

PROSPER AWUNI

Senior Cyber Operations Analyst

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Operations Analyst with over five years of experience in detection engineering, incident response, threat hunting, and Security Operations Centre (SOC) operations. I combine strong engineering instincts with deep practical knowledge of adversary tradecraft — enabling me to design, build, and tune detections that catch real-world attacks rather than surface noise. I am highly proficient with CrowdStrike Falcon Endpoint Detection and Response (EDR) and Next-Generation Security Information and Event Management (NG-SIEM), Microsoft Sentinel, and Kusto Query Language (KQL), and I have hands-on experience automating Security Orchestration, Automation, and Response (SOAR) workflows to accelerate triage and containment. I have served as senior escalation lead for complex security incidents across a large hybrid enterprise, conducting structured investigations using the NIST 800-61 and MITRE ATT&CK frameworks. I have coding and scripting capability in PowerShell and KQL, and I bring the kind of senior technical direction that raises the capability of the entire operations function around me.

CORE SKILLS AND TECHNICAL STACK

- **Detection Engineering:** SIEM and EDR detection rule authoring, tuning, and lifecycle management; MITRE ATT&CK-mapped detection coverage; false positive reduction; alert quality improvement
- **SOC Operations:** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover) — expert-level; Microsoft Sentinel; SOAR playbook design and automation; structured alert triage
- **Incident Response:** NIST 800-61 lifecycle; senior escalation lead; end-to-end incident investigation; post-incident review and lessons-learned reporting; playbook authoring
- **Threat Hunting:** Proactive hypothesis-driven hunting across endpoint, cloud, identity, and email telemetry; KQL-based hunting queries; MITRE ATT&CK adversary profiling
- **Adversary Tradecraft:** Understanding of attacker Tactics, Techniques, and Procedures (TTPs); threat intelligence integration; MITRE ATT&CK framework application
- **Scripting and Automation:** PowerShell, Kusto Query Language (KQL); SOAR automation workflow development
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Identity Security:** Microsoft Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), BeyondTrust Privileged Access Management (PAM)
- **Vulnerability Management:** Tenable.io, AppCheck, Pentera Breach and Attack Simulation (BAS), Nessus
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK, JISC

PROFESSIONAL EXPERIENCE

- University of the Arts London (UAL) — Senior Cyber Security Analyst / Engineer March 2025 – Present
- platforms: author, test, tune, and lifecycle-manage detection rules mapped to the MITRE ATT&CK framework, continuously improving detection quality and closing coverage gaps
- Serve as senior escalation lead for complex and high-severity cyber security incidents, conducting structured end-to-end investigations from initial detection through containment, eradication, and recovery, in line with NIST 800-61
 - Conduct proactive threat hunting across endpoint, cloud, identity, and email telemetry, leveraging KQL and CrowdStrike advanced queries to surface threat actor activity before it escalates into an incident
 - Design and maintain SOAR playbooks in CrowdStrike Falcon Fusion and Microsoft Sentinel, automating triage, enrichment, and initial containment workflows to reduce analyst workload and mean time to respond

- Apply understanding of adversary tradecraft to anticipate attacker behaviour, improve detection logic, and guide the security operations team on emerging Tactics, Techniques, and Procedures (TTPs)
- Write PowerShell and KQL scripts to automate operational tasks, hunt across large datasets, and build custom monitoring dashboards
- Author and maintain incident response playbooks and runbooks, standardising response procedures and ensuring consistent, high-quality outcomes across the SOC team
- Manage CrowdStrike Falcon EDR platform operations — policies, sensor health, detection configuration, and integration with upstream SIEM and SOAR tooling

University of the Arts, London (UAL) — Cyber Security Analyst, Cyber Security and Identity
 Deployed and built out the CrowdStrike Falcon EDR and SOAR capabilities from the ground up, establishing detection and response processes, alert handling procedures, and escalation paths *March 2022 – March 2025*

- Designed Microsoft Sentinel analytics rules and KQL-based threat hunting queries, improving detection coverage across endpoint, cloud, and email data sources
- Investigated SIEM and EDR alerts across the full incident lifecycle; performed root-cause analysis and led containment and remediation for complex, multi-vector incidents
- Authored SOAR automation playbooks to reduce manual triage effort and accelerate response to common alert types
- Conducted proactive threat hunting campaigns leveraging MITRE ATT&CK intelligence, identifying previously undetected attacker activity in the environment
- Developed and delivered incident response playbooks aligned to NIST 800-61, ensuring clear, repeatable procedures across the security team
- Managed identity security controls via Azure AD / Entra ID Conditional Access, MFA enforcement, and BeyondTrust PAM administration for 8,000 users

HCM Solutions Ltd (SaaS/Fintech) — IT Engineer, Security, Quality and Infrastructure
 Supported security (SaaS/Fintech) and infrastructure security and escalation of security events *February 2021 – March 2022*

- Supported incident investigation and contributed to post-incident documentation and lessons-learned activities
- Automated routine security and infrastructure tasks using PowerShell, reducing manual effort and improving response speed
- Supported ISO 27001 compliance including risk assessments, policy reviews, and access control audits
- Conducted vulnerability assessments and coordinated findings with infrastructure and development teams for remediation

KEY ACHIEVEMENTS

- Built a detection engineering programme from the ground up, creating a MITRE ATT&CK-mapped detection library across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel — significantly improving detection coverage and reducing false positive volume
- Led the CrowdStrike Falcon EDR deployment across a complex hybrid estate, establishing a mature SOC detection and response capability that serves as the primary security operations platform
- Developed a comprehensive SOAR playbook library, automating alert triage, enrichment, and containment workflows and reducing mean time to respond to critical security incidents
- Conducted proactive threat hunting campaigns using MITRE ATT&CK intelligence, surfacing previously undetected attacker activity and prompting further hardening of the environment
- Served as senior escalation lead for all high and critical severity incidents, producing structured investigation reports with actionable remediation recommendations and post-incident improvements
- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000 users, materially improving endpoint and identity threat visibility and detection capability

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)

- CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
