PROSPER AWUNI

Senior Cyber Security Analyst | SIEM | Endpoint Protection | Vulnerability Management | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with over five years of hands-on experience in security operations, Security Information and Event Management (SIEM), endpoint protection, vulnerability management, and risk management. I hold the Certified Information Systems Security Professional (CISSP) certification and bring proven experience protecting large and complex organisations, most recently at the University of the Arts London (UAL) where I lead security engineering and operations across an 8,000-user hybrid enterprise estate. I have deep practical expertise across Microsoft Sentinel, CrowdStrike Falcon, Microsoft Defender Extended Detection and Response (XDR), and Microsoft Entra ID, and I apply recognised frameworks including the National Institute of Standards and Technology Cybersecurity Framework (NIST CSF), CIS Controls, ISO/IEC 27001, and Cyber Essentials Plus to manage risk and strengthen security posture. I am skilled in incident response, threat hunting, detection engineering, and regulatory compliance, and I communicate risk clearly to both technical teams and senior leadership. I am looking to apply my expertise in a critical infrastructure or complex regulated environment where security operations and risk management have direct business impact.

CORE SKILLS AND TECHNICAL STACK

- **SIEM and Security Operations:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk/SPL, detection engineering and alert tuning, MITRE ATT&CK framework
- **Endpoint Protection:** CrowdStrike Falcon (Endpoint Detection and Response, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender XDR
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck, Defender Vulnerability Management, risk-based remediation prioritisation
- **Incident Response:** NIST SP 800-61, threat hunting, digital forensics, security alert investigation, containment and eradication, lessons-learned reporting
- **Identity and Access:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Privileged Identity Management (PIM), BeyondTrust Privileged Access Management (PAM), Single Sign-On (SSO)
- **Cloud and Infrastructure Security:** Microsoft Azure, Microsoft 365 (M365) security, Defender for Cloud, Amazon Web Services (AWS) security controls
- **Endpoint Management:** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM), Tanium
- **Security Automation:** PowerShell scripting, Security Orchestration, Automation and Response (SOAR) playbook development, Microsoft Sentinel automation rules
- **Risk and Compliance:** NIST CSF, CIS Controls, ISO/IEC 27001, Cyber Essentials Plus, risk assessment, security policy, regulatory compliance reporting
- **Other Tools:** Mimecast, Check Point Harmony firewall, Microsoft Defender for Identity (MDI)

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) — Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Lead security operations across a hybrid enterprise environment, monitoring, investigating, and responding to security incidents using Microsoft Sentinel SIEM, CrowdStrike Falcon, and Microsoft Defender XDR, following NIST SP 800-61 incident response procedures.
- Engineer and maintain detection rules in Microsoft Sentinel using KQL analytics aligned to MITRE ATT&CK, reducing false-positive rates and improving the accuracy and speed of analyst response.
- Direct enterprise vulnerability management using Tenable.io and Pentera BAS, assessing endpoints, cloud workloads, and applications, and coordinating risk-based remediation with infrastructure and application owners.

- Oversee CrowdStrike Falcon endpoint protection, performing proactive threat hunting using Falcon Insight and NG-SIEM telemetry to identify threats not surfaced by automated detections.
- Manage identity security using Entra ID, including Conditional Access policy design, Privileged Identity Management, MFA deployment, and SSO governance across SaaS and on-premises applications.
- Develop and maintain SOAR automation playbooks in Microsoft Sentinel to automate alert triage, incident enrichment, and routine containment steps, improving team efficiency and consistency.
- Produce security risk reporting and metrics for senior leadership, communicating threat landscape, vulnerability posture, and incident outcomes to governance and audit committees.
- Contribute to risk assessments and security policy reviews, mapping controls to NIST CSF, CIS Controls, ISO/IEC 27001, and Cyber Essentials Plus requirements.
- Collaborate across IT, infrastructure, and business teams to embed security requirements into projects, change management, and operational processes.

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity *March 2022 – March 2025*

- Monitored and triaged security alerts across Microsoft Sentinel, Defender XDR, and CrowdStrike Falcon, investigating incidents, documenting findings, and driving remediation aligned to NIST SP 800-61.
- Administered endpoint protection and patch management policies using CrowdStrike Falcon, Defender for Endpoint, and Intune, maintaining compliance across the Windows, macOS, and mobile device estate.
- Performed vulnerability scanning and assessment using Tenable.io, Nessus, and AppCheck, tracking remediation progress against service level agreements and reporting trends to management.
- Supported delivery of Cyber Essentials Plus certification, performing internal assessments and aligning controls with ISO/IEC 27001 and CIS Controls requirements.
- Managed BeyondTrust PAM solutions, controlling and auditing privileged access to critical infrastructure and enforcing least-privilege access principles.
- Authored security runbooks, incident response playbooks, and procedure documentation to support consistent security operations team performance.
- Contributed to security risk assessments and produced compliance reporting for internal governance and external audit purposes.

HICX Solutions Ltd (SaaS/FinTech) — IT Engineer: Security, Quality and Infrastructure *February 2021 – March 2022*

- Managed security operations for a Software as a Service (SaaS) FinTech company, including endpoint protection, patch management, vulnerability assessments, and incident investigation.
- Configured Microsoft Azure and M365 security controls including Conditional Access, Defender for Endpoint, and Intune, maintaining ISO/IEC 27001 and CIS Benchmark compliance.
- Supported security risk assessments and audit activities, mapping controls to ISO/IEC 27001 requirements and producing evidence for internal and external review.
- Responded to and investigated security incidents, conducting root cause analysis and implementing corrective controls to reduce recurrence.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon and Microsoft Defender XDR across 8,000 users at UAL, achieving full endpoint telemetry and centralised security operations visibility.
- Built detection engineering capability in Microsoft Sentinel using KQL analytics mapped to MITRE ATT&CK, reducing analyst noise and improving threat detection accuracy across the enterprise.
- Led enterprise vulnerability management programme using Tenable.io and Pentera BAS, reducing critical vulnerability exposure through structured, risk-based remediation across cloud and endpoint assets.
- Automated security alert triage and incident enrichment using SOAR playbooks in Microsoft Sentinel, cutting average investigation time for common alert categories.
- Maintained Cyber Essentials Plus certification for UAL and contributed to ISO/IEC 27001 and NIST CSF control alignment across the security programme.
- Designed and enforced Conditional Access and Intune compliance policies extending zero-trust security controls to a diverse, multi-platform BYOD and corporate device estate.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
