

PROSPER AWUNI

Senior Cyber Security Engineer | Enterprise Security Posture, CrowdStrike Falcon and Global Infrastructure

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) certified Senior Cyber Security Engineer with over five years of experience owning enterprise security postures across large, complex environments. I have deep hands-on expertise with CrowdStrike Falcon (Endpoint Detection and Response (EDR), Next-Generation Security Information and Event Management (NG-SIEM), Prevent, Insight and Discover), Security Operations Centre (SOC) operations, threat hunting and proactive detection engineering. I have a strong background in firewall management, vulnerability management and identity security across both on-premises and cloud infrastructure. I am comfortable taking end-to-end technical ownership of an organisation's global security posture and working as a senior technical authority within a small, elite security team. I am eager to bring my SOC and engineering background to an asset management environment where precision, governance and proactive risk reduction are critical, and where I can contribute to forward-looking security innovation including the secure adoption of emerging technologies.

CORE SKILLS AND TECHNICAL STACK

- **EDR and Endpoint Security:** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Tanium
- **SIEM and Threat Detection:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, KQL (Kusto Query Language), detection rule engineering, alert triage, threat hunting, SOAR automation
- **Firewall and Network Security:** Check Point Harmony firewall management, Web Application Firewall (WAF), Distributed Denial of Service (DDoS) protection, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS), network segmentation and policy management
- **Vulnerability and Risk Management:** Pentera Breach Attack Simulation (BAS), Tenable.io, AppCheck, Nessus, risk-prioritised remediation, penetration test finding remediation
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM), Group Policy
- **Cloud and Infrastructure Security:** Microsoft Azure security architecture, Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM), hybrid on-premises and cloud environment hardening
- **Email and Web Security:** Mimecast email security gateway, anti-phishing, anti-spoofing, Data Loss Prevention (DLP), web content filtering
- **Scripting and Automation:** PowerShell scripting, SOAR playbook development, security reporting and metrics dashboards
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF), NIST 800-61, CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK framework

PROFESSIONAL EXPERIENCE

- University of the Arts, London (UAL) - Senior Cyber Security Analyst in Engineering, March 2025 - Present
- Owned the end-to-end security posture, including threat intelligence, detection, management and continuous improvement of security capabilities across an 8,000-user global environment.
 - Lead CrowdStrike Falcon EDR, NG-SIEM, Prevent, Insight and Discover operations, including detection engineering, proactive threat hunting, advanced incident investigation and platform tuning.
 - Author and maintain Microsoft Sentinel detection rules using KQL; own alert triage and incident response workflows in line with NIST 800-61 and MITRE ATT&CK frameworks.
 - Manage Check Point Harmony firewall policies and WAF/DDoS configurations, protecting internet-facing services and enforcing internal network segmentation.

- Lead vulnerability management programme using Pentera Breach Attack Simulation (BAS), Tenable.io, AppCheck and Nessus, providing the organisation with continuous insight into exploitable risk across its infrastructure.
- Administer BeyondTrust PAM for privileged account governance, session monitoring and credential vaulting, reducing the risk of insider threat and credential-based attacks.
- Maintain Microsoft Entra ID (Azure AD) security configuration including Conditional Access policies, MFA, SSO and privileged identity management (PIM) controls for the enterprise.
- Develop PowerShell scripts and SOAR automation workflows to streamline Security Operations Centre (SOC) processes, reduce manual effort and enable faster detection and containment.
- Manage Mimecast email security gateway, including advanced threat protection, impersonation protection and DLP policy administration.
- Manage Microsoft Intune MDM and MAM policies across corporate and bring-your-own-device (BYOD) endpoints, ensuring device compliance and data protection.
- Provide technical escalation for complex incidents, coordinating cross-functional response teams and producing post-incident reports for executive stakeholders including the Chief Information Security Officer (CISO).
- Contribute to ISO 27001, Cyber Essentials Plus, NIST CSF and CIS Controls governance activities, supporting audit and certification programmes.

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity
 Investigated security alerts across CrowdStrike Falcon and Sentinel SIEM, applying NIST 800-61 and MITRE ATT&CK frameworks to triage, contain and eradicate threats. *March 2022 - March 2025*

- Supported enterprise rollout of Microsoft Defender for Endpoint (MDE) and Microsoft 365 Defender across 8,000 users, configuring detection policies, onboarding endpoints and validating health status.
- Performed threat hunting exercises using CrowdStrike Falcon Insight and Discover to proactively identify indicators of compromise (IOCs) and suspicious lateral movement across the estate.
- Administered Microsoft Entra ID (Azure AD), Conditional Access, MFA and SSO policies, supporting identity lifecycle management and access certification reviews.
- Conducted vulnerability assessments using Tenable.io and Nessus; produced risk-rated remediation reports and tracked remediation progress with infrastructure and application owners.
- Assisted with BeyondTrust PAM administration, including privileged account reviews, session playback and access recertification.
- Used Tanium for real-time endpoint visibility, patch compliance monitoring and on-demand remediation across the server and desktop estate.
- Managed Mimecast email security platform, investigating email threats and optimising policy configurations to reduce false positives and improve detection coverage.
- Supported Microsoft Intune MDM and MAM device management, maintaining device compliance policies and responding to non-compliance alerts.
- Produced security reports and executive dashboards to communicate the organisation's security posture to leadership and governance committees.

HGX Solutions Ltd (SnS/E in Tech) - IT Engineer, Security, Quality and Infrastructure
 Designed and implemented security controls for a cloud-native SaaS and telephony environment, including endpoint protection, firewall policies and network access controls. *February 2021 - March 2022*

- Administered identity and access management (IAM) systems including MFA, SSO and Role-Based Access Control (RBAC), reducing credential-based attack surface.
- Supported vulnerability assessments and external penetration test remediation, aligning findings to ISO 27001 controls and risk appetite.
- Developed and maintained security policies, incident response playbooks and security awareness content for staff at all levels.
- Managed cloud infrastructure and device management policies for a distributed, remote-working workforce.

KEY ACHIEVEMENTS

- Took end-to-end technical ownership of UAL's CrowdStrike Falcon deployment across 8,000 users, establishing a mature, intelligence-led EDR and NG-SIEM capability covering prevention, detection, investigation and response.
- Led enterprise-wide Microsoft Defender deployment covering 8,000 users, integrating MDE, MDI and Microsoft 365 Defender with Microsoft Sentinel for unified detection and response across endpoints, identity and cloud workloads.
- Attained Certified Information Systems Security Professional (CISSP) certification, demonstrating mastery across all eight security domains including security architecture, risk management and security operations.
- Introduced Pentera Breach Attack Simulation (BAS) for continuous, automated security validation, enabling the team to proactively identify and remediate exploitable gaps before threat actors could exploit them.
- Designed PowerShell and SOAR automation workflows that eliminated high-volume manual triage tasks, freeing capacity for advanced threat hunting and strategic security improvement initiatives.
- Successfully led Cyber Essentials Plus certification for UAL, overseeing the systematic validation of technical security controls across the enterprise estate.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
