agreed timescales.
- Lead penetration testing programmes, managing engagement scopes, coordinating technical teams on findings, and providing risk-based remediation recommendations to senior management.
- Support and improve SIEM, EDR/XDR, and security tooling, developing and tuning detection rules and SOAR playbooks to reduce noise and improve detection fidelity.
- Provide security guidance across infrastructure and change projects, embedding security by design principles and reviewing technical architectures for security risk.
- Drive security best practice across the organisation, delivering security awareness training, maintaining cyber security operational documentation, playbooks, and procedures.

University of the Arts, London (UAL)

March 2022 - March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored and investigated security alerts from SIEM and EDR platforms, triaging incidents and escalating threats in line with established response procedures and severity thresholds.
- Supported incident response investigations, performing log analysis, endpoint forensics, and threat correlation to identify root causes and scope of impact.
- Conducted threat hunting using CrowdStrike Falcon and Microsoft Sentinel, identifying indicators of compromise and improving detection coverage across the estate.
- Performed vulnerability assessments using Tenable.io, AppCheck, and Nessus, communicating findings and remediation priorities to technical and non-technical stakeholders.
- Contributed to the development and maintenance of incident response playbooks, SOAR runbooks, and security operational documentation.
- Provided security guidance on infrastructure changes and cloud migrations, identifying and mitigating security risks in line with NIST CSF and ISO 27001 requirements.
- Delivered security awareness training and phishing simulation exercises, improving the organisation's human risk posture.
- Supported penetration testing activities, coordinating with third-party testers and internal teams to manage findings and remediation.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

IT Engineer: Security, Quality and Infrastructure

- Managed security monitoring and incident response across a SaaS/FinTech environment, triaging alerts and maintaining incident records in line with established procedures.
- Conducted vulnerability assessments and supported remediation of identified findings, ensuring compliance with CIS Controls and Cyber Essentials Plus requirements.
- Implemented and managed identity and access controls, enforcing MFA, SSO, and least-privilege principles across the organisation.
- Maintained security operational documentation and contributed to the improvement of security policies and procedures.
- Delivered IT security awareness training to staff, reducing the risk of social engineering and phishing-related incidents.

KEY ACHIEVEMENTS

- Led incident response across multiple high-severity security events, ensuring rapid containment, evidence preservation, and timely recovery, with post-incident reviews driving lasting improvements to detection and response procedures.

- Designed and delivered a MITRE ATT&CK-aligned threat hunting programme, proactively identifying adversary activity and reducing dwell time across the enterprise.
- Built and tuned SIEM detection rules and SOAR playbooks using Microsoft Sentinel and CrowdStrike NG-SIEM, significantly improving detection fidelity and reducing false positive rates.
- Led the enterprise-wide deployment of Microsoft Defender for Endpoint and Identity across 8,000 users, delivering comprehensive EDR/XDR coverage and improving the organisation's ability to detect and respond to endpoint threats.
- Delivered a mature vulnerability management programme using Tenable.io and Pentera BAS, providing continuous risk visibility and enabling prioritised remediation across cloud and on-premises infrastructure.
- Developed and maintained a library of incident response playbooks and SOAR runbooks, reducing mean time to respond and improving consistency of response across the security team.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
