

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike Falcon, SIEM and Security Operations

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of experience implementing, managing and optimising security controls across large enterprise environments. I hold expert-level proficiency in CrowdStrike Falcon across Endpoint Detection and Response (EDR), Next-Generation Security Information and Event Management (NG-SIEM), Prevent, Insight and Discover modules. I have strong hands-on experience with Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), email and web security gateways (Mimecast), multi-factor authentication (MFA) and single sign-on (SSO), mobile device management (MDM) and mobile application management (MAM) via Microsoft Intune, privileged access management (PAM) via BeyondTrust, and identity management through Microsoft Entra ID and Azure Active Directory. I have a proven track record in vulnerability management, alert triage, incident response and penetration testing remediation, and I am comfortable in small, agile security teams where I can take full ownership of security operations.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (EDR, NG-SIEM, Prevent, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft 365 Defender
- **SIEM/SOAR:** Microsoft Sentinel (Kusto Query Language/KQL), CrowdStrike Falcon NG-SIEM; automated playbook development
- **Email Security Gateway:** Mimecast (configuration, policy enforcement, phishing and malware response)
- **MFA/SSO and Identity Management:** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, MFA, SSO
- **Privileged Access Management (PAM):** BeyondTrust
- **MDM/MAM:** Microsoft Intune (device compliance, application management, security baselines)
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Firewall and Network Security:** Check Point Harmony; WAF/DDoS management; IDS/IPS operations
- **Incident Response:** NIST 800-61, MITRE ATT&CK, detection engineering, threat hunting
- **Scripting:** PowerShell, SOAR automation
- **Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer - University of the Arts, London (UAL) *March 2025 - Present*

- Manage CrowdStrike Falcon EDR, NG-SIEM, Prevent, Insight and Discover modules across the full endpoint estate, tuning detection logic, managing response policies and investigating alerts across an 8,000-user environment.
- Operate SIEM/SOAR capabilities using Microsoft Sentinel and KQL, performing alert triage, detection engineering and proactive threat hunting to identify and contain threats early.
- Manage Mimecast email security gateway, enforcing policies, investigating phishing and malware campaigns and coordinating remediation with end users and technical teams.
- Administer Microsoft Entra ID, Azure AD, Conditional Access, MFA and SSO configurations, managing secure identity and access for 8,000+ users.
- Manage Microsoft Intune MDM and MAM, maintaining device compliance, security baselines and application controls across the estate.
- Lead vulnerability management programme using Tenable.io, AppCheck and Pentera BAS, coordinating prioritised remediation and validating security controls through breach and attack simulation.

- Manage BeyondTrust PAM to enforce least-privilege access controls and monitor privileged account activity.
- Lead incident response following NIST 800-61 and MITRE ATT&CK, handling containment, eradication and recovery activities and producing post-incident reports for senior leadership.
- Deliver security awareness training sessions and communicate security risks to both technical and non-technical audiences.
- Remediate penetration testing findings and contribute to ad hoc security projects, including WAF/DDoS policy reviews and IDS/IPS tuning.

Cyber Security Analyst, Cyber Security and Identity - University of the Arts, London (UAL)

March 2022 - March 2025

- Triaged and investigated security alerts using CrowdStrike Falcon and Microsoft Sentinel, supporting day-to-day security operations across a large and diverse higher education environment.
- Conducted threat hunting using MITRE ATT&CK techniques, proactively identifying indicators of compromise and anomalous activity.
- Managed Mimecast email security policies and investigated phishing, spoofing and malware detections, coordinating user remediation where required.
- Administered Azure AD, Conditional Access policies and MFA rollout, contributing to the hardening of identity and access management controls.
- Supported vulnerability management using Tenable.io and Nessus, tracking remediation to completion and preparing risk reports.
- Contributed to IDS/IPS management, firewall policy reviews and network security monitoring.
- Supported deployment of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the university estate.
- Delivered security awareness content and responded to out-of-hours security incidents as required.

IT Engineer: Security, Quality and Infrastructure - HICX Solutions Ltd (SaaS/FinTech)

February 2021 - March 2022

- Delivered security and infrastructure operations across a Software as a Service (SaaS) and financial technology (FinTech) environment, gaining direct exposure to security in a regulated, commercial context.
- Managed endpoint security, identity and access management (IAM), email and web security controls, and MDM solutions.
- Supported vulnerability assessments and contributed to internal compliance and audit activities.
- Worked closely with development and infrastructure teams to embed security practices across the business.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon EDR across the entire UAL endpoint estate, significantly reducing mean time to detect (MTTD) and mean time to respond (MTTR) to security incidents.
- Led deployment of MDE, MDI and Microsoft 365 Defender across 8,000 users, establishing a unified Extended Detection and Response (XDR) platform that improved detection fidelity and reduced operational silos.
- Built and deployed SOAR-integrated automated response playbooks, reducing manual alert triage effort and accelerating incident containment across routine threat scenarios.
- Delivered a Pentera BAS programme to continuously stress-test security controls against real-world attack patterns, improving vulnerability prioritisation and evidencing control effectiveness to senior leadership.
- Achieved and maintained Cyber Essentials+ certification for UAL, validating the security baseline against the UK National Cyber Security Centre (NCSC) standard.
- Operationalised BeyondTrust PAM, enforcing least-privilege access and substantially reducing the risk surface associated with privileged account abuse.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
