

PROSPER AWUNI

Senior Cyber Security Engineer | Azure Security | Hybrid Infrastructure | Endpoint Protection | Identity and Access Management

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprospers

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience implementing and maintaining security controls across hybrid infrastructure environments spanning on-premise systems and Microsoft Azure. My work sits firmly within the prevent and protect pillar of cyber security: designing and deploying security controls across identity, endpoint and infrastructure platforms, partnering with infrastructure and technology project teams to embed security from the ground up, and continuously improving the organisation's overall security posture. At University of the Arts London, I lead the security of an 8,000-user estate that mirrors the hybrid on-premise and Azure environment described in this role, with deep hands-on experience across Microsoft Entra ID (formerly Azure Active Directory), CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Defender for Endpoint (MDE), Microsoft Intune Mobile Device Management (MDM) and BeyondTrust Privileged Access Management (PAM). I hold the Certified Information Systems Security Professional (CISSP) certification and am able to clearly explain the rationale behind security controls and architectural decisions to both technical and non-technical stakeholders, enabling genuine collaboration with infrastructure teams to deliver lasting security improvements.

CORE SKILLS AND TECHNICAL STACK

- **Azure Security:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Identity Protection, Privileged Identity Management (PIM), Microsoft Defender for Cloud
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - Expert level
- **Endpoint and Identity Protection:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Privileged Access Management (PAM):** BeyondTrust
- **Hybrid Infrastructure Security:** On-premise and Azure environments, security control design and implementation
- **Identity and Access Management (IAM):** MFA/SSO configuration, Group Policy, Conditional Access, Zero Trust architecture principles
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Security Information and Event Management (SIEM) / SOAR:** Microsoft Sentinel, Kusto Query Language (KQL), detection engineering
- **Scripting and Automation:** PowerShell, SOAR automation playbooks
- **Security Control Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK
- **Incident Response:** NIST 800-61, threat hunting, MITRE ATT&CK-based detection

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 - Present

- Lead security engineering across a hybrid infrastructure environment spanning on-premise systems and Microsoft Azure, designing and implementing security controls across identity, endpoint and infrastructure platforms to improve the organisation's overall security posture
- Strengthen Azure security capabilities including Entra ID identity protection, Conditional Access policy design, Privileged Identity Management (PIM) configuration and Microsoft Defender for Cloud integration, reducing identity-based risk across the estate
- Deploy and optimise CrowdStrike Falcon Endpoint Detection and Response (EDR) platform for an 8,000-user estate, providing endpoint security coverage across hybrid on-premise and cloud-connected devices

- Implement and maintain Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) at 8,000-user scale, embedding endpoint and identity protection into the organisation's security architecture
- Administer Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) to enforce device compliance and data protection policies at scale across the hybrid environment
- Operate BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access principles and protect high-value administrative accounts across on-premise and Azure systems
- Provide practical security guidance to infrastructure and technology project teams, embedding security requirements into platforms, cloud service deployments and digital transformation initiatives
- Conduct vulnerability assessments using Tenable.io, AppCheck and Pentera Breach and Attack Simulation (BAS) to validate control effectiveness and drive evidence-based remediation across the hybrid environment
- Build and maintain SIEM detection rules in Microsoft Sentinel using Kusto Query Language (KQL), developing automated SOAR playbooks to accelerate investigation and response
- Manage email security gateway (Mimecast), IDS/IPS configuration and security certificate lifecycle to maintain a comprehensive defensive perimeter

University of the Arts London (UAL) Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Supported security engineering activities across a hybrid on-premise and Azure environment, configuring Conditional Access policies, endpoint protection deployments and identity controls to maintain a strong security posture
- Administered CrowdStrike Falcon EDR and Microsoft Defender for Endpoint (MDE) platforms, ensuring full endpoint coverage and maintaining secure configurations across the hybrid estate
- Managed Microsoft Entra ID (Azure Active Directory) identity lifecycle and Group Policy Objects (GPO), maintaining accurate and appropriately privileged user accounts and groups
- Configured and maintained Microsoft Intune MDM/MAM policies, enforcing device compliance standards across mobile and desktop devices in a hybrid environment
- Collaborated with infrastructure and operations teams to implement security controls and hardened baseline configurations on servers, endpoints and cloud services
- Conducted vulnerability scanning with Tenable.io and Nessus, co-ordinated remediation with technical teams and tracked progress against agreed timescales
- Contributed to ISO 27001, Cyber Essentials+ and NIST CSF compliance activities, supporting the organisation's overall security governance and assurance programmes

HICX Solutions Ltd (SaaS/FinTech) Engineer, Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered IT security engineering support in a SaaS/FinTech environment, securing hybrid on-premise and cloud infrastructure and maintaining security visibility across the estate
- Configured Microsoft Azure Active Directory (now Entra ID) identity controls, Multi-Factor Authentication (MFA) and Conditional Access policies to protect corporate systems and cloud services
- Managed endpoint security tooling, device hardening and infrastructure patching, maintaining security baselines across the device and server estate
- Supported implementation of security policies and controls aligned with industry frameworks, working alongside development and infrastructure teams to embed security into processes and platforms
- Assisted with vulnerability assessments and coordinated remediation of identified security weaknesses, reporting progress to senior stakeholders

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon Endpoint Detection and Response (EDR) across an 8,000-user hybrid infrastructure environment, significantly improving endpoint threat detection and security visibility
- Implemented Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) at 8,000-user scale, delivering comprehensive endpoint and identity protection across the hybrid estate
- Redesigned Microsoft Entra ID Conditional Access policies and implemented Privileged Identity Management (PIM), strengthening Azure identity security and reducing the risk of unauthorised privileged access

- Administered Microsoft Intune MDM/MAM deployment for 8,000 users, establishing a fully managed mobile and desktop device security estate with enforced compliance policies
- Implemented Pentra Breach and Attack Simulation (BAS) to continuously validate security control effectiveness across the hybrid environment, providing evidence-based remediation priorities to the cyber leadership team

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
