

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Identity and Access Management | Financial Services

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience securing large-scale enterprise environments across higher education and SaaS/FinTech sectors. I have deep practical expertise operating the CrowdStrike Falcon Endpoint Detection and Response (EDR) platform, administering Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) tooling, and managing email security gateways, Privileged Access Management (PAM), Multi-Factor Authentication (MFA), Mobile Device Management (MDM) and Mobile Application Management (MAM) solutions at scale. In my current role at University of the Arts London, I protect an 8,000-user estate, leading alert triage, threat hunting, vulnerability management and incident response within a small, high-performing security team. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a strong understanding of security operations in regulated, fast-moving environments. I am well suited to joining a focused security team within a financial services environment, applying proven expertise across CrowdStrike, Mimecast, Microsoft Entra ID (formerly Azure Active Directory), Intune, and BeyondTrust PAM to strengthen and maintain a robust security posture.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - Expert
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), detection engineering, automated playbooks
- **Email Security Gateway:** Mimecast (anti-phishing, anti-malware, Business Email Compromise (BEC) protection)
- **Identity and Access Management (IAM):** Microsoft Entra ID (Azure Active Directory), Conditional Access, Group Policy, MFA/SSO
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Threat Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365 (M365)
- **Firewall / Network Security:** Check Point Harmony, IDS/IPS management
- **Scripting and Automation:** PowerShell, SOAR automation
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat hunting, detection engineering
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

- Operate and continuously tune the CrowdStrike Falcon Endpoint Detection and Response (EDR) platform across an 8,000-user estate, conducting alert triage, deep-dive investigation and coordinated incident response to contain and eradicate threats
- Administer Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) tooling in Microsoft Sentinel, building Kusto Query Language (KQL) detection rules and automated response playbooks to reduce manual workload and improve response times
- Manage Mimecast email security gateway and web content filtering policies, protecting the organisation against phishing, malware delivery, Business Email Compromise (BEC) and other email-borne threats

- Configure and maintain Multi-Factor Authentication (MFA), Single Sign-On (SSO) and Conditional Access policies across Microsoft Entra ID (formerly Azure Active Directory) to enforce zero-trust identity controls
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM) across the 8,000-user estate, enforcing device compliance and data protection policies
- Operate BeyondTrust Privileged Access Management (PAM) to enforce least-privilege principles and protect administrative accounts from credential-based attacks
- Plan and conduct vulnerability scans using Tenable.io and AppCheck, tracking findings through to remediation and validating fixes; incorporate Pentra Breach and Attack Simulation (BAS) results to prioritise remediation of penetration test findings
- Lead proactive threat hunting activities using the MITRE ATT&CK framework to identify adversary techniques and gaps in detection coverage
- Manage the security certificate lifecycle and IDS/IPS configurations, ensuring timely renewal and policy enforcement
- Design and deliver security awareness training and phishing simulation exercises to strengthen organisational security culture
- Coordinate incident response from initial triage through to post-incident review and lessons-learned, following the NIST 800-61 incident response methodology

University of the Arts London (UAL)
Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored, triaged and investigated security alerts from SIEM/SOAR platforms and CrowdStrike Falcon EDR, escalating confirmed incidents and maintaining detailed incident records throughout the response lifecycle
- Managed Microsoft Entra ID (Azure Active Directory) user lifecycles, Group Policy Objects (GPO) and Conditional Access policy updates, ensuring identity controls remained effective and current
- Administered and maintained Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) platforms, ensuring full coverage and prompt response to endpoint and identity-based alerts
- Configured and managed Microsoft Intune MDM/MAM policies to enforce device compliance and mobile security standards across the device estate
- Operated Mimecast email security gateway, adjusting filtering policies, investigating email threats and supporting Business Email Compromise (BEC) investigations
- Performed scheduled vulnerability scans with Tenable.io and Nessus, co-ordinated remediation with infrastructure teams and tracked progress against agreed SLAs
- Participated in security awareness training delivery and phishing simulation exercises, analysing results to target the highest-risk user groups
- Contributed to the assessment and implementation of security controls aligned with ISO 27001, Cyber Essentials+ and NIST CSF frameworks

HICX Solutions Ltd (SaaS/FinTech)
Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Deployed and administered endpoint protection and SIEM tooling in a SaaS/FinTech environment, maintaining security visibility across cloud and on-premise infrastructure
- Configured Multi-Factor Authentication (MFA), access controls and security baseline policies to protect corporate systems and sensitive customer data
- Managed firewall rules, IDS/IPS and network security monitoring tooling, responding to alerts and escalating confirmed threats
- Supported vulnerability assessment processes and coordinated remediation of identified weaknesses with development and infrastructure teams
- Maintained and hardened identity management configurations including Active Directory policies and privileged account controls
- Delivered IT security and infrastructure support, ensuring platform availability and security compliance in a regulated, fast-paced FinTech environment

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon Endpoint Detection and Response (EDR) platform across an 8,000-user estate, significantly improving endpoint threat detection and response capability

- Rolled out Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) at 8,000-user scale, establishing enterprise-wide endpoint and identity threat protection
- Developed SOAR automation playbooks in Microsoft Sentinel, reducing mean time to respond (MTTR) for high-volume alert categories through automated triage and containment actions
- Implemented Pentera Breach and Attack Simulation (BAS) programme to continuously validate security control effectiveness and drive evidence-based remediation prioritisation
- Attained the Certified Information Systems Security Professional (CISSP) certification, demonstrating broad and deep knowledge across all eight domains of information security

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
