PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, SOAR & EDR Specialist

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with more than five years of experience managing Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), and Endpoint Detection and Response (EDR) platforms in complex enterprise environments. I hold the Certified Information Systems Security Professional (CISSP) certification and bring deep hands-on expertise with CrowdStrike Falcon, Microsoft Sentinel with Kusto Query Language (KQL), and the Microsoft Defender suite deployed across an organisation of 8,000 users. I have delivered end-to-end security operations covering web and email security gateways, Privileged Access Management (PAM), Multi-Factor Authentication (MFA), Mobile Device Management (MDM), Mobile Application Management (MAM), and vulnerability remediation programmes. I am experienced in alert triage, threat hunting, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) management, penetration test finding remediation, and security awareness training, and I thrive in small, focused technical security teams where breadth and depth of expertise are both valued.

CORE SKILLS AND TECHNICAL STACK

- **EDR and SIEM/SOAR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover), Microsoft Sentinel with KQL, SOAR playbook development, Splunk/Security Processing Language (SPL)
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender; enterprise-wide deployment and ongoing management
- **Identity and Access:** Azure Active Directory (Azure AD) / Entra ID, Conditional Access policies, MFA, Single Sign-On (SSO) federation
- **PAM and Endpoint Control:** BeyondTrust PAM, Tanium, Microsoft Intune MDM/MAM
- **Network and Perimeter Security:** Check Point Harmony Firewall, Mimecast email gateway, web security gateways, IDS/IPS management
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; end-to-end remediation tracking
- **Incident Response and Threat Intelligence:** NIST SP 800-61 framework, MITRE ATT&CK framework, threat hunting, digital forensics triage
- **Scripting and Automation:** PowerShell scripting, SOAR automation and integration
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), Centre for Internet Security (CIS) Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Act as the senior technical security expert for an 8,000-user institution, providing specialist guidance on security tooling, alert response, and architectural decisions across cloud, hybrid, and on-premises environments.
- Manage and continuously tune the SIEM/SOAR/EDR stack comprising CrowdStrike Falcon NG-SIEM, CrowdStrike Falcon EDR, and Microsoft Sentinel; develop and iterate custom KQL detection rules and SOAR playbooks to reduce mean time to respond.
- Lead alert triage, threat hunting, and incident response operations following NIST SP 800-61 methodology and MITRE ATT&CK adversary mapping, containing and eradicating threats across endpoint, identity, and cloud surfaces.
- Administer BeyondTrust PAM for privileged account governance; audit and enforce least-privilege access principles across critical systems and administrative accounts.
- Manage web and email security gateways, including Mimecast and Check Point Harmony; monitor and respond to inbound threats, WAF-related events, and gateway policy violations.

- Oversee MFA, SSO, and Conditional Access policies in Azure AD / Entra ID, strengthening identity security in line with zero-trust principles.
- Govern MDM and MAM policies through Microsoft Intune, enforcing device compliance and application control across the mobile device estate.
- Run the vulnerability management programme using Tenable.io, Pentera BAS, AppCheck, and Nessus; prioritise, track and drive remediation of findings through technical teams, reporting risk posture to senior stakeholders.
- Deliver security awareness content and support phishing simulation exercises to strengthen staff-level cyber resilience across the institution.

University of the Arts London (UAL) *March 2022 - March 2025*

Cyber Security Analyst, Cyber Security and Identity

- Managed day-to-day SIEM alert triage and incident response across the institution, escalating and leading investigation of high-severity events through to resolution and post-incident review.
- Supported deployment and ongoing management of CrowdStrike Falcon EDR and Microsoft Sentinel, including tuning of detection rules and writing KQL queries to surface meaningful signals from noise.
- Administered and maintained Azure AD / Entra ID, managing Conditional Access policies, MFA enrolment, and SSO integrations across the university's application portfolio.
- Supported configuration and maintenance of BeyondTrust PAM, managing onboarding of privileged accounts, session recording, and periodic access reviews.
- Assisted with vulnerability scanning and patch management using Tenable.io and Nessus; worked with infrastructure teams to track and validate remediation.
- Maintained IDS/IPS rules and reviewed network security logs; provided first-level triage for firewall and perimeter security alerts from Check Point Harmony.
- Supported management of MDM/MAM policies in Microsoft Intune, ensuring policy compliance and device enrolment across the mobile estate.
- Contributed to Cyber Essentials Plus certification assessment and supported the continuous improvement of the university's security control baseline.

HICX Solutions Ltd (SaaS / FinTech) *February 2021 - March 2022*

IT Engineer: Security, Quality and Infrastructure

- Supported security operations for a Software as a Service (SaaS) FinTech company, managing endpoint security, identity and access controls, and security monitoring across a cloud-first infrastructure.
- Administered user identity and access management, including MFA and SSO integration, to protect cloud-hosted SaaS platforms and internal systems.
- Performed vulnerability assessments and assisted in remediation of findings; maintained endpoint security tooling and ensured patching compliance across the estate.
- Supported internal and external compliance audits, contributing to documentation of security controls aligned with ISO 27001 and industry best practice.
- Provided third-line support escalation for security-related incidents, performing root-cause analysis and implementing corrective controls.

KEY ACHIEVEMENTS

- Deployed and operationalised Microsoft Defender for Endpoint, Identity, and 365 across an 8,000-user estate, significantly improving detection coverage and reducing dwell time on identity-based attacks.
- Developed custom CrowdStrike Falcon NG-SIEM detection rules and SOAR automation playbooks, cutting mean time to triage on high-priority alerts by over 40%.
- Designed and implemented a comprehensive vulnerability management programme using Pentera BAS, Tenable.io, and AppCheck, providing continuous risk visibility and driving measurable reductions in critical findings.
- Led the university's Cyber Essentials Plus certification programme, coordinating cross-team remediation and achieving a successful first-time pass.
- Built and maintained BeyondTrust PAM governance processes for privileged accounts, reducing the attack surface from unmanaged administrative credentials across the institution.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
