

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon Expert | SOC Operations | SIEM Engineering

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience leading endpoint security strategy and Security Operations Centre (SOC) operations, with expert-level proficiency in CrowdStrike Falcon across the full platform suite including Falcon Prevent, Falcon Insight, Falcon Discover, Falcon EDR (Endpoint Detection and Response), and CrowdStrike Next-Generation Security Information and Event Management (NG-SIEM). I have a proven track record of overseeing the deployment, configuration, and ongoing optimisation of CrowdStrike Falcon at enterprise scale, training and upskilling security teams in CrowdStrike, and collaborating with managed SOC partners to design and enhance dashboards, alert logic, and data models. I bring solid Splunk experience for security telemetry analysis and serve as the senior escalation point for high-severity incidents requiring deep platform and threat expertise. My five-plus years of hands-on security engineering experience, combined with the Certified Information Systems Security Professional (CISSP) certification and strong incident response capability aligned to NIST 800-61, equip me to lead a best-in-class endpoint and SOC security programme.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon (Expert):** Falcon Prevent | Falcon Insight | Falcon Discover | Falcon EDR | CrowdStrike NG-SIEM | Platform configuration, tuning, and deployment management | CrowdStrike threat hunting and alert analysis
- **SIEM and Analytics:** Microsoft Sentinel with Kusto Query Language (KQL) - Strong | Splunk / Security Processing Language (SPL) | Dashboard and alert design | Data model development | Log source onboarding and management
- **SOC Operations:** Security Operations Centre (SOC) partnership management | High-severity incident escalation and resolution | Alert triage and investigation | Detection content development and tuning
- **Incident Response:** NIST 800-61 incident response lifecycle | Threat monitoring and root-cause analysis | Containment, eradication, and recovery coordination | Post-incident reporting and lessons learned
- **Threat Hunting:** CrowdStrike Falcon Insight-based threat hunting | MITRE ATT&CK framework application | Indicator of Compromise (IoC) and Indicator of Attack (IoA) analysis
- **Endpoint Security:** Microsoft Defender for Endpoint (MDE) | Microsoft Defender for Identity (MDI) | Microsoft Intune (Mobile Device Management / Mobile Application Management)
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory) | Conditional Access | Multi-Factor Authentication (MFA) | BeyondTrust Privileged Access Management (PAM)
- **Scripting and Automation:** PowerShell | Kusto Query Language (KQL) | Security Orchestration, Automation and Response (SOAR) automation

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UAL) | Senior Cyber Security Analyst / Engineer | March 2025 - Present
- Spearheaded the implementation and continuous optimisation of CrowdStrike Falcon (Prevent, Insight, Discover, EDR) across the full enterprise environment.
 - Train and upskill security team colleagues in CrowdStrike Falcon platform operations, threat hunting techniques, and alert investigation methodology, elevating team capability in Endpoint Detection and Response (EDR).
 - Collaborate with the managed Security Operations Centre (SOC) partner to design and enhance Splunk dashboards, alert rules, and data models, ensuring actionable, high-fidelity telemetry from CrowdStrike Falcon.
 - Act as senior escalation point for high-severity incidents, leading investigation, containment, and recovery actions aligned to the NIST 800-61 incident response lifecycle.

- Manage Microsoft Sentinel Security Information and Event Management (SIEM), designing and maintaining Kusto Query Language (KQL) detection rules, analytics rules, and hunting queries.
- Develop and maintain Security Orchestration, Automation and Response (SOAR) playbooks, automating alert enrichment, triage, and incident response actions to reduce analyst workload and improve consistency.
- Conduct structured threat hunting using CrowdStrike Falcon Insight, applying MITRE ATT&CK-based hypotheses to proactively identify adversary activity within endpoint and network telemetry.
- Lead vulnerability management programme using Pentera Breach and Attack Simulation (BAS), Tenable.io, and AppCheck, tracking remediation of identified exposures to agreed timelines.

University of the Arts London (UAL) | Cyber Security Analyst, Cyber Security and Identity
 Implemented and managed endpoint protection and security monitoring controls within a Software as a Service (SaaS) and Financial Technology (FinTech) environment, supporting incident detection and operational security. *March 2022 - March 2025*

- Deployed and configured Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an estate of over 8,000 users, ensuring full endpoint and identity telemetry coverage for SOC detection.
- Conducted threat hunting operations within CrowdStrike Falcon Insight, applying MITRE ATT&CK techniques to generate hunt hypotheses and identify undetected adversary activity.
- Collaborated with the external managed SOC partner to review Splunk-based dashboard performance, alert coverage, and data source quality, proposing and implementing improvements to detection effectiveness.
- Maintained Microsoft Sentinel SIEM, monitoring security events across cloud and on-premises data sources and developing Kusto Query Language (KQL) queries to improve detection accuracy.
- Developed PowerShell automation scripts to streamline alert enrichment, endpoint investigation workflows, and security reporting tasks.

HCX Solutions Ltd (SaaS/FinTech) | IT Engineer - Security, Quality and Infrastructure
 Implemented and managed endpoint protection and security monitoring controls within a Software as a Service (SaaS) and Financial Technology (FinTech) environment, supporting incident detection and operational security. *February 2021 - March 2022*

- Contributed to security event monitoring, alert triage, and infrastructure hardening across a growing cloud-centric technology platform.
- Supported security policy development and quality assurance activities in line with industry security standards.

KEY ACHIEVEMENTS

- Expert-level CrowdStrike Falcon deployment and management: led enterprise-wide CrowdStrike rollout at UAL covering Falcon Prevent, Insight, Discover, and EDR modules, achieving comprehensive endpoint telemetry and threat visibility across the institution.
- Elevated team capability in CrowdStrike through structured knowledge transfer and training, improving the security team's ability to independently triage and investigate CrowdStrike alerts and conduct Falcon Insight-based threat hunts.
- Enhanced managed SOC partnership value by collaborating with the external provider to redesign Splunk dashboards, improve data model quality, and introduce new alert rules that reduced detection gaps and false-positive rates.
- Led Microsoft Defender for Endpoint (MDE) deployment across 8,000+ users, enabling comprehensive endpoint telemetry and dramatically improving high-severity incident detection speed and accuracy.
- Built SOAR automation playbooks that automated over 60% of routine alert enrichment tasks, enabling analyst effort to be redirected to higher-complexity threat investigations.
- Implemented Pentera Breach and Attack Simulation (BAS) programme, continuously validating CrowdStrike Falcon detection effectiveness and using results to drive targeted tuning improvements.

EDUCATION

- M.Sc. Environmental and Resource Engineering
 - B.Sc. Chemical Engineering
-

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
