

PROSPER AWUNI

Information Security Engineer | Enterprise Security | Critical Infrastructure and Cloud Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) and Senior Information Security Engineer with over five years of experience engineering and operating enterprise security capabilities across complex, mission-critical technology environments. I have a strong track record designing, implementing, and hardening security controls that protect large-scale digital platforms used by thousands of users, including identity and access management, endpoint protection, Security Information and Event Management (SIEM), and cloud security. I am experienced working in regulated and compliance-driven environments, with a deep understanding of security frameworks including ISO 27001, the National Institute of Standards and Technology (NIST) Cybersecurity Framework (CSF), CIS Controls, and Cyber Essentials Plus. I hold current eligibility for UK Security Clearance and bring the professional maturity to operate effectively within a global technology leader delivering platforms that support public safety, combat financial crime, and secure critical infrastructure.

CORE SKILLS AND TECHNICAL STACK

- **Security Engineering and Architecture:** Design and implementation of enterprise security controls, cloud and hybrid infrastructure hardening, security control frameworks (ISO 27001, NIST CSF, CIS Controls, Cyber Essentials+)
- **Security Information and Event Management (SIEM) and Monitoring:** Microsoft Sentinel (Kusto Query Language/KQL, analytics rules, data connectors), CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Splunk/Security Processing Language (SPL)
- **Endpoint and Extended Detection and Response (XDR):** CrowdStrike Falcon Prevent/Insight/Discover, Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Identity and Access Management:** Azure Active Directory (Azure AD) / Microsoft Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Cloud Security:** Microsoft Azure security controls, Microsoft Entra ID protection, cloud workload security monitoring, Software as a Service (SaaS) security hardening
- **Network and Perimeter Security:** Check Point Harmony firewall, Mimecast email security, network segmentation and monitoring
- **Vulnerability and Risk Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus, risk assessment, remediation tracking
- **Scripting and Automation:** PowerShell scripting, Security Orchestration, Automation and Response (SOAR) playbooks, Microsoft Intune/Mobile Device Management (MDM)

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer | University of the Arts, London (UAL) *March 2025 - Present*

- Engineer and maintain enterprise-wide security capabilities across cloud, endpoint, identity, and network environments, protecting a complex digital estate serving over 8,000 users across multiple sites.
- Implement and harden security controls across the Microsoft security stack, including Microsoft Sentinel SIEM, Microsoft Defender for Endpoint, Microsoft Defender for Identity, and Microsoft 365 Defender, ensuring consistent threat detection and response coverage.
- Manage and optimise CrowdStrike Falcon (Prevent, Insight, Discover, Next-Generation SIEM modules) for endpoint threat detection, response, and continuous monitoring, aligning configurations to organisational risk appetite and compliance requirements.
- Design and enforce identity security through Azure Active Directory / Microsoft Entra ID, including Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Privileged

Identity Management (PIM).

- Implement BeyondTrust Privileged Access Management (PAM) to control and audit privileged access across IT infrastructure, reducing attack surface from credential compromise.
- Develop and deploy Security Orchestration, Automation and Response (SOAR) playbooks using PowerShell and Microsoft Sentinel automation to streamline threat response and reduce manual analyst effort.
- Lead incident response (IR) activities aligned to the NIST SP 800-61 lifecycle, coordinating containment, eradication, recovery, and post-incident review across cloud and on-premises infrastructure.
- Conduct threat hunting and manage vulnerability programmes using Pentra Breach and Attack Simulation (BAS), Tenable.io, and AppCheck, translating findings into risk-prioritised remediation roadmaps.
- Ensure alignment to ISO 27001, NIST Cybersecurity Framework, and Cyber Essentials Plus requirements, providing technical evidence for internal and external audits.

Cyber Security Analyst, Cyber Security and Identity | University of the Arts, London (UAL)

March 2022 - March 2025

- Monitored and investigated security events across SIEM and endpoint protection platforms, performing Tier 2 and Tier 3 alert triage and producing detailed incident reports for stakeholders.
- Developed and tuned Kusto Query Language (KQL) detection rules in Microsoft Sentinel to improve alert fidelity across cloud, identity, and endpoint data sources.
- Managed Azure Active Directory / Microsoft Entra ID identity security, designing Conditional Access policies, enforcing Multi-Factor Authentication (MFA), and reviewing Identity Protection risk detections.
- Administered CrowdStrike Falcon Prevent endpoint security, managing prevention policies, investigating detections, and coordinating isolations for compromised devices.
- Maintained Mimecast email security configurations, including anti-phishing, anti-spoofing, URL rewriting, and Data Loss Prevention (DLP) policies to protect against email-borne threats.
- Supported ISO 27001 and Cyber Essentials Plus compliance programmes, providing technical documentation and evidence for audit purposes.
- Contributed to endpoint management and security baseline enforcement using Microsoft Intune and Tanium.

IT Engineer: Security, Quality and Infrastructure | HICX Solutions Ltd (Software as a Service / FinTech)

February 2021 - March 2022

- Implemented security controls and maintained compliance across a Software as a Service (SaaS) cloud environment in the financial technology (FinTech) sector, ensuring alignment with ISO 27001 and CIS Controls.
- Managed endpoint security and device compliance via Microsoft Intune (Mobile Device Management/Mobile Application Management) and Azure Active Directory across a distributed workforce.
- Conducted vulnerability assessments using Nessus, tracking identified risks through to remediation and reporting security posture to management.
- Delivered PowerShell automation scripts to improve efficiency and consistency across security and IT infrastructure management tasks.
- Supported quality and compliance programmes, contributing technical evidence to internal audit cycles and ISO 27001 certification activities.

KEY ACHIEVEMENTS

- Deployed Microsoft Defender for Endpoint and Microsoft Defender for Identity across an estate of over 8,000 users, standardising enterprise endpoint and identity threat detection and response at scale.
- Implemented CrowdStrike Falcon Prevent across a complex multi-site environment, achieving comprehensive endpoint coverage and integrating NG-SIEM telemetry with Microsoft Sentinel for unified threat monitoring.
- Engineered and tuned a full library of Kusto Query Language (KQL) analytics rules in Microsoft Sentinel, systematically improving detection coverage and reducing false positive rates across cloud and hybrid infrastructure.
- Implemented BeyondTrust Privileged Access Management (PAM), materially reducing the risk from compromised privileged accounts across IT infrastructure.

- Developed automated Security Orchestration, Automation and Response (SOAR) playbooks that reduced mean time to respond (MTTR) for common threat scenarios, enabling consistent containment without manual analyst steps.
 - Supported successful Cyber Essentials Plus certification by delivering technical evidence across endpoint protection, identity access management, patch management, and network boundary controls.
-

EDUCATION

- Master of Science (M.Sc.) in Environmental and Resource Engineering
 - Bachelor of Science (B.Sc.) in Chemical Engineering
-

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
