PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | EDR | Incident Response | Entra ID

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience protecting large-scale enterprise environments using industry-leading security platforms including CrowdStrike Falcon, Microsoft Sentinel, and Microsoft Defender. I have deep expertise across the full Security Operations Centre (SOC) function: from owning Security Information and Event Management (SIEM) and Security Orchestration Automation and Response (SOAR) platforms, delivering Endpoint Detection and Response (EDR), conducting threat hunting, and leading major incident response. I have extensive experience with identity security using Microsoft Entra ID (formerly Azure Active Directory) and Privileged Access Management (PAM), as well as firewall management, vulnerability management, and automation through PowerShell scripting. I thrive in close-knit, high-impact security teams where I can take ownership of technology and process and drive measurable improvements in detection and response capability.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, CrowdStrike Falcon EDR, CrowdStrike Falcon Insight, CrowdStrike Falcon Discover, CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), Microsoft Defender for Endpoint (MDE)
- **SIEM and SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel with Kusto Query Language (KQL), Splunk / Search Processing Language (SPL), detection rule authoring, alert tuning, automated playbooks
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM), Privileged Identity Management (PIM)
- **Incident Response:** Major incident coordination, NIST 800-61 framework, MITRE ATT&CK, digital forensics, threat containment and eradication, post-incident review
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS), risk-based prioritisation
- **Network and Perimeter Security:** Check Point Harmony firewall, WAF/DDoS management, network segmentation, firewall rule management
- **Scripting and Automation:** PowerShell, SOAR playbook development, automated triage workflows
- **Email Security:** Mimecast email security platform, phishing detection and investigation
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) *March 2025 - Present*

Senior Cyber Security Analyst / Engineer

- Operate and optimise CrowdStrike Falcon across its full platform suite including Falcon Prevent, Falcon EDR, Falcon Insight, Falcon Discover, and Falcon NG-SIEM to protect over 8,000 users and associated endpoints.
- Author and maintain SIEM detection rules and SOAR automated playbooks in both CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, using KQL and SPL, to improve detection fidelity and automate tier-1 response actions.
- Lead the response to major cyber security incidents in line with the NIST 800-61 framework, directing cross-functional teams, communicating with senior leadership, and driving post-incident reviews and lessons-learned processes.
- Conduct proactive threat hunting exercises using the MITRE ATT&CK framework, correlating telemetry across EDR, identity, and network data sources to detect adversary activity that evades automated rules.
- Manage identity security controls across Microsoft Entra ID, including Conditional Access policy design and enforcement, Privileged Identity Management (PIM), and MFA coverage reviews.

- Administer BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access controls for administrative accounts across infrastructure and cloud systems.
- Own the vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), conducting risk-based prioritisation and coordinating remediation with technical teams.
- Manage Check Point Harmony firewall policies, reviewing and enforcing network segmentation controls and investigating firewall-generated security events.
- Develop PowerShell scripts to automate security operations tasks, including threat intelligence enrichment, user account suspension workflows, and automated alert enrichment for the SIEM.

University of the Arts, London (UAL) *March 2022 - March 2025*

Cyber Security Analyst, Cyber Security and Identity

- Deployed, configured, and administered CrowdStrike Falcon EDR and Falcon Prevent across the full device estate, establishing endpoint visibility and real-time threat prevention capabilities for 8,000+ devices.
- Performed daily SIEM alert triage and investigation across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, escalating confirmed incidents and owning investigation and containment for tier-2 events.
- Administered Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), configuring detection policies and responding to alerts across the Microsoft 365 (M365) security stack.
- Managed Microsoft Entra ID (Azure AD) security controls including Conditional Access, MFA enforcement, and privilege reviews, ensuring identity security compliance across the organisation.
- Administered BeyondTrust Privileged Access Management (PAM), conducting regular access reviews and ensuring administrative credential security.
- Operated Mimecast email security platform, tuning anti-phishing, anti-spam, and malware detection policies, and leading investigations into email-borne threats.
- Managed firewall rule sets using Check Point Harmony, maintaining network segmentation controls and reviewing inbound and outbound traffic policies.
- Conducted vulnerability assessments using Tenable.io and AppCheck, producing risk-prioritised reports and tracking remediation with engineering and infrastructure teams.
- Contributed to security policy development and supported ISO 27001 and Cyber Essentials+ compliance activities.

HICX Solutions Ltd (SaaS/FinTech) *February 2021 - March 2022*

IT Engineer: Security, Quality and Infrastructure

- Administered endpoint security tooling and device management using Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing security baselines across the corporate estate.
- Supported vulnerability scanning and patch management using Nessus, identifying and remediating security weaknesses across servers, endpoints, and cloud infrastructure.
- Managed identity and access controls, including user provisioning, role-based access reviews, and MFA deployment to reduce the risk of credential-based attacks.
- Assisted with SIEM monitoring and alert triage, investigating security events and escalating incidents to senior analysts.
- Contributed to ISO 27001 and Cyber Essentials+ compliance activities, supporting risk assessments and audit preparation.
- Collaborated with development teams to embed security into software delivery, conducting security configuration reviews and supporting secure coding practices.

KEY ACHIEVEMENTS

- Expert-level deployment and administration of CrowdStrike Falcon across its full platform suite (EDR, Prevent, Insight, Discover, NG-SIEM) for a complex, multi-site organisation with over 8,000 endpoints.
- Reduced SIEM alert noise by over 40% through systematic detection rule tuning across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, improving analyst efficiency and reducing false positive fatigue.
- Led incident response to multiple high-severity events including ransomware intrusions and business email compromise (BEC) attempts, achieving containment before material data exfiltration occurred.
- Developed a PowerShell-based SOAR automation suite that reduced manual triage time for common alert types by an estimated 60%, freeing analysts for higher-value investigative work.

- Achieved and maintained CISSP certification alongside a strong portfolio of vendor certifications including CompTIA Security+ and MCSA, demonstrating sustained commitment to professional development.
- Improved mean time to detect (MTTD) and mean time to respond (MTTR) through continuous detection engineering work, including threat-led rule development aligned to the MITRE ATT&CK framework.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
