

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience designing, implementing, and maintaining robust security controls across complex enterprise environments. I have deep expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, and end-to-end incident response following the National Institute of Standards and Technology (NIST) 800-61 framework. I have led vulnerability management programmes using industry-leading scanning tools, managed email and web security gateways including Mimecast, administered Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune, and enforced identity and access controls through Azure Active Directory (Azure AD) and Entra ID including Multi-Factor Authentication (MFA) and Single Sign-On (SSO). I am comfortable working as part of a small, focused security team and take ownership of the full security stack from WAF and DDoS protection through to EDR alert triage, firewall policy, and compliance reporting. I am looking to bring this breadth of operational and engineering experience to a London-based financial services organisation operating in a hybrid model.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (NG-SIEM, EDR, Prevent, Insight, Discover) -- expert-level administration across 8,000+ endpoints
- **SIEM / SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), SOAR playbook development and automation, alert triage and detection rule tuning
- **Threat and Vulnerability Management:** Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; vulnerability scanning, risk prioritisation and remediation tracking
- **Incident Response:** End-to-end incident handling per NIST 800-61 and MITRE ATT&CK; containment, eradication, recovery and lessons learned
- **Identity and Access Management (IAM):** Azure AD / Entra ID, Conditional Access policies, MFA, SSO, Group Policy; BeyondTrust Privileged Access Management (PAM)
- **Email and Web Security Gateways:** Mimecast email security; experience with Menlo web proxy and web content filtering
- **Firewall and Network Security:** Check Point Harmony firewall policy management; familiarity with WAF and DDoS protection controls
- **Mobile Device and Application Management:** Microsoft Intune MDM/MAM across a large corporate fleet
- **Scripting and Automation:** PowerShell scripting for security automation and SOAR integration; KQL query development
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Other Tools:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Tanium, Splunk (Security Performance Engineering (SPL))

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 -- Present

Senior Cyber Security Analyst / Engineer

- Administering CrowdStrike Falcon EDR across 8,000+ endpoints, managing Prevent policy tuning, Insight threat hunting queries, Discover asset visibility and NG-SIEM detection rules to reduce dwell time and false-positive rates.

- Engineering and maintaining SIEM detection logic in Microsoft Sentinel using KQL, building correlation rules aligned to MITRE ATT&CK tactics to surface high-fidelity alerts for the security operations function.
- Leading end-to-end incident response for security events including ransomware attempts, phishing campaigns and credential-based attacks, following NIST 800-61 procedures from detection through containment, eradication and post-incident review.
- Running the vulnerability management programme using Pentra BAS, Tenable.io and AppCheck, coordinating remediation with infrastructure teams and reporting risk posture to senior stakeholders.
- Managing Mimecast email security gateway configuration, including anti-spoofing, sandboxing, impersonation protection policies and DMARC enforcement.
- Administering Azure AD / Entra ID identity and access controls: Conditional Access policies, MFA enforcement, SSO federation and privileged identity governance via BeyondTrust PAM.
- Owning Microsoft Intune MDM/MAM configuration for corporate-owned and Bring Your Own Device (BYOD) mobile fleet, enforcing compliance and application policies.
- Managing Check Point Harmony firewall ruleset reviews, change requests and compliance audits.
- Writing PowerShell automation scripts to streamline SOAR playbook execution, reduce manual analyst effort and accelerate mean time to respond (MTTR).
- Contributing to ISO 27001 and Cyber Essentials Plus certification activities, including risk assessment, control gap analysis and evidence collection.

University of the Arts, London (UAL) -- Cyber Security and Identity

March 2022 -- March 2025

Cyber Security Analyst

- Performed daily SIEM alert triage, threat hunting and security monitoring across a multi-thousand-user institution, escalating confirmed incidents through the defined incident response process.
- Deployed and onboarded CrowdStrike Falcon across the endpoint fleet, establishing baseline Prevent policies and reducing the organisation's exposure to commodity malware.
- Supported the rollout of Microsoft Defender for Endpoint and Microsoft Defender for Identity across the 8,000-user estate, configuring detection policies and integrating alerts into Microsoft Sentinel.
- Conducted vulnerability scans using Tenable.io and Nessus, triaging findings by severity and working with system owners on timely remediation.
- Administered identity and access management processes including joiner/mover/leaver workflows, MFA deployment and Conditional Access policy reviews in Azure AD.
- Produced security metrics and threat intelligence reports for senior management, supporting evidence-based decisions on security investment.
- Assisted with Cyber Essentials Plus certification, preparing technical evidence and coordinating assessor activities.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 -- March 2022

IT Engineer: Security, Quality and Infrastructure

- Delivered security engineering and infrastructure support within a fast-paced Software as a Service (SaaS) FinTech environment, maintaining the security of cloud-hosted systems and internal infrastructure.
- Conducted vulnerability assessments and supported remediation activities to reduce exposure across internal and customer-facing systems.
- Managed endpoint security tooling, identity and access management and network security controls aligned to industry best practice.
- Supported IT quality assurance processes, change management and incident resolution within an ITIL-aligned service framework.

KEY ACHIEVEMENTS

- Reduced CrowdStrike EDR false-positive alert volume by over 40% through systematic Prevent policy tuning and detection rule refinement, enabling the security team to focus on genuine threats.
- Led the end-to-end deployment of Microsoft Defender for Endpoint and Microsoft Defender for Identity across an 8,000-user estate at UAL, delivered on time and within agreed change windows.
- Designed and automated SOAR playbooks in Microsoft Sentinel using PowerShell, cutting average mean time to respond (MTTR) for phishing incidents by approximately 30 minutes per event.

- Identified and remediated a critical misconfiguration in Azure AD Conditional Access policies that had permitted bypass of MFA for a subset of privileged accounts, eliminating a significant identity risk.
- Achieved and maintained Cyber Essentials Plus certification for UAL, supporting the organisation's compliance and cyber insurance requirements.
- Delivered a Pentera Breach and Attack Simulation (BAS) programme that uncovered five previously undetected lateral movement paths, enabling proactive remediation before exploitation.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
