

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM | EDR | IAM | PAM | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience in endpoint detection and response (EDR), security information and event management (SIEM) and security orchestration, automation and response (SOAR), privileged access management (PAM), identity and access management (IAM), and enterprise vulnerability management. I have led the organisation-wide deployment and ongoing optimisation of CrowdStrike Falcon EDR and CrowdStrike Next-Generation SIEM across an estate of more than 8,000 users, and I take technical ownership of alert triage, threat detection, and incident response in line with the National Institute of Standards and Technology (NIST) 800-61 framework. I am experienced in managing email and web security gateways including Mimecast, maintaining enterprise IAM controls through Microsoft Entra ID (formerly Azure Active Directory) and Conditional Access, and overseeing mobile device management (MDM) and mobile application management (MAM) via Microsoft Intune. I thrive in lean, high-impact security teams where technical ownership, cross-functional collaboration, and continuous improvement are essential.

CORE SKILLS AND TECHNICAL STACK

- **EDR / XDR:** CrowdStrike Falcon (Endpoint Detection and Response, Prevent, NG-SIEM, Insight, Discover) | Microsoft Defender for Endpoint (MDE) | Microsoft Defender for Identity (MDI) | Microsoft 365 Defender
- **SIEM / SOAR:** CrowdStrike Falcon Next-Generation SIEM | Microsoft Sentinel | Kusto Query Language (KQL) | SOAR playbook development and automation | Splunk/SPL (working knowledge)
- **Email and Web Security:** Mimecast | Tanium | Microsoft Defender for Office 365
- **IAM / MFA / SSO:** Microsoft Entra ID (Azure Active Directory) | Conditional Access | Multi-Factor Authentication (MFA) | Single Sign-On (SSO) | Group Policy
- **MDM / MAM:** Microsoft Intune | Mobile Device Management and Mobile Application Management policies
- **PAM:** BeyondTrust Privileged Access Management (PAM) | privileged account governance and session management
- **Vulnerability Management:** Tenable.io | Nessus | AppCheck | Pentera Breach and Attack Simulation (BAS) | penetration test findings remediation
- **Firewalls / Network Security:** Check Point Harmony | IDS/IPS management | firewall policy hardening
- **Incident Response:** NIST 800-61 incident handling | MITRE ATT&CK framework | threat hunting | security alert triage
- **Scripting / Automation:** PowerShell | SOAR automation and playbooks
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF) | CIS Controls | ISO 27001 | Cyber Essentials Plus | MITRE ATT&CK
- **Certifications:** CISSP | CompTIA Security+ | Microsoft Certified Solutions Associate (MCSA) | CompTIA A+ | Google IT Support Professional

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Take technical ownership of CrowdStrike Falcon EDR and CrowdStrike Next-Generation SIEM, overseeing policy configuration, alert triage, and continuous tuning to reduce false positives and improve detection fidelity across an 8,000-user estate.
- Manage and optimise SIEM and SOAR platforms including CrowdStrike NG-SIEM and Microsoft Sentinel, developing custom Kusto Query Language (KQL) detection rules, playbooks, and automated response workflows to accelerate incident triage and remediation.

- Lead endpoint detection and response (EDR) and extended detection and response (XDR) alert handling, conducting deep-dive investigations across the Microsoft Defender suite (Defender for Endpoint, Defender for Identity, Microsoft 365 Defender) and correlating signals with SIEM data.
- Oversee email and web security gateway operations via Mimecast, including policy governance, threat intelligence integration, and impersonation/phishing response.
- Administer BeyondTrust Privileged Access Management (PAM), governing privileged account provisioning, session recording, and access reviews to enforce least-privilege principles.
- Manage Microsoft Entra ID (formerly Azure Active Directory), Conditional Access policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) integrations, maintaining robust identity security across hybrid environments.
- Oversee Mobile Device Management (MDM) and Mobile Application Management (MAM) controls via Microsoft Intune, enforcing compliance policies and device health requirements.
- Drive the enterprise vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), prioritising and coordinating remediation of critical and high-severity findings with technical teams.
- Conduct threat hunting activities aligned to the MITRE ATT&CK framework, proactively identifying indicators of compromise and undetected adversary behaviour across endpoints, identity, and cloud telemetry.
- Lead incident response in line with the NIST 800-61 framework, coordinating containment, eradication, recovery, and post-incident review activities across security and IT teams.
- Deliver security awareness training and phishing simulation campaigns using KnowBe4 and Mimecast, measurably improving end-user security behaviours.
- Remediate penetration test findings by working closely with infrastructure and application teams to design and implement compensating controls.

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Delivered day-to-day security operations including SIEM alert monitoring, EDR investigation, identity anomaly detection, and vulnerability remediation across a hybrid Microsoft 365 and on-premises environment.
- Configured and maintained CrowdStrike Falcon Prevent, Insight, and Discover modules, managing sensor deployment, exclusion policies, and detection rule libraries.
- Administered Microsoft Entra ID Conditional Access policies, MFA enrolment campaigns, and privileged identity governance, supporting a zero-trust access model.
- Supported the deployment and configuration of BeyondTrust PAM, onboarding privileged accounts and implementing session management controls.
- Conducted vulnerability assessments using Tenable.io and AppCheck, producing risk-rated remediation reports for technical and leadership stakeholders.
- Contributed to incident response processes in line with NIST 800-61, including containment actions, evidence preservation, and lessons-learned reporting.
- Managed Mimecast email security platform, tuning anti-phishing, anti-spoofing, and data loss prevention (DLP) policies to reduce mail-borne threats.
- Maintained Intune MDM and MAM policies, ensuring device compliance for Windows, iOS, and Android endpoints across the university estate.
- Supported Check Point Harmony firewall administration, reviewing rule bases and implementing hardening recommendations from internal and external security assessments.

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software as a Service / FinTech)

- Managed security and infrastructure operations for a Software as a Service (SaaS) FinTech platform, implementing endpoint security, access controls, and patch management processes.
- Administered Active Directory, Group Policy, and identity management controls, enforcing least-privilege access and supporting compliance audits under ISO 27001 and Cyber Essentials Plus frameworks.

- Conducted vulnerability scanning and risk assessments, coordinating remediation activities with development and infrastructure teams to maintain secure configuration baselines.
- Supported the deployment and management of endpoint protection and monitoring tools, contributing to incident detection and response capabilities.
- Delivered IT security quality assurance processes, developing and maintaining security policies, procedures, and standards documentation.
- Provided technical security guidance to internal teams, supporting secure software development and infrastructure build practices.

KEY ACHIEVEMENTS

- Led the deployment of CrowdStrike Falcon EDR and CrowdStrike Next-Generation SIEM across an 8,000-user estate at UAL, achieving full sensor coverage and establishing automated alert triage workflows that reduced mean time to detect (MTTD) and mean time to respond (MTTR).
- Designed and implemented Microsoft Sentinel detection rules and KQL-based hunting queries aligned to MITRE ATT&CK, enabling proactive identification of threat actor behaviours including credential harvesting, lateral movement, and data exfiltration attempts.
- Deployed and operationalised BeyondTrust PAM across UAL's privileged account population, reducing standing privileged access and improving audit trail coverage for regulatory and internal compliance purposes.
- Implemented a Pentera Breach and Attack Simulation (BAS) programme to continuously validate security controls, using outputs to prioritise Tenable.io and AppCheck vulnerability remediation backlogs and strengthen the organisation's overall security posture.
- Developed and maintained SOAR playbooks in CrowdStrike Fusion and Microsoft Sentinel, automating repetitive response tasks including account isolation, indicator blocking, and stakeholder notification, freeing analyst time for higher-value investigation work.
- Achieved Certified Information Systems Security Professional (CISSP) certification, demonstrating advanced knowledge across all eight domains of information security including security and risk management, asset security, security architecture, communications and network security, identity and access management, security assessment, security operations, and software development security.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
