

PROSPER AWUNI

Senior Cyber Security Engineer

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of experience deploying, managing and operating enterprise security platforms including CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR) tooling, Privileged Access Management (PAM), email security gateways and vulnerability management solutions. I have built and currently manage a hybrid Security Operations Centre (SOC) from the ground up, leading alert triage, threat detection and incident response as the senior escalation point. I am highly experienced with CrowdStrike Falcon across its NG-SIEM, EDR, Prevent, Insight and Discover modules, as well as with Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM), Mobile Application Management (MAM) and Microsoft Entra ID (formerly Azure Active Directory/Azure AD). I bring a proven ability to manage WAF/DDoS, web and email security gateways, firewall rulesets, Identity and Access Management (IAM) controls and deliver security awareness training to a diverse user base. I am looking for a permanent, hybrid Senior Cyber Security Engineer role in which I can apply my technical depth to protect a well-established organisation's infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon (Expert):** NG-SIEM, EDR, Falcon Prevent, Falcon Insight, Falcon Discover — deployed, managed and built hybrid SOC
- **SIEM/SOAR/EDR Operations:** Alert triage, detection rule development, event correlation, playbook automation, threat hunting
- **Microsoft Entra ID / Azure AD:** Conditional Access, MFA, SSO, Group Policy — 8,000-user deployment
- **Microsoft Defender Suite:** Defender for Endpoint (MDE), Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Privileged Access Management (PAM):** BeyondTrust — deployment, policy management, session monitoring
- **MDM/MAM and Endpoint Management:** Microsoft Intune, Tanium
- **Email and Web Security:** Mimecast — anti-phishing, Data Loss Prevention (DLP), quarantine policies
- **Firewall and Network Security:** Check Point Harmony; WAF/DDoS controls; Intrusion Detection System (IDS)/Intrusion Prevention System (IPS)
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus — scanning, prioritisation and remediation tracking
- **Scripting and Automation:** PowerShell; SOAR playbook development
- **Incident Response:** NIST 800-61; MITRE ATT&CK framework; playbook authoring; senior escalation lead
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Built and currently manages a hybrid SOC environment using **CrowdStrike Falcon** (NG-SIEM, EDR, Prevent, Insight and Discover modules) as the primary security operations platform for the organisation
- Leads alert triage, SIEM/SOAR/EDR event analysis and incident response as the **senior escalation point**, applying NIST 800-61 methodology and MITRE ATT&CK framework throughout the lifecycle
- Develops, tests and tunes detection rules, correlation rules and SOAR automation playbooks, reducing mean time to detect and respond across the SOC
- Manages **vulnerability management** programme using Pentera BAS, Tenable.io and AppCheck; oversees remediation tracking, patch prioritisation and executive reporting

- Administers web and email security gateways including **Mimecast**, managing anti-phishing policies, DLP controls and quarantine workflows
- Manages **IDS/IPS** and **WAF/DDoS** controls; oversees security certificate lifecycle management across the enterprise
- Delivers organisation-wide security awareness training and contributes to ad-hoc security improvement projects
- Produces security dashboards, metrics and reports for senior leadership and governance committees

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Led the deployment and management of **Microsoft Defender for Endpoint (MDE)** and **Microsoft Intune MDM/MAM** across an 8,000-user estate, improving endpoint visibility and enforcing security baselines
- Managed **Microsoft Entra ID (Azure AD)**, Conditional Access policies, **MFA** and **SSO** for all users, reducing identity-based risk and supporting Zero Trust adoption
- Deployed and managed **BeyondTrust PAM**, enforcing least-privilege access controls and securing privileged accounts and sessions
- Administered **Mimecast** for email security including anti-phishing, anti-malware and DLP policy management, reducing phishing-related incidents significantly
- Managed **CrowdStrike Falcon EDR** across the endpoint estate, responding to detections, conducting threat investigations and refining prevention policies
- Administered **Check Point Harmony** firewall platform, managing rulesets, reviewing logs and responding to network security events
- Conducted vulnerability scanning using **Nessus** and AppCheck; prioritised findings by severity and tracked remediation with relevant infrastructure teams
- Supported incident response, authored security playbooks and contributed to security awareness delivery programmes

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Supported security and infrastructure operations across a SaaS/FinTech environment, including vulnerability assessments, patch management and security tooling deployment
- Developed **PowerShell** scripts to automate routine security and infrastructure tasks, improving operational efficiency
- Assisted in penetration test finding remediation and supported ISO 27001 compliance activities
- Delivered IT infrastructure support across security, quality and operational domains, maintaining high availability for business-critical systems

KEY ACHIEVEMENTS

- Designed, deployed and now operates a **hybrid SOC from the ground up** using CrowdStrike Falcon, achieving full endpoint visibility and near-real-time threat detection across the organisation
- Reduced false positive alert volume by **tuning SIEM detection rules and SOAR automation playbooks**, materially improving analyst efficiency and response times
- Led deployment of **BeyondTrust PAM**, enforcing privileged access controls that directly reduced the organisation's exposure to credential-based attacks
- Spearheaded the **Microsoft MDE and Intune MDM/MAM rollout** to 8,000 users, enabling unified endpoint management and significantly improving the organisation's security posture
- Authored and maintained the **incident response playbook library**, standardising SOC response procedures and reducing escalation handling time

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**
