

PROSPER AWUNI

Senior Cyber Security Engineer | SIEM, EDR and Security Infrastructure

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with more than five years of hands-on experience designing, implementing and operating robust security capabilities across complex enterprise environments. I specialise in endpoint detection and response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), with expert-level proficiency in CrowdStrike Falcon and strong working knowledge of Microsoft Sentinel and Kusto Query Language (KQL). I have extensive experience managing email and web security gateways, multi-factor authentication (MFA) and single sign-on (SSO) solutions, mobile device management (MDM) and mobile application management (MAM), and privileged access management (PAM). I am adept at leading vulnerability management programmes, performing alert triage and incident response, and remediating penetration testing findings. I communicate risk clearly to both technical and non-technical stakeholders and thrive in small, focused security teams where I can take ownership and make a measurable impact.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **SIEM/SOAR:** Microsoft Sentinel (KQL), CrowdStrike Falcon NG-SIEM, SOAR automation and playbook development
- **Email and Web Security Gateways:** Mimecast (policy management, phishing response, malware detection)
- **MFA/SSO and Identity:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, MFA, SSO; BeyondTrust Privileged Access Management (PAM)
- **MDM/MAM:** Microsoft Intune - endpoint compliance, security baselines, device and application management
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Firewall and Network Security:** Check Point Harmony; IDS/IPS management; WAF/DDoS mitigation
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat hunting, detection engineering
- **Scripting and Automation:** PowerShell, SOAR playbook development
- **Frameworks and Standards:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer - University of the Arts, London (UAL) *March 2025 - Present*

- Lead SIEM and SOAR operations using Microsoft Sentinel (KQL) and CrowdStrike Falcon NG-SIEM, performing alert triage, detection engineering and proactive threat hunting across an 8,000-user enterprise environment.
- Administer CrowdStrike Falcon EDR (Prevent, Insight, Discover) across the full endpoint estate, tuning detection rules and response policies to reduce dwell time and false positive rates.
- Manage Mimecast email security gateway, investigating phishing campaigns, configuring policies and coordinating malware remediation across the organisation.
- Oversee Microsoft Entra ID and Azure AD, Conditional Access policies, MFA and SSO configurations, securing identity access for more than 8,000 users.
- Administer Microsoft Intune for MDM and MAM, enforcing security baselines, device compliance policies and application controls.
- Lead vulnerability management using Tenable.io, AppCheck and Pentera BAS, coordinating remediation of penetration testing findings and control validation across business units.

- Operate BeyondTrust PAM to enforce least-privilege access and monitor privileged account activity.
- Lead incident response in line with NIST 800-61 and MITRE ATT&CK, coordinating cross-functional teams through containment, eradication and recovery phases.
- Deliver security awareness training and present risk findings to senior stakeholders, translating technical risk into business-relevant language.

Cyber Security Analyst, Cyber Security and Identity - University of the Arts, London (UAL)

March 2022 - March 2025

- Triaged and investigated security alerts using CrowdStrike Falcon and Microsoft Sentinel, supporting the security operations function and reducing mean time to respond to incidents.
- Conducted threat hunting exercises using MITRE ATT&CK tactics and techniques, identifying indicators of compromise and anomalous behaviour across the environment.
- Supported vulnerability management cycles using Tenable.io and Nessus, tracking remediation to closure and reporting on risk posture.
- Managed Mimecast email security policies and investigated phishing and malware detections, including coordination of user-reported incidents.
- Administered Azure AD, MFA and Conditional Access policies, supporting identity governance across the organisation.
- Contributed to IDS/IPS management, firewall policy reviews and network security monitoring activities.
- Delivered security awareness content and provided guidance on security best practices to end users and internal teams.
- Assisted in the deployment of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the university estate.

IT Engineer: Security, Quality and Infrastructure - HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Delivered security and infrastructure operations across a Software as a Service (SaaS) and financial technology (FinTech) environment, managing endpoint security, identity access management and network controls.
- Configured and maintained email and web security controls, supporting secure operations for a fast-growing technology business.
- Supported vulnerability assessments and contributed to internal compliance reviews and audit activities.
- Managed MDM solutions for device enrolment, compliance enforcement and remote device management.
- Provided security operations support and worked closely with development and infrastructure teams to embed security across the business.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon EDR across the entire UAL endpoint estate, achieving measurable reductions in mean time to detect and mean time to respond to security incidents.
- Led the deployment of MDE, MDI and Microsoft 365 Defender across an 8,000-user environment, establishing a unified Extended Detection and Response (XDR) capability that significantly improved visibility and detection fidelity.
- Designed and implemented SOAR-driven automated response playbooks, reducing analyst alert triage workload and accelerating incident containment.
- Delivered a Pentra BAS programme to continuously validate and stress-test security controls against real-world attack techniques, improving remediation prioritisation and demonstrating control effectiveness to leadership.
- Successfully achieved and maintained Cyber Essentials+ certification for UAL, validating the organisation's security baseline against the UK National Cyber Security Centre (NCSC) framework.
- Introduced and operationalised BeyondTrust PAM across UAL, significantly reducing the attack surface associated with privileged account misuse.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
