

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR, SIEM/SOAR, Email Security, PAM, Identity and Access Management

United Kingdom (Hybrid/London) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with over five years of experience in senior cyber security engineering roles, specialising in the hands-on management and operational security of diverse enterprise security tooling. I have deep, expert-level experience deploying and managing the CrowdStrike Falcon endpoint detection and response (EDR) platform, including building a hybrid SOC from the ground up, and I am highly proficient across the full cyber security infrastructure stack — WAF, web and email security gateways, SIEM/SOAR/EDR, firewalls, IDS/IPS, MFA/SSO, MDM/MAM, privileged access management (PAM), and vulnerability scanning. I have extensive hands-on experience with Mimecast email security and continuity, Microsoft Intune MDM and MAM, BeyondTrust PAM, Microsoft Entra ID (formerly Azure Active Directory) Conditional Access, and enterprise vulnerability management using Tenable.io and breach attack simulation tools. I am experienced in delivering security awareness training, remediating penetration test findings, and contributing to ad-hoc security improvement projects. I thrive in focused, high-ownership security teams where operational rigour, technical depth, and broad coverage are valued, and I am well suited to a senior security engineering position within a regulated financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) — expert level; deployed from the ground up and built hybrid SOC capability; Microsoft Defender for Endpoint (MDE); Microsoft 365 Defender (XDR)
- **SIEM/SOAR:** Microsoft Sentinel (KQL, analytics rules, SOAR playbooks, workbooks, data connectors); CrowdStrike NG-SIEM; Splunk/SPL
- **Email Security Gateways:** Mimecast email security and continuity — policy management, anti-phishing, anti-malware, data loss prevention, and email continuity
- **WAF and Web Security:** Web application firewall policy management and web gateway controls; DDoS mitigation concepts
- **Firewall and Network Security:** Check Point Harmony firewall; IDS/IPS management and alert tuning; network security monitoring and anomaly investigation
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory — Conditional Access policies, MFA/SSO configuration, identity governance; Group Policy; Duo/Okta MFA (conceptual and operational familiarity)
- **Privileged Access Management (PAM):** BeyondTrust PAM platform — privileged account governance, session recording, just-in-time access
- **Mobile Device and Application Management (MDM/MAM):** Microsoft Intune — device enrolment, compliance policies, app protection policies, mobile security configuration; Tanium endpoint management
- **Vulnerability Management:** Tenable.io; AppCheck; Nessus; Pentra Breach and Attack Simulation (BAS) — programme management, coordinated remediation, MTTR reporting
- **Security Certifications and Certificates Management:** PKI and certificate lifecycle management concepts; security certificate renewal and governance
- **Security Awareness Training:** Phishing simulation design and delivery; security awareness programme management (KnowBe4-style campaigns)
- **Scripting and Automation:** PowerShell scripting; SOAR playbook development; Microsoft Sentinel automated response
- **Security Frameworks:** NIST Cybersecurity Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials+; MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)
Senior Cyber Security Analyst / Engineer

March 2025 - Present

- Manage and operate CrowdStrike Falcon EDR and Microsoft Defender for Endpoint (MDE) across the full 8,000-user estate, including alert triage, platform tuning, detection rule authoring, and threat investigation
- Operate and maintain Mimecast email security gateway, configuring and enforcing anti-phishing, anti-malware, attachment sandboxing, and data loss prevention policies to protect against email-borne threats
- Manage Microsoft Entra ID Conditional Access policies, MFA/SSO configuration, and identity governance, ensuring compliant and secure access across the estate
- Administer Microsoft Intune MDM/MAM platform, managing device enrolment profiles, compliance policies, mobile application management, and endpoint security configurations
- Govern BeyondTrust privileged access management (PAM) platform, controlling access to privileged accounts and critical systems, and managing session monitoring and just-in-time access workflows
- Manage firewall (Check Point Harmony), IDS/IPS, and web gateway controls; monitor alerts and anomalies across network and perimeter layers and tune policies to reduce exposure
- Oversee enterprise vulnerability management programme using Tenable.io, AppCheck, and Pentera BAS; manage scan scheduling, finding triage, and remediation coordination with technical owners
- Serve as senior incident escalation lead; manage complex incidents end-to-end in line with NIST 800-61; author and maintain incident response playbooks
- Design and deliver security awareness training and phishing simulation campaigns, tracking engagement metrics and adjusting programme content based on outcomes
- Remediate penetration test findings in coordination with technical teams, tracking each finding to closure and reporting status to senior security leadership

University of the Arts, London (UAL)
Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed and managed CrowdStrike Falcon EDR platform from initial architecture through to full hybrid SOC operational capability, establishing the organisation's endpoint detection and response function
- Operated Mimecast email gateway, managing policies to protect against phishing, malware, impersonation, and data exfiltration via email
- Administered BeyondTrust PAM controls and Microsoft Intune MDM/MAM profiles, ensuring consistent privileged access governance and secure endpoint provisioning
- Managed Microsoft Entra ID (Azure Active Directory) including Conditional Access, MFA, and SSO; maintained Group Policy configurations and identity security posture across the estate
- Performed day-to-day SIEM alert triage and investigation in Microsoft Sentinel and CrowdStrike NG-SIEM, escalating incidents in accordance with defined playbooks
- Conducted vulnerability scanning using Tenable.io and Nessus, reporting findings to technical owners and tracking remediation to closure
- Contributed to security awareness training delivery and supported ISO 27001 and Cyber Essentials+ compliance activities

HICX Solutions Ltd (SaaS/FinTech)
IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Managed endpoint security tooling, Check Point Harmony firewall, and IDS/IPS controls in a SaaS/FinTech security environment, providing broad operational coverage across the infrastructure
- Managed MDM/MAM device provisioning and MFA/SSO configuration; maintained secure access controls for a distributed, cloud-first workforce
- Conducted SIEM monitoring, alert triage, and incident escalation; supported vulnerability scanning, patch management, and remediation tracking
- Contributed to penetration test finding remediation and ISO 27001 compliance activities, providing security requirements during change initiatives

KEY ACHIEVEMENTS

- Deployed and built the CrowdStrike Falcon NG-SIEM and EDR platform from the ground up, establishing a hybrid SOC environment at UAL from initial architecture to full operational capability — now the

organisation's primary endpoint security and detection platform

- Led the 8,000-user Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) rollout, providing comprehensive XDR coverage across UAL's estate
- Designed and maintained Microsoft Sentinel workspace, data connectors, analytics rules, and SOAR playbooks, enabling automated detection and response across the full security estate
- Delivered enterprise vulnerability management programme integrating Pentera BAS, Tenable.io, and AppCheck, directly reducing the attack surface and driving MTTR improvements for critical and high-severity findings
- Authored enterprise incident response playbooks and served as senior escalation lead, consistently reducing mean time to respond for complex security incidents across the organisation

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
