

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike, SIEM/SOAR, EDR and Financial Services Security

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) certified Senior Cyber Security Engineer with over five years of hands-on experience protecting enterprise environments using CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms. I have deep expertise managing web and email security gateways, firewalls, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), Mobile Device Management (MDM) and Mobile Application Management (MAM), vulnerability scanning and remediation, Intrusion Detection System (IDS) and Intrusion Prevention System (IPS) tooling, and Privileged Access Management (PAM). I am experienced in triaging and responding to SIEM and EDR alerts, remediating penetration test findings, and delivering security awareness training to diverse staff populations. In my current role at the University of the Arts London (UAL) I manage a broad security technology stack across an 8,000-user environment, and I am looking to bring that operational depth to a focused financial services security team where I can take ownership of robust, end-to-end cyber security delivery.

CORE SKILLS AND TECHNICAL STACK

- **EDR and Endpoint Protection:** CrowdStrike Falcon (EDR, Next-Generation SIEM (NG-SIEM), Prevent, Insight, Discover), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **SIEM and SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, KQL (Kusto Query Language), SOAR automation and playbook development, alert triage and false positive reduction, detection engineering
- **Email and Web Security Gateways:** Mimecast email security gateway, web content filtering, anti-phishing, anti-spam and data loss prevention (DLP) controls
- **Firewall and Network Security:** Check Point Harmony firewall management, WAF (Web Application Firewall) and DDoS (Distributed Denial of Service) protection, IDS/IPS, network segmentation
- **Identity and Access Management:** Microsoft Entra ID (formerly Azure Active Directory (Azure AD)), Conditional Access policies, MFA/SSO, Group Policy, BeyondTrust PAM
- **MDM and MAM:** Microsoft Intune, Mobile Device Management (MDM) and Mobile Application Management (MAM), Tanium endpoint management
- **Vulnerability Management:** Pentra Breach Attack Simulation (BAS), Tenable.io, AppCheck, Nessus, vulnerability scanning, risk-based remediation tracking
- **Incident Response:** NIST 800-61 incident response framework, MITRE ATT&CK framework, threat hunting, proactive detection engineering
- **Scripting and Automation:** PowerShell scripting, SOAR workflow automation, security reporting and dashboards
- **Frameworks and Compliance:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

- University of the Arts London (UAL) | Senior Cyber Security Analyst / Engineer** *March 2025 - Present*
- Administer CrowdStrike Falcon (EDR, Next-Generation SIEM (NG-SIEM), Prevent, Insight, Discover) across an 8,000-user enterprise environment, driving alert response, threat hunting, and continuous platform optimisation.
- Administer Microsoft Sentinel SIEM and author KQL detection rules to identify anomalous behaviour; own end-to-end alert triage, investigation and escalation workflows in line with NIST 800-61.
 - Manage Mimecast email security gateway, including anti-phishing, anti-spoofing and DLP policy configuration, significantly reducing successful phishing attempts across the organisation.
 - Configure and maintain Check Point Harmony firewall policies, IDS/IPS rules, and WAF/DDoS controls to protect web-facing services and internal network segments.

- Administer Microsoft Entra ID (Azure AD), Conditional Access policies, MFA, SSO and Group Policy for 8,000 users, enforcing zero-trust identity principles and privileged account governance.
- Manage BeyondTrust PAM platform for privileged account lifecycle management, session recording and credential vaulting across IT and security teams.
- Oversee Microsoft Intune MDM and MAM deployments, enforcing device compliance policies and securing corporate and bring-your-own-device (BYOD) endpoints.
- Run vulnerability management programme using Pentera BAS, Tenable.io, AppCheck and Nessus; coordinate risk-based remediation with infrastructure and application teams, tracking findings through to closure.
- Develop SOAR automation playbooks and PowerShell scripts to streamline alert enrichment, containment actions and incident ticket creation, reducing mean time to respond (MTTR).
- Deliver security awareness training and phishing simulation campaigns to academic and professional services staff, reporting outcomes to senior leadership.
- Remediate findings from external penetration tests, validating fixes and producing remediation reports for the Chief Information Security Officer (CISO).
- Operate in line with NIST CSF, CIS Controls, ISO 27001 and Cyber Essentials Plus frameworks, contributing to annual certification and audit activities.

University of the Arts London (UAL) - Cyber Security Analyst, Cyber Security and Identity
 Implemented and managed endpoint security controls, incident response and cloud security configurations, responding to incidents and escalating as required under NIST 800-61 procedures. *March 2022 - March 2025*

- Supported the enterprise-wide deployment of Microsoft Defender for Endpoint (MDE) and Microsoft 365 Defender across 8,000 users, including policy configuration, onboarding and health monitoring.
- Managed Mimecast email security policies and investigated email-borne threats including phishing, business email compromise (BEC) and malware delivery campaigns.
- Administered Microsoft Entra ID (Azure AD) including Conditional Access, MFA and SSO policies, supporting identity lifecycle management and privileged access reviews.
- Supported Microsoft Intune MDM and MAM configuration and device compliance reporting across corporate and BYOD endpoints.
- Conducted vulnerability scans using Tenable.io and Nessus, produced remediation reports and tracked findings through to resolution in collaboration with infrastructure teams.
- Assisted with BeyondTrust PAM platform administration, including privileged account provisioning, session monitoring and periodic access reviews.
- Used Tanium for real-time endpoint visibility, patch compliance monitoring and remote remediation actions across the server and workstation estate.
- Produced security dashboards and management reports to demonstrate the organisation's security posture to senior stakeholders.
- Contributed to Cyber Essentials Plus certification activities, evidencing controls and supporting the annual assessment process.

HUX Solutions Ltd (SaaS/FinTech) - IT Engineer, Security, Quality and Infrastructure
 Implemented and managed endpoint security controls, incident response and cloud security configurations to protect a cloud-native SaaS/FinTech environment. *February 2021 - March 2022*

- Administered identity and access management (IAM) including MFA, SSO and Role-Based Access Control (RBAC) policies for internal users and third-party vendor accounts.
- Conducted vulnerability assessments and supported external penetration testing activities; tracked and remediated identified findings in line with ISO 27001 controls.
- Managed MDM and device management policies for remote-working staff across corporate and mobile endpoints.
- Developed and maintained security policies, incident response procedures, and security awareness content aligned to ISO 27001 and Cyber Essentials standards.
- Supported IT infrastructure operations including cloud services administration, server management and network monitoring.

KEY ACHIEVEMENTS

- Led and delivered the full enterprise deployment of CrowdStrike Falcon EDR, NG-SIEM, Prevent, Insight and Discover across UAL's 8,000-user estate, establishing a mature endpoint detection and response capability from the ground up.
- Delivered the organisation-wide Microsoft Defender for Endpoint and Microsoft 365 Defender rollout for 8,000 users, integrating with Microsoft Sentinel SIEM for unified detection and response.
- Attained Certified Information Systems Security Professional (CISSP) certification while managing full senior security engineering responsibilities, demonstrating depth across all eight CISSP domains.
- Designed and implemented SOAR automation playbooks in PowerShell, eliminating repetitive manual triage tasks and enabling the security team to respond to a higher volume of incidents with greater consistency.
- Drove Cyber Essentials Plus certification for the University through systematic implementation and validation of technical security controls across the estate.
- Introduced Pentera Breach Attack Simulation (BAS) to provide continuous, automated security validation, enabling proactive identification of exploitable gaps ahead of adversaries.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
