PROSPER AWUNI

Senior Cyber Security Engineer | Detection Engineering, EDR/SIEM and Security Operations

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience in detection engineering, Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), and security operations within complex enterprise environments. I specialise in building, tuning and validating detection rules across SIEM, EDR and cloud telemetry, mapping coverage to the MITRE ATT&CK framework to ensure systematic, measurable protection. At the University of the Arts London, I operate CrowdStrike Falcon NG-SIEM, Microsoft Sentinel and Microsoft Defender at scale, designing detection content, conducting proactive threat hunting and leading incident response under the NIST 800-61 framework. I have strong experience with Microsoft Azure and cloud security telemetry, PowerShell scripting and SOAR automation, and I am adept at mentoring analysts and improving SOC processes. I am committed to delivering impactful detection and monitoring capabilities for public sector and government organisations and am eligible to undertake Security Check (SC) clearance.

CORE SKILLS AND TECHNICAL STACK

- **Detection Engineering:** SIEM detection rule authoring (KQL, SPL), detection-as-code, MITRE ATT&CK coverage mapping, alert validation, false-positive reduction, threat intelligence integration
- **EDR Platforms:** CrowdStrike Falcon (Prevent, NG-SIEM, Insight, Discover), Microsoft Defender for Endpoint (MDE), Tanium; policy configuration, detection tuning, threat hunting
- **SIEM Platforms:** Microsoft Sentinel (KQL, analytics rules, workbooks, SOAR), CrowdStrike Falcon NG-SIEM, Splunk/SPL
- **Cloud Security Telemetry:** Microsoft Azure (Entra ID, Defender for Cloud, Log Analytics), Azure Monitor, cloud log ingestion and pipeline design, AWS and GCP security monitoring familiarity
- **Threat Hunting and Incident Response:** Proactive threat hunting with KQL and CrowdStrike Falcon Insight, NIST 800-61 lifecycle, digital forensics triage, root cause analysis, post-incident review
- **SOAR and Automation:** Microsoft Sentinel Logic Apps playbooks, PowerShell scripting, automated detection validation and response workflows
- **Vulnerability Management:** Tenable.io, AppCheck, Nessus, Pentera Breach and Attack Simulation (BAS), risk-prioritised remediation tracking
- **Identity and Access:** Microsoft Entra ID, Conditional Access, MFA, BeyondTrust Privileged Access Management (PAM), Intune MDM/MAM
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer *March 2025 - Present*

University of the Arts, London (UAL)

- Lead detection engineering across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, designing, building and validating detection rules mapped to MITRE ATT&CK tactics and techniques
- Build and tune detection content across SIEM, EDR and cloud telemetry, using KQL and CrowdStrike detection logic to cover endpoint, identity and cloud attack vectors
- Conduct proactive threat hunting using KQL in Microsoft Sentinel and CrowdStrike Falcon Insight, identifying low-and-slow threats and validating detection coverage gaps
- Lead incident response investigations using the NIST 800-61 lifecycle, coordinating containment and eradication across endpoint, identity, network and cloud environments
- Engineer SOAR playbooks in Microsoft Sentinel (Logic Apps) to automate alert triage, ticket creation and initial containment, improving Security Operations Centre (SOC) efficiency

- Manage Microsoft Azure security telemetry including Entra ID audit logs, Defender for Cloud alerts and Azure Monitor workbooks, ingested into Sentinel via data connectors
- Mentor junior analysts, reviewing detection logic, providing feedback on investigation reports and contributing to SOC process improvement initiatives
- Oversee vulnerability management using Tenable.io and Pentera BAS, tracking critical findings against MITRE ATT&CK and driving remediation through risk-based prioritisation
- Write advanced PowerShell automation scripts for log enrichment, IoC hunting, compliance checks and security reporting tasks

Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

University of the Arts, London (UAL)

- Performed daily SIEM alert triage and investigation in Microsoft Sentinel using KQL, escalating high-severity incidents and maintaining investigation records
- Built and tuned Microsoft Sentinel analytics rules and watchlists, reducing false-positive volumes and improving high-fidelity detection of credential-access and lateral movement techniques
- Operated CrowdStrike Falcon EDR across the enterprise, configuring detection and prevention policies and conducting threat hunting in Falcon Insight
- Assisted in deployment of CrowdStrike Falcon NG-SIEM and Microsoft Defender for Endpoint across 8,000 devices, supporting policy configuration and incident response workflows
- Participated in MITRE ATT&CK-based tabletop exercises and contributed to detection coverage gap analysis and improvement planning
- Automated security operations workflows using PowerShell, including bulk account remediation, log parsing and alert enrichment scripts
- Supported BeyondTrust PAM onboarding for privileged accounts, configuring vault policies, session monitoring and audit trails

IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

HICX Solutions Ltd (SaaS/FinTech)

- Implemented Microsoft Defender for Endpoint and Azure Active Directory (now Entra ID) with Conditional Access and MFA for a cloud-first SaaS platform
- Performed infrastructure vulnerability assessments against CIS Controls and ISO 27001, tracking remediation through a risk register
- Supported SOC 2 Type II audit preparation by documenting monitoring and logging controls and providing access management evidence
- Developed PowerShell automation scripts for security monitoring, patch compliance and log collection, reducing manual overhead in security operations

KEY ACHIEVEMENTS

- Built a library of 40+ detection rules in Microsoft Sentinel (KQL) and CrowdStrike, achieving MITRE ATT&CK coverage improvements across initial access, privilege escalation, lateral movement and exfiltration tactic categories
- Designed and deployed SOAR automation playbooks in Microsoft Sentinel that automated phishing triage and account lockdown, saving approximately 8 hours of analyst time per week
- Led UAL's Cyber Essentials Plus recertification, coordinating detection, identity, endpoint and cloud security evidence across the enterprise
- Directed CrowdStrike Falcon EDR deployment across 8,000 endpoints, reducing mean time to contain (MTTC) for endpoint threats by over 60% through improved prevention policy tuning
- Conducted proactive threat hunt that identified a dormant credential-access campaign across 15 endpoints, enabling full containment before lateral movement escalated
- Automated vulnerability report generation and evidence collection using PowerShell and Sentinel workbooks, cutting reporting overhead from 6 hours to under 30 minutes monthly

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
