

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Infrastructure Security | Hybrid,
London

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of hands-on experience implementing, maintaining, and hardening enterprise security across global infrastructure. I bring deep expertise in Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) operations using CrowdStrike Falcon, alongside strong capability across Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms. I have managed email and web security gateways including Mimecast, enterprise firewall infrastructure, identity and access management, Mobile Device Management (MDM) and Mobile Application Management (MAM), Privileged Access Management (PAM), and vulnerability management programmes across complex multi-site environments. I hold the Certified Information Systems Security Professional (CISSP) certification and thrive in high-impact, operationally focused security teams where technical ownership, continuous improvement, and cross-functional collaboration are valued.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, NG-SIEM) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, SOAR automation and playbook development
- **Email and Web Security:** Mimecast (gateway configuration, threat intelligence, phishing response)
- **Firewall and Network Security:** Check Point Harmony, enterprise gateway management, WAF/DDoS, IDS/IPS, network segmentation
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust PAM
- **MDM/MAM:** Microsoft Intune, device compliance policy enforcement
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS)
- **Scripting and Automation:** PowerShell, SOAR playbook automation
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK, NIST 800-61
- **Cloud Security:** Microsoft Azure, Entra ID, Microsoft 365 (M365) security suite

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Hold technical ownership of EDR and XDR operations using CrowdStrike Falcon across an enterprise environment of 8,000+ users, overseeing policy configuration, alert triage, threat containment and incident escalation
- Manage and optimise SIEM and SOAR platforms including Microsoft Sentinel, authoring KQL detection rules and building automated response playbooks that reduce mean time to detect and respond across the security operations function
- Oversee email and web security gateway operations via Mimecast, maintaining content policies, threat intelligence integration and phishing response workflows to protect against advanced persistent threats
- Implement and harden identity security controls including MFA and SSO through Microsoft Entra ID and Conditional Access, aligned with Zero Trust architecture principles
- Administer MDM and MAM via Microsoft Intune, enforcing device compliance policies across corporate and bring-your-own-device (BYOD) fleets

- Drive vulnerability management operations using Tenable.io and Pentera Breach and Attack Simulation (BAS), prioritising and tracking remediation activities to continuously reduce the organisational attack surface
- Manage PAM infrastructure using BeyondTrust, enforcing least-privilege access controls across all administrative and privileged accounts
- Manage Intrusion Detection and Prevention System (IDS/IPS) configurations and monitor network security events, tuning rulesets to minimise false positives
- Oversee security certificate lifecycle management and governance, maintaining audit-ready documentation
- Deliver security awareness training programmes to staff at all organisational levels, increasing phishing reporting rates and reducing user risk
- Lead remediation of penetration testing findings and manage relationships with external testing partners, closing identified vulnerabilities within agreed remediation timescales
- Contribute to ad-hoc security projects including infrastructure hardening reviews, security architecture assessments and policy development

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Managed day-to-day SIEM alert triage and investigation using Microsoft Sentinel, applying MITRE ATT&CK techniques to identify, investigate and contain security threats across the enterprise
- Led end-to-end security incident management following the NIST 800-61 Incident Response (IR) lifecycle, coordinating detection, containment, eradication, recovery and post-incident review activities
- Deployed and configured CrowdStrike Falcon EDR to protect the full UAL user estate, establishing baseline detection policies, response playbooks and proactive threat hunting capabilities using CrowdStrike Falcon Insight
- Managed vulnerability assessment operations using Tenable.io and Nessus, coordinating remediation with infrastructure and application teams to reduce exposure across on-premises and cloud environments
- Administered Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the full user population, supporting deployment of Microsoft 365 Defender across 8,000 users
- Managed Microsoft Entra ID (formerly Azure Active Directory) access controls, Conditional Access policies and MFA rollout as part of an identity and access management programme
- Maintained and tuned firewall and web gateway security controls, reviewing rulesets and applying hardening recommendations to reduce threat exposure
- Administered BeyondTrust PAM to secure privileged account access and support compliance audit requirements
- Supported security certificate management and coordinated remediation of findings from third-party penetration tests

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (SaaS/FinTech)

- Managed security and infrastructure operations for a Software-as-a-Service (SaaS) FinTech platform, overseeing endpoint security, network controls and system administration across hybrid environments
- Implemented and maintained endpoint security policies, MDM configurations and network access controls across corporate infrastructure
- Conducted internal security assessments and quality assurance reviews, supporting ISO 27001 and Cyber Essentials compliance activities
- Managed Microsoft Azure cloud and on-premises infrastructure, including Active Directory, network security groups and access controls
- Administered security tools and managed vulnerability remediation across web and internal systems

KEY ACHIEVEMENTS

- Successfully deployed CrowdStrike Falcon EDR to protect an 8,000-user enterprise environment at UAL, establishing comprehensive endpoint visibility, detection and automated response capabilities
- Authored and tuned KQL-based detection rules in Microsoft Sentinel, improving threat detection fidelity and measurably reducing false positive alert rates across the SIEM platform

- Led deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across 8,000 users, consolidating endpoint and identity protection within the Microsoft security ecosystem
- Designed and implemented SOAR automation playbooks that streamlined alert triage and incident response, reducing analyst manual effort and accelerating containment timescales
- Managed a proactive vulnerability management programme using Pentera BAS and Tenable.io, enabling continuous risk reduction aligned with CIS Controls and the NIST Cybersecurity Framework (NIST CSF)
- Achieved and maintained Cyber Essentials Plus certification for UAL, demonstrating a strong security baseline across all five technical controls
- Hold the Certified Information Systems Security Professional (CISSP) certification, demonstrating advanced knowledge across all eight security domains

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
