

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike, SIEM/SOAR, EDR, Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a senior cyber security engineer with over five years of hands-on experience managing enterprise security infrastructure, including Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) tooling, firewalls, Multi-Factor Authentication (MFA) and Single Sign-On (SSO) solutions, Mobile Device Management (MDM) and Mobile Application Management (MAM) platforms, and vulnerability management programmes. I have led the deployment and day-to-day management of CrowdStrike Falcon across a large-scale environment, administered Mimecast email security, and engineered identity controls using Microsoft Entra ID (formerly Azure Active Directory) and Conditional Access. I bring deep experience in incident response, security gateway management, and driving measurable security improvements within complex, regulated organisations. I hold the Certified Information Systems Security Professional (CISSP) certification and am comfortable working in hybrid environments with regular on-site presence in London.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) - expert-level administration and engineering
- **SIEM/SOAR:** Microsoft Sentinel, CrowdStrike NG-SIEM, SOAR automation and playbook development, alert triage and tuning
- **Email Security:** Mimecast email gateway management, policy configuration, impersonation protection
- **Endpoint and Device Management:** Microsoft Intune (MDM/MAM), Microsoft Defender for Endpoint (MDE), Tanium
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, MFA, SSO, BeyondTrust Privileged Access Management (PAM)
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Firewall and Network Security:** Check Point Harmony firewall, WAF/DDoS security gateway management
- **Microsoft Security Stack:** Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender, Microsoft Defender for Cloud Apps
- **Scripting and Automation:** PowerShell scripting, SOAR playbook automation, KQL query writing
- **Incident Response:** NIST SP 800-61 Incident Response lifecycle, MITRE ATT&CK framework, threat hunting, detection engineering
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Manage and engineer the organisation's SIEM/SOAR/EDR stack including Microsoft Sentinel and CrowdStrike Falcon, maintaining alerting pipelines, detection rules, and automated response playbooks across an 8,000-user environment.
- Administer CrowdStrike Falcon EDR (Prevent, Insight, Discover, NG-SIEM), including sensor deployment, policy management, and ongoing tuning to reduce false positives and improve detection fidelity.
- Manage Mimecast email security gateway, configuring anti-phishing, impersonation protection, and data loss prevention policies to protect the institution's email infrastructure.
- Engineer and enforce identity security controls using Microsoft Entra ID, Conditional Access policies, MFA, and SSO, ensuring least-privilege access across the hybrid environment.
- Oversee Microsoft Intune MDM/MAM policies governing managed and Bring Your Own Device (BYOD) endpoints, ensuring compliance with organisational security standards.

- Lead vulnerability management activities using Tenable.io and Pentera BAS, prioritising remediation through risk-based scoring and coordinating patch cycles with infrastructure teams.
- Investigate and respond to security incidents following the NIST SP 800-61 incident response lifecycle, applying MITRE ATT&CK to identify adversary tactics, techniques, and procedures (TTPs).
- Manage WAF and security gateway controls to protect web-facing assets against DDoS and application-layer attacks.
- Administer BeyondTrust PAM to control privileged access, enforce session recording, and reduce the organisation's privileged attack surface.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Monitored and triaged security alerts from SIEM and EDR platforms, escalating confirmed incidents and coordinating containment and remediation activities.
- Configured and maintained CrowdStrike Falcon EDR policies, including real-time response rules and detection tuning to align with emerging threat intelligence.
- Supported the deployment and optimisation of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the university's user population.
- Administered Mimecast email filtering policies and responded to phishing and Business Email Compromise (BEC) incidents, coordinating with end users and leadership.
- Managed Entra ID and Azure AD Conditional Access policies, supporting MFA rollout and SSO integrations with third-party applications.
- Conducted vulnerability scans using Nessus and AppCheck, produced risk-based remediation reports, and tracked remediation progress against agreed service level agreements (SLAs).
- Administered Microsoft Intune MDM/MAM policies and supported the organisation's Mobile Device Management programme for 8,000 users.
- Contributed to the organisation's Check Point Harmony firewall administration and security gateway configuration.
- Supported BeyondTrust PAM implementation, onboarding privileged accounts and enforcing session management controls.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security engineering and infrastructure support within a cloud-native Software as a Service (SaaS) FinTech environment, supporting secure development and operational practices.
- Configured and managed MDM and endpoint security tooling, enforcing device compliance and access controls across a remote-first workforce.
- Supported identity and access management processes including MFA and SSO configuration for internal and client-facing systems.
- Administered vulnerability scanning tools and coordinated remediation activities with development and infrastructure teams.
- Contributed to the design and implementation of security quality assurance processes aligned with ISO 27001 principles.

KEY ACHIEVEMENTS

- Engineered and deployed CrowdStrike Falcon EDR across an 8,000-user institution, significantly improving endpoint visibility and threat detection capability.
- Delivered full Microsoft Defender suite deployment (MDE, MDI, M365 Defender) across 8,000 users, consolidating endpoint, identity, and email threat protection into a unified security operations workflow.
- Designed and implemented SOAR automation playbooks that reduced mean time to respond (MTTR) to security incidents by automating triage, containment, and notification workflows.
- Led Tenable.io and Pentera BAS vulnerability management programme, achieving consistent reduction in critical and high-severity vulnerabilities through risk-based remediation tracking.
- Implemented BeyondTrust PAM controls covering privileged account lifecycle management and session recording, eliminating uncontrolled privileged access within the environment.

- Developed KQL-based detection rules in Microsoft Sentinel aligned with MITRE ATT&CK to improve detection of identity-based and lateral movement threats.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
