

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Incident Response | PAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience in enterprise security operations, endpoint protection, and infrastructure security. I specialise in CrowdStrike Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM)/Security Orchestration, Automation and Response (SOAR) platforms, and comprehensive incident response. I have expert-level proficiency with CrowdStrike Falcon across Prevent, Insight, Discover and Next-Generation SIEM (NG-SIEM) modules, and strong experience managing web and email security gateways including Mimecast, Web Application Firewall (WAF)/Distributed Denial of Service (DDoS) protection, Multi-Factor Authentication (MFA)/Single Sign-On (SSO), Mobile Device Management (MDM)/Mobile Application Management (MAM) via Microsoft Intune, Privileged Access Management (PAM) via BeyondTrust, and Intrusion Detection System (IDS)/Intrusion Prevention System (IPS) solutions. I have successfully deployed and managed CrowdStrike EDR and the full Microsoft security stack across an 8,000-user environment, led vulnerability scan programmes and remediation of penetration test findings, and delivered security awareness training that measurably reduced organisational risk.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon:** EDR/Prevent, NG-SIEM, Insight, Discover (Expert-level deployment, tuning, and alert response)
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), alert triage, detection engineering, automated playbooks
- **Microsoft Defender:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), M365 Defender
- **Email and Web Security Gateways:** Mimecast, WAF/DDoS protection
- **MFA/SSO:** Microsoft Entra ID (formerly Azure Active Directory/Azure AD), Conditional Access, MFA, SSO
- **MDM/MAM:** Microsoft Intune (device compliance, mobile application policies)
- **PAM:** BeyondTrust Privileged Access Management
- **Firewalls and IDS/IPS:** Check Point Harmony, IDS/IPS configuration and monitoring
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentra Breach and Attack Simulation (BAS)
- **Incident Response:** NIST 800-61, MITRE ATT&CK Framework, containment, eradication, recovery
- **Security Awareness Training:** Phishing simulations, staff training programme delivery
- **Scripting and Automation:** PowerShell, SOAR playbook development
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

- Senior Cyber Security Analyst/Engineer, University of the Arts, London (UAE) – March 2025 – Present
- Manage CrowdStrike EDR across the enterprise estate, including Prevent, Insight, and Discover modules, optimising detection policies and alert response workflows
 - Manage SIEM/SOAR operations using Microsoft Sentinel with KQL, building and maintaining detection rules, alert correlation logic, and automated SOAR playbooks aligned to the MITRE ATT&CK framework
 - Administer Mimecast email security gateway, configuring anti-phishing, anti-spoofing, URL scanning, and malware detection policies to protect against email-borne threats
 - Oversee MFA/SSO implementation via Microsoft Entra ID and Conditional Access policies, enforcing Zero Trust access controls across an 8,000-user environment
 - Manage Microsoft Intune for MDM/MAM, enforcing device compliance, mobile application policies, and endpoint configuration across the user estate

- Maintain BeyondTrust Privileged Access Management (PAM) to govern and audit privileged access to critical systems and infrastructure
- Operate IDS/IPS solutions for network-based threat detection and prevention, tuning alert thresholds and response procedures
- Lead incident response in alignment with NIST 800-61, coordinating investigation, containment, eradication, and recovery activities across security incidents
- Deliver vulnerability scanning programmes using Tenable.io, AppCheck, and Nessus, prioritising findings and tracking remediation of penetration test results to closure
- Manage WAF/DDoS protection configurations to defend public-facing web infrastructure against application-layer and volumetric attacks
- Deliver security awareness training programmes, including phishing simulations, to drive measurable improvements in staff risk behaviours
- Remediate penetration test findings and contribute to ad hoc security projects, infrastructure improvements, and policy development

Cyber Security Analyst, Cyber Security and Identity, University of the Arts London (UAL)
 Implemented and maintained endpoint security controls, security monitoring, and MDM policies, and supporting threat hunting activities
March 2022 - March 2025

- Managed Microsoft Sentinel SIEM for security event monitoring, alert triage, and incident investigation using KQL queries and custom detection rules
- Configured and maintained Mimecast email security gateway policies, including anti-phishing, impersonation protection, and malware scanning
- Supported MFA and SSO implementation via Azure Active Directory (now Microsoft Entra ID) and Conditional Access, onboarding applications and enforcing access policies
- Conducted vulnerability assessments using Tenable.io and Nessus, supporting remediation tracking and penetration test finding closure
- Managed Microsoft Intune MDM/MAM policies, ensuring device compliance across the estate
- Supported BeyondTrust PAM operations, managing privileged account provisioning and access reviews
- Contributed to incident response investigations, assisting with containment and post-incident analysis activities
- Supported security awareness training delivery and phishing simulation campaigns across the university community
- Contributed to the Cyber Essentials+ certification programme, ensuring controls coverage across vulnerability management, patch management, MFA, and firewall areas

IT Engineer, Security, Quality and Infrastructure, HCL Solutions Ltd (SaaS/FinTech)
 Implemented and maintained endpoint security controls, security monitoring, and MDM policies across cloud-hosted Software as a Service (SaaS) infrastructure
February 2021 - March 2022

- Managed firewall policies and web security gateway configurations to protect the corporate network perimeter
- Supported MFA deployment, access management provisioning, and security compliance monitoring
- Conducted vulnerability assessments and assisted with remediation activities across internal and cloud-hosted systems
- Contributed to quality assurance processes and infrastructure improvement projects

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon EDR across an 8,000-user estate, significantly improving endpoint threat detection and response capability across Windows, macOS, and mobile endpoints
- Built and operationalised Microsoft Sentinel SIEM with KQL detection rules aligned to the MITRE ATT&CK framework, reducing time to detect and respond to threats
- Achieved and maintained Cyber Essentials+ certification at UAL by leading the end-to-end compliance programme covering vulnerability management, patch management, MFA, firewall, and MDM controls
- Automated SIEM/SOAR incident response playbooks, reducing mean time to respond by streamlining alert triage and response workflows for high-volume security events
- Led remediation of penetration test findings across the UAL environment, reducing the organisation's attack surface and improving overall security posture

- Delivered security awareness training and phishing simulation campaigns that measurably improved staff recognition of phishing and social engineering attacks

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
