

# PROSPER AWUNI

Senior Cyber Security Engineer | Hybrid Infrastructure Security | Azure | Prevent & Protect | SIEM/EDR

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosp

## PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of enterprise security engineering experience across hybrid cloud and on-premises infrastructure. I specialise in implementing and maintaining security controls within Azure and Microsoft 365 environments, operating within the prevent and protect pillar of the cyber function, and working closely with infrastructure, cloud engineering, and leadership teams to improve organisational security posture. My expertise spans endpoint protection, identity and access management (IAM), Security Information and Event Management (SIEM) operations, Security Orchestration, Automation and Response (SOAR), vulnerability management, and cloud-native security tooling. I have a proven track record of embedding security across platforms, projects, and cloud services while driving measurable improvements in detection, response, and control effectiveness.

## CORE SKILLS AND TECHNICAL STACK

- **Cloud Security:** Azure security architecture, Azure Entra ID, Conditional Access, Privileged Identity Management (PIM), Identity Protection, cloud-native security controls
- **Hybrid Infrastructure Security:** On-premises and Azure hybrid environment security, Microsoft Intune MDM/MAM, endpoint hardening, patch management
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon EDR (enterprise deployment, policy management, threat hunting), Tanium
- **SIEM/SOAR:** Microsoft Sentinel (KQL, analytics rules, playbooks, workbooks), CrowdStrike Falcon NG-SIEM, SOAR automation
- **Microsoft Defender:** Defender for Endpoint (MDE), Defender for Identity (MDI), Defender for Office 365 (M365), Defender XDR
- **Privileged Access Management (PAM):** BeyondTrust Password Safe and Privileged Remote Access
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Network and Perimeter Security:** Check Point Harmony firewall, Mimecast email security, IDS/IPS
- **Scripting and Automation:** PowerShell, Logic Apps, SOAR playbook development
- **Security Control Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus (CE+), MITRE ATT&CK, NIST 800-61

## PROFESSIONAL EXPERIENCE

**University of the Arts London (UAL) | Senior Cyber Security Analyst/Engineer** | March 2025 - Present  
operating within the prevent and protect function to drive continuous improvements in the organisation's security posture

- Work closely with infrastructure, cloud engineering, and project teams to embed security into platforms, projects, and cloud services across the organisation, ensuring security by design from the outset
- Lead CrowdStrike Falcon Endpoint Detection and Response (EDR) across 8,000+ hybrid infrastructure endpoints, managing prevention policies, detection tuning, and threat hunting capability
- Design and operate Microsoft Sentinel SIEM workspace including data connector configuration, KQL analytics rules, Logic Apps playbooks, and workbook dashboards to support 24/7 SOC monitoring
- Implement Azure and Entra ID security controls including Conditional Access policies, Privileged Identity Management (PIM), and Identity Protection to reduce identity-based risk across cloud and hybrid estate
- Lead vulnerability management programme using Tenable.io, Pentera BAS, and AppCheck; coordinate risk-prioritised remediation with infrastructure and engineering teams to drive control improvement
- Manage BeyondTrust Privileged Access Management (PAM) solution; develop PowerShell automation scripts to streamline security operations workflows and reduce manual analyst effort

- Manage Check Point Harmony firewall and Mimecast email security gateway, maintaining policy sets aligned to evolving threat landscape

**University of the Arts London (UAL) – Cyber Security Analyst, Cyber Security and Identity**  
Supported cloud and on-premises security controls, implemented Privileged Access Management (PAM) to secure hybrid environment  
March 2022 – March 2025

- Configured and managed Microsoft Intune MDM/MAM, Conditional Access, and MFA policies to secure endpoint and identity estate
- Conducted vulnerability scanning using Nessus and AppCheck; tracked and validated remediation across infrastructure teams
- Supported firewall rule review, network security monitoring, and perimeter security management activities
- Assisted in Azure security posture assessments and contributed to cloud security improvement roadmap initiatives
- Contributed to ISO 27001 and Cyber Essentials Plus (CE+) compliance activities including gap analysis, technical evidence gathering, and control remediation

**HGX Solutions Ltd (SaaS/FinTech) – IT Engineer, Security, Quality and Infrastructure**  
Implemented and maintained security controls, access management, and endpoint protection across hybrid SaaS/FinTech infrastructure  
February 2021 – March 2022

- Conducted vulnerability assessments and supported risk-prioritised remediation of identified security weaknesses
- Managed infrastructure security configuration hardening and supported cloud security posture improvement initiatives

## KEY ACHIEVEMENTS

---

- Deployed CrowdStrike Falcon EDR across 8,000+ hybrid infrastructure endpoints, achieving enterprise-wide endpoint protection coverage and reducing endpoint-based security incidents by 65%
- Implemented BeyondTrust Privileged Access Management (PAM) solution securing privileged access for 200+ administrator accounts and servers, eliminating standing privileges
- Built hybrid Security Operations Centre (SOC) integrating CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, establishing 24/7 security monitoring and incident response capability across cloud and on-premises environments
- Led Cyber Essentials Plus (CE+) certification programme remediating technical control gaps across identity, endpoint, network, and patch management domains, achieving successful accreditation
- Developed PowerShell automation scripts and SOAR playbooks reducing manual security operations effort by 50%, enabling the security team to focus on higher-value engineering and detection activities

## EDUCATION

---

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

## CERTIFICATIONS

---

- Certified Information Systems Security Professional (CISSP)
  - CompTIA Security+
  - Microsoft Certified Solutions Associate (MCSA)
  - CompTIA A+
  - Google IT Support Professional Certificate
