PROSPER AWUNI

Senior Security Analyst | CrowdStrike Falcon Specialist | Incident Detection, Containment and Response

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Security Analyst with over five years of hands-on experience in security operations, incident detection, containment, remediation, and detection engineering. I have deep expert-level knowledge of the CrowdStrike Falcon platform, including Next-Generation Security Information and Event Management (NG-SIEM), Endpoint Detection and Response (EDR), Falcon Prevent, Insight, and Discover, making me well placed to contribute immediately to the Falcon Complete managed security service. I have led end-to-end incident response in line with NIST SP 800-61 methodology, performed threat hunting across Windows, macOS, and Linux environments, and built detection logic using MITRE ATT&CK. I have also investigated Microsoft 365 threats including Business Email Compromise (BEC) and adversary-in-the-middle (AiTM) attacks using Microsoft Defender for Identity (MDI) and Microsoft Defender for Office 365 (MDO). I am seeking a fully remote permanent Senior Analyst role at CrowdStrike where I can apply this expertise to protect customers at scale.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon Platform:** NG-SIEM, Falcon EDR/Prevent, Insight, Discover, Falcon Complete managed service concepts, CrowdStrike Query Language (CQL)
- **Incident Response:** End-to-end incident handling (NIST SP 800-61) across Advanced Persistent Threats (APTs), ransomware, BEC, and AiTM attacks; containment, remediation, and post-incident reporting
- **Threat Hunting and Detection Engineering:** Hypothesis-driven threat hunting, MITRE ATT&CK-aligned detection rule development, Kusto Query Language (KQL), behavioural analysis
- **Microsoft 365 Security:** MDI, MDE, Microsoft Defender for Office 365 (MDO), AiTM and BEC investigation, Microsoft Sentinel correlation rules
- **Endpoint and Platform Coverage:** Windows, macOS, Linux endpoint security operations; EDR telemetry analysis and malware behaviour assessment
- **Security Orchestration, Automation and Response (SOAR):** Automation playbook development, alert enrichment, automated containment actions
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus
- **Identity Security:** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, MFA, BeyondTrust Privileged Access Management (PAM)
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), NIST SP 800-61, CIS Controls, ISO/IEC 27001

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) | Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Lead incident detection, analysis, containment, and remediation across CrowdStrike Falcon NG-SIEM and EDR, handling a full range of threat categories including ransomware, phishing, credential theft, and lateral movement.
- Conduct in-depth analysis of CrowdStrike Falcon EDR and Microsoft Sentinel alerts, correlating telemetry across Windows, macOS, and Linux endpoints to triage and prioritise security events.
- Perform proactive threat hunting using CrowdStrike Falcon Insight and Discover, applying MITRE ATT&CK techniques to identify advanced threats not caught by automated detection.
- Develop and tune detection rules and SOAR automation playbooks, reducing mean time to respond (MTTR) by automating alert triage, enrichment, and containment actions.
- Investigate Microsoft 365 security incidents including BEC and AiTM attacks using MDI, Defender for Office 365, and Entra ID sign-in logs, applying remote remediation and stakeholder communication best practices.
- Conduct malware and behavioural analysis of suspicious binaries and scripts identified via EDR telemetry, documenting findings and providing clear guidance to IT teams and senior stakeholders.
- Mentor and support junior security analysts, providing technical guidance on investigation techniques and escalation procedures.

- Produce detailed incident reports and post-incident reviews, communicating findings and recommendations to both technical teams and senior management.

University of the Arts, London (UAL) | Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Performed continuous security monitoring and alert triage using CrowdStrike Falcon EDR and Microsoft Sentinel, escalating high-severity incidents in line with NIST SP 800-61 incident response procedures.
- Supported deployment and tuning of CrowdStrike Falcon Prevent and EDR across the enterprise, writing custom detection rules aligned to MITRE ATT&CK.
- Investigated phishing, BEC, and malware incidents affecting Microsoft 365, performing root cause analysis and remote remediation.
- Built SOAR automation playbooks integrating CrowdStrike, Microsoft Sentinel, and Mimecast to streamline phishing triage and account compromise response.
- Conducted vulnerability assessments using Nessus and Tenable.io, documenting and tracking remediation activities across the infrastructure estate.
- Participated in threat intelligence activities, reviewing indicators of compromise (IOCs) and translating threat intelligence into actionable detection improvements.

HICX Solutions Ltd (SaaS / FinTech) | IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Provided security operations support for a cloud-native SaaS environment, monitoring endpoint security alerts and responding to incidents across Windows and cloud platforms.
- Administered Azure Active Directory (Azure AD), managing user accounts, group policies, and Multi-Factor Authentication (MFA) enrolment for a distributed remote workforce.
- Supported vulnerability scanning and remediation coordination, ensuring timely resolution of critical findings.
- Assisted with network security monitoring, contributing to incident triage and security documentation.

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon EDR across an 8,000-user environment, achieving full endpoint telemetry coverage and materially reducing mean time to detect (MTTD) for endpoint-based threats.
- Developed SOAR automation playbooks that integrated CrowdStrike Falcon with Microsoft Sentinel and Mimecast, automating phishing triage and BEC containment and significantly reducing analyst manual workload.
- Built MITRE ATT&CK-aligned detection rules in CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, improving detection fidelity and reducing false positive rates across the Security Operations Centre (SOC).
- Led investigation and remediation of multiple high-severity security incidents including ransomware precursor activity and targeted phishing campaigns, communicating findings clearly to executive stakeholders.
- Established a continuous threat hunting programme using CrowdStrike Falcon Insight, proactively identifying dormant threats and reducing dwell time within the environment.

EDUCATION

- Master of Science (M.Sc.), Environmental and Resource Engineering
- Bachelor of Science (B.Sc.), Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
