

PROSPER AWUNI

Cyber Security Incident Response Lead | NIST 800-61 | MITRE ATT&CK | CrowdStrike Falcon | SIEM/
SOAR | Threat Hunting

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprospers

PROFESSIONAL PROFILE

I am a CISSP-certified Cyber Security Incident Response professional with over five years of experience leading end-to-end incident detection, investigation, containment and recovery operations across complex enterprise environments. I specialise in NIST 800-61-aligned incident response, MITRE ATT&CK-guided investigation, and SOAR-driven automation — with deep hands-on expertise in CrowdStrike Falcon EDR, Microsoft Sentinel and Mimecast. In my current role at the University of the Arts London I act as the lead responder across all security incidents affecting an 8,000-user institution, coordinating cross-functional teams through the full IR lifecycle. I have developed and maintained a comprehensive playbook and runbook library covering ransomware, phishing, credential compromise, insider threat, and lateral movement scenarios. I am an effective communicator who can translate complex technical findings into clear executive briefings, and I am seeking an Incident Response Lead role at Live Nation Entertainment where I can apply my operational depth and leadership experience to protect a global live entertainment business.

CORE SKILLS AND TECHNICAL STACK

- **Incident Response Leadership:** NIST 800-61 lifecycle (preparation, detection, containment, eradication, recovery, lessons learned); cross-functional incident coordination; executive and stakeholder communication; IR playbook and runbook authorship
- **Threat Detection and Investigation:** CrowdStrike Falcon EDR (Prevent, Insight, NG-SIEM); proactive threat hunting; Microsoft Sentinel (KQL); Splunk (SPL); MITRE ATT&CK TTP mapping
- **SOAR and Automation:** CrowdStrike Falcon SOAR; Microsoft Sentinel playbooks; automated alert triage and escalation workflows reducing MTTR
- **Email-Based Threat Response:** Mimecast phishing triage; anti-spoofing and URL rewriting policy; DLP; Business Email Compromise (BEC) investigation
- **Identity and Access Management:** Entra ID / Azure AD; Conditional Access; BeyondTrust PAM; MFA and SSO; privileged account monitoring during incidents
- **Endpoint Security:** Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI); Microsoft 365 Defender; CrowdStrike Real Time Response (RTR)
- **Vulnerability Management:** Tenable.io, Pentra BAS, AppCheck, Nessus; post-incident remediation validation
- **Security Frameworks:** NIST 800-61, MITRE ATT&CK, NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus
- **Scripting and Automation:** PowerShell; SOAR playbook development; automated IOC enrichment and response

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 to Present

- Lead all security incident response activities for an 8,000-user higher education institution, applying the NIST 800-61 framework and MITRE ATT&CK methodology to coordinate containment, eradication and full recovery across ransomware, phishing, credential compromise and lateral movement incidents.
- Developed and maintain a comprehensive IR playbook and runbook library covering all major incident categories — reducing response inconsistency and enabling junior analysts to contribute effectively under pressure.
- Operate as primary investigator in CrowdStrike Falcon EDR and Microsoft Sentinel, performing deep forensic investigation, timeline reconstruction and root cause analysis for all significant security events.
- Lead SOAR playbook development in CrowdStrike Falcon and Microsoft Sentinel, automating detection-to-response workflows that reduced mean time to respond (MTTR) for high-frequency alert types.

- Conduct proactive threat hunting using CrowdStrike Falcon Insight, building custom hunts aligned to emerging TTPs to surface threats before automated detection fires.
- Produce post-incident reviews and executive briefings, communicating root cause, remediation actions, and strategic recommendations to senior leadership and the IT Security Officer.
- Administer Mimecast email security, managing phishing triage, quarantine remediation, and BEC investigation workflows as part of the IR programme.
- Manage BeyondTrust PAM and Entra ID Conditional Access to enforce zero-trust principles and reduce the privileged-account attack surface during active incidents.

University of the Arts, London (UAL) Cyber Security Analyst, Cyber Security and Identity

March 2022 to March 2025

- Performed daily alert triage and incident investigation across SIEM, EDR and email security platforms, applying structured escalation procedures in line with agreed SLAs.
- Authored incident response playbooks and runbooks aligned to NIST 800-61 and MITRE ATT&CK, improving response consistency and measurably reducing dwell time.
- Supported CrowdStrike Falcon EDR deployment and detection policy management, maintaining endpoint protection coverage across the full university estate.
- Conducted vulnerability scanning and remediation tracking with Tenable.io and Nessus, reporting compliance posture to senior management.
- Managed Azure AD / Entra ID identity lifecycle, Conditional Access policy review, and MFA configuration to support IR containment actions.

HCX Solutions Ltd (SaaS/FinTech) IT Engineer: Security, Quality and Infrastructure

February 2021 to March 2022

- Administered endpoint security, email security and IAM across a cloud-first SaaS/FinTech environment, supporting incident response and security monitoring activities.
- Configured PAM controls and MFA/SSO for privileged and standard accounts; maintained security infrastructure including firewalls and MDM/MAM solutions.

KEY ACHIEVEMENTS

- Led end-to-end incident response operations across all major incident types at UAL, coordinating multi-team response efforts from initial detection through to post-incident review and strategic remediation.
- Delivered SOAR automation playbooks within CrowdStrike Falcon and Microsoft Sentinel, eliminating manual triage for high-volume alert categories and enabling the team to focus on complex investigations.
- Built a comprehensive IR playbook library aligned to NIST 800-61 and MITRE ATT&CK, providing structured, repeatable response procedures for all major incident types.
- Deployed Microsoft Defender for Endpoint, Defender for Identity and Microsoft 365 Defender across an 8,000-user enterprise estate, providing unified cross-domain detection and response capability.
- Reduced phishing click rates through targeted awareness training and phishing simulation campaigns, directly reducing email-borne incident volume.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
