

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Identity and Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience delivering robust security operations across large enterprise environments. I bring expert-level proficiency in CrowdStrike Falcon across its full suite including Endpoint Detection and Response (EDR), Prevent, Next-Generation Security Information and Event Management (NG-SIEM), Insight and Discover modules, supported by deep experience in Microsoft Sentinel, Security Orchestration Automation and Response (SOAR) automation and Microsoft Defender for Endpoint (MDE). I have strong practical knowledge of email and web security gateway management using Mimecast, Privileged Access Management (PAM) using BeyondTrust, and identity and access management using Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access policies, Multi-Factor Authentication (MFA) and Single Sign-On (SSO). I am experienced in Mobile Device Management (MDM) and Mobile Application Management (MAM) through Microsoft Intune, vulnerability scanning and remediation using Tenable.io, AppCheck and Nessus, and remediating findings from penetration tests and Breach and Attack Simulation (BAS) exercises. I hold the Certified Information Systems Security Professional (CISSP) certification and have a consistent record of improving security posture across complex, high-profile organisations.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Security Information and Event Management (SIEM) / SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, Kusto Query Language (KQL), SOAR automation, alert triage and tuning, detection engineering
- **Email and Web Security Gateways:** Mimecast (anti-phishing, anti-malware, data loss prevention), Check Point Harmony, web filtering and gateway management
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, MFA, SSO, Group Policy, Role-Based Access Control (RBAC), BeyondTrust PAM
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, endpoint compliance policy enforcement, mobile application lifecycle
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS), vulnerability scanning, risk prioritisation and remediation tracking
- **Firewalls and Network Security:** Check Point Harmony, firewall policy management, intrusion detection and prevention, network segmentation, perimeter hardening
- **Incident Response and Threat Hunting:** NIST 800-61 incident response framework, MITRE ATT&CK, threat intelligence, forensic triage, containment and eradication
- **Scripting and Automation:** PowerShell scripting, SOAR playbooks, automation of security operations
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Certifications:** CISSP, CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Lead enterprise-wide Endpoint Detection and Response (EDR) operations using CrowdStrike Falcon, overseeing alert triage, investigation and response across an estate of over 8,000 endpoints, reducing mean time to detect and respond to threats
- Manage and optimise Security Information and Event Management (SIEM) and Security Orchestration Automation and Response (SOAR) workflows in Microsoft Sentinel, developing Kusto Query Language

(KQL) queries and custom analytics rules aligned to MITRE ATT&CK techniques

- Administer email security gateway operations using Mimecast, configuring anti-phishing, anti-malware and data loss prevention (DLP) policies to protect 8,000+ users against advanced email-borne threats
- Maintain and enhance Microsoft Entra ID (formerly Azure Active Directory) controls including Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO) integration and Group Policy configuration for identity governance
- Manage Mobile Device Management (MDM) and Mobile Application Management (MAM) policies through Microsoft Intune, enforcing device compliance, app lifecycle control and data protection across enterprise mobile estate
- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege access principles and auditing privileged account usage across critical systems
- Conduct vulnerability assessments using Tenable.io and AppCheck, prioritising findings by risk severity and coordinating remediation with infrastructure teams to reduce attack surface
- Manage Breach and Attack Simulation (BAS) exercises using Pentera to validate security controls and remediate penetration test findings, reporting outcomes to senior stakeholders
- Deliver security awareness training programmes and targeted phishing simulation campaigns to reduce user susceptibility to social engineering attacks
- Respond to and manage major security incidents in accordance with the NIST 800-61 incident response framework, conducting post-incident reviews and implementing lessons learned

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Deployed and managed enterprise-wide Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across 8,000 users, significantly improving endpoint visibility and threat detection capability
- Administered CrowdStrike Falcon Discover and Insight modules for continuous asset visibility, shadow IT identification and risk-based prioritisation across enterprise endpoints
- Configured and maintained firewall policies using Check Point Harmony, enforcing network segmentation, access control and perimeter security hardening
- Managed identity lifecycle governance using Azure Active Directory (AD) and Group Policy, enforcing RBAC, conditional access and privileged account controls
- Performed regular vulnerability assessments using Nessus and Tenable.io, tracking remediation activities and reporting risk posture to management
- Developed PowerShell automation scripts to streamline SIEM alert triage, SOAR response playbooks and routine security operations tasks, improving analyst efficiency
- Implemented and maintained Mimecast email security gateway controls, reducing phishing and malware delivery rates through policy tuning and threat intelligence integration
- Supported incident response activities including triage, forensic evidence collection, stakeholder communication and post-incident reporting
- Contributed to ISO 27001 and Cyber Essentials Plus compliance programmes, maintaining security documentation and supporting audit activities

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS/FinTech)

- Implemented and maintained endpoint security controls and SIEM alerting for a Software as a Service (SaaS)/FinTech cloud environment, ensuring continuous monitoring and threat detection
- Administered identity and access management (IAM) controls including MFA and SSO configuration, enforcing zero-trust access principles for internal and external users
- Managed firewall and network security configuration, supporting network segmentation and perimeter hardening across cloud and on-premise infrastructure
- Supported vulnerability management and patch management processes, coordinating with development and operations teams to ensure timely remediation of identified risks
- Delivered IT infrastructure security improvements aligned to CIS Controls and NIST Cybersecurity Framework (CSF) standards

- Assisted in security incident triage and response, maintaining incident records and supporting post-incident review activities

KEY ACHIEVEMENTS

- Delivered an enterprise-wide 8,000-user Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender deployment, significantly improving threat visibility and incident response capability
- Implemented BeyondTrust Privileged Access Management (PAM), achieving measurable reduction in privileged account exposure and improving audit compliance
- Deployed Pentera Breach and Attack Simulation (BAS) platform to continuously validate security controls, enabling data-driven penetration test finding remediation prioritisation
- Automated SIEM alert triage and SOAR response playbooks using PowerShell, reducing analyst workload and cutting mean time to respond to high-priority alerts
- Enhanced Mimecast email gateway security posture through targeted policy tuning and threat intelligence integration, measurably reducing successful phishing delivery rates
- Achieved and maintained Cyber Essentials Plus certification for UAL, demonstrating compliance with the UK Government's core cyber security controls framework

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
