PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Microsoft Entra ID | Mimecast | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience managing enterprise security platforms across Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), email and web security gateways, identity and access management, and vulnerability management. Holding the Certified Information Systems Security Professional (CISSP) certification, I have expert-level proficiency in CrowdStrike Falcon and strong hands-on experience with Microsoft Sentinel, Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mimecast, and Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM). At the University of the Arts, London (UAL), I operate as the senior technical owner for a broad portfolio of security platforms across an enterprise environment, managing alert response, policy configuration, vulnerability scanning and remediation, firewall management, and penetration test finding remediation. I am an effective communicator who works well as part of a small, focused security team and is comfortable taking ownership of security operations across multiple toolsets simultaneously. I am now looking to bring this depth of security engineering expertise to a hybrid role within financial services, where I can contribute immediately across the full security technology stack.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover (expert); Microsoft Defender for Endpoint (MDE); Microsoft 365 Defender
- **SIEM/SOAR:** CrowdStrike Falcon NG-SIEM, Microsoft Sentinel, Kusto Query Language (KQL), alert triage and investigation, SOAR playbook development
- **Email and Web Security:** Mimecast email security gateway; web gateway management and policy configuration
- **Identity and Access Management (IAM):** Microsoft Entra ID (Azure Active Directory), Conditional Access policies, MFA, SSO, Group Policy, BeyondTrust Privileged Access Management (PAM)
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM, device compliance policy management
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; remediation tracking and reporting
- **Firewall and Network Security:** Check Point Harmony firewall management; network security policy review
- **Incident Response:** NIST 800-61 Computer Security Incident Handling, structured incident lifecycle, out-of-hours escalation management
- **Scripting and Automation:** PowerShell scripting, automated workflow and alert handling
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer *March 2025 - Present*

University of the Arts, London (UAL)

- Manage and operate CrowdStrike Falcon EDR across the full endpoint estate, owning policy configuration, sensor deployment, alert triage, and threat response for the organisation
- Administer and monitor the SIEM and SOAR environment using CrowdStrike Falcon NG-SIEM and Microsoft Sentinel, performing daily alert triage, investigation, and escalation
- Write and maintain Kusto Query Language (KQL) detection rules and analytic queries in Microsoft Sentinel to detect and respond to emerging threats
- Manage Mimecast email security gateway, maintaining anti-phishing, anti-malware, and Data Loss Prevention (DLP) policies and investigating email-based threats and incidents
- Administer Microsoft Entra ID (Azure Active Directory) including Conditional Access policy management, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) configuration, monitoring for identity-based anomalies and

misconfigurations

- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies across the enterprise device estate, ensuring compliance and secure device configuration
- Manage BeyondTrust Privileged Access Management (PAM) to enforce least-privilege principles and protect highly sensitive account access
- Manage Check Point Harmony firewall policies and rules, reviewing access controls and supporting firewall-related change requests
- Lead the vulnerability management programme using Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, and Nessus; prioritising findings, coordinating remediation with technical teams, and reporting to senior management
- Remediate findings from internal penetration tests and third-party security assessments, tracking progress and validating fixes through re-test
- Lead security incident response using the NIST 800-61 lifecycle, including out-of-hours escalation and cross-functional coordination during major incidents
- Develop SOAR automation playbooks using PowerShell scripting to reduce manual triage time on high-volume alert categories

Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

University of the Arts, London (UAL)

- Operated CrowdStrike Falcon EDR, Mimecast, and Microsoft Sentinel on a daily basis, performing alert triage, SIEM investigation, and email threat analysis
- Led the deployment of Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) to 8,000 users, managing rollout, configuration, and post-deployment tuning
- Administered Microsoft Entra ID / Azure Active Directory, Conditional Access, and MFA policies, investigating authentication anomalies and account compromise events
- Managed vulnerability scanning and remediation tracking using Tenable.io, AppCheck, and Nessus, aligning findings to risk prioritisation frameworks
- Configured and maintained Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies for the enterprise device fleet
- Automated repetitive security workflows using PowerShell scripting, improving operational efficiency within the team

IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

HICX Solutions Ltd (SaaS/FinTech)

- Managed security controls and endpoint protection across cloud and on-premises infrastructure for a Software as a Service (SaaS) financial technology company
- Configured and monitored email and web security tools, managing policy and investigating security events
- Supported vulnerability management, security incident triage, and infrastructure hardening activities
- Contributed to quality assurance and compliance processes aligned to the organisation's security policies

KEY ACHIEVEMENTS

- Led the enterprise-wide deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender to 8,000 users, delivering centralised Endpoint Detection and Response (EDR) coverage across the entire user base
- Implemented BeyondTrust Privileged Access Management (PAM) across the organisation, establishing least-privilege access controls and reducing the privileged credential attack surface
- Ran Pentera Breach and Attack Simulation (BAS) campaigns that identified critical weaknesses in network segmentation and identity controls, enabling targeted remediation before exploitation
- Developed SOAR automation playbooks using PowerShell that materially reduced mean time to triage for repeated high-volume alert categories
- Supported achievement and maintenance of Cyber Essentials Plus certification and alignment to NIST Cybersecurity Framework (CSF) and ISO 27001 control requirements

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
