

PROSPER AWUNI

Senior Cyber Security Analyst | SIEM | Incident Response | Threat Intelligence | Azure Cloud Security
| Hybrid, London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst with over five years of hands-on experience in network and endpoint security, incident response, threat intelligence and vulnerability management. I bring strong capability across Security Information and Event Management (SIEM) platforms, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) solutions, and Microsoft Azure cloud security technologies. I am experienced in communicating complex security findings and risk postures clearly and confidently to senior stakeholders and non-technical audiences, and I have delivered security operations across large enterprise environments where executive engagement and clear advisory support are essential. I hold the Certified Information Systems Security Professional (CISSP) certification and have a proven track record of aligning security operations with ISO 27001, NIST and Cyber Essentials Plus frameworks. I am well placed to bring my skills, professional approach and stakeholder communication experience to a demanding professional services environment.

CORE SKILLS AND TECHNICAL STACK

- **SIEM Platforms:** Microsoft Sentinel (Kusto Query Language / KQL detection rule authoring and tuning), CrowdStrike NG-SIEM, security event monitoring and alert analysis
- **EDR/XDR Solutions:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 (M365) Defender
- **Incident Response (IR):** End-to-end IR lifecycle management aligned with NIST 800-61, from detection and containment through eradication, recovery and post-incident review
- **Threat Intelligence and Threat Hunting:** Proactive hunting using MITRE ATT&CK framework, threat actor profiling, Indicators of Compromise (IoC) analysis
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS); risk-based prioritisation and remediation tracking
- **Microsoft Azure Cloud Security:** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, MFA, Single Sign-On (SSO), Zero Trust architecture
- **Network Security:** Firewalls (Check Point Harmony), IDS/IPS, web security gateways, network segmentation and monitoring
- **Privileged Access Management (PAM):** BeyondTrust PAM; least-privilege access enforcement and privileged account governance
- **Scripting and Automation:** PowerShell scripting, SOAR playbook development and automation
- **Identity and Access Management (IAM):** Entra ID, Conditional Access, MFA/SSO; MDM/MAM via Microsoft Intune
- **Frameworks:** NIST CSF, ISO 27001, CIS Controls, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Lead Security Information and Event Management (SIEM) operations using Microsoft Sentinel, authoring and continuously tuning KQL detection rules to identify advanced threats and reduce false positive rates across a complex, multi-site enterprise environment
- Manage Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) operations using CrowdStrike Falcon and Microsoft Defender for Endpoint (MDE) across 8,000+ users, overseeing policy configuration, alert investigation and response coordination
- Lead end-to-end incident response engagements aligned with NIST 800-61, directing detection, containment, eradication and recovery activities while providing timely briefings and advisory support to

senior leadership and non-technical stakeholders

- Conduct proactive threat hunting operations using CrowdStrike Falcon Insight and the MITRE ATT&CK framework, identifying hidden threats and improving detection coverage ahead of adversarial activity
- Manage vulnerability management operations using Tenable.io and Pentera BAS, performing risk-based prioritisation and tracking remediation to reduce the organisational attack surface in line with CIS Controls
- Administer Microsoft Azure cloud security including Microsoft Entra ID, Conditional Access policies and MFA/SSO controls, enforcing a Zero Trust security model across on-premises and cloud-connected systems
- Manage network security controls including firewalls, IDS/IPS and web security gateway policies, tuning rulesets and monitoring network traffic for anomalous behaviour
- Oversee identity and access management, including Privileged Access Management (PAM) using BeyondTrust, ensuring least-privilege access and audit-ready governance
- Deliver technical security briefings and present risk posture reports to senior stakeholders, translating complex threats into clear business-relevant recommendations
- Manage Mimecast email security gateway operations, maintaining threat intelligence integration and responding to phishing campaigns and business email compromise threats
- Support compliance activities aligned with ISO 27001 and Cyber Essentials Plus, maintaining documentation and evidence for audit and governance purposes

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Performed daily threat monitoring and SIEM alert analysis using Microsoft Sentinel, investigating security events across network and endpoint layers and applying MITRE ATT&CK-based threat intelligence to accelerate triage and response
- Managed security incidents from initial detection through to post-incident review, coordinating cross-functional response teams and producing clear post-incident reports with actionable recommendations for senior management
- Deployed and configured CrowdStrike Falcon EDR across the full UAL estate, establishing detection policies, response playbooks and proactive hunting workflows to improve security posture
- Managed vulnerability assessment operations using Tenable.io and Nessus, identifying and tracking remediation of vulnerabilities across on-premises and cloud environments in coordination with infrastructure and application teams
- Administered Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) as part of the M365 Defender deployment across 8,000 users
- Managed Microsoft Entra ID (formerly Azure Active Directory) including Conditional Access policies, MFA rollout and privileged identity management within the Azure cloud security framework
- Administered BeyondTrust PAM to enforce privileged access governance and support internal and external audit requirements
- Maintained firewall and IDS/IPS rulesets and conducted network traffic analysis to detect anomalous or malicious activity
- Conducted threat intelligence research and fed findings into detection rule improvements and security awareness communications for staff

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS/FinTech)

- Managed security and infrastructure operations for a Software-as-a-Service (SaaS) FinTech platform, delivering endpoint security, network access controls and system administration across a hybrid cloud environment
- Conducted internal security assessments and supported ISO 27001 and Cyber Essentials compliance activities, preparing evidence and responding to audit queries
- Managed Microsoft Azure cloud infrastructure including Active Directory, network security groups and role-based access controls
- Identified and remediated security vulnerabilities across web and internal systems, maintaining a proactive security posture in a fast-paced SaaS environment

KEY ACHIEVEMENTS

- Authored and tuned KQL-based detection rules in Microsoft Sentinel, improving threat detection fidelity and reducing false positive rates for a large enterprise SIEM operation
- Led the deployment and operational management of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across 8,000 users, strengthening endpoint and identity threat detection
- Deployed CrowdStrike Falcon EDR across UAL's 8,000-user estate, establishing comprehensive endpoint visibility and detection and response capabilities from the ground up
- Led the incident response lifecycle for multiple high-severity security incidents, achieving containment and full recovery with clear executive communications throughout
- Implemented SOAR automation playbooks that reduced manual analyst effort in alert triage and accelerated response timescales for common threat scenarios
- Delivered risk-based vulnerability management using Pentera BAS and Tenable.io, enabling measurable and continuous attack surface reduction aligned with CIS Controls
- Achieved and maintained Cyber Essentials Plus certification for UAL, meeting and evidencing compliance across all five core technical control areas
- Hold the Certified Information Systems Security Professional (CISSP) certification, providing a strong foundation across all eight security domains including security governance, risk management and incident response

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
