

PROSPER AWUNI

Senior Security Engineer | Monitoring and Detection | SIEM | EDR | MITRE ATT&CK | CrowdStrike Falcon | Cloud Security

United Kingdom (Hybrid) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Security Engineer with over five years of hands-on experience building, tuning and validating detection rules across Security Information and Event Management (SIEM), Endpoint Detection and Response (EDR) and cloud telemetry platforms. I have deep expertise in CrowdStrike Falcon EDR including Next-Generation SIEM (NG-SIEM) detection rule development, and strong capability in Microsoft Sentinel with Kusto Query Language (KQL) for SIEM content creation and threat hunting. I map detection coverage systematically to the MITRE ATT&CK framework to identify gaps and prioritise improvements, and I have hands-on experience protecting large, complex environments that include Azure cloud workloads and on-premises infrastructure. I am a motivated security engineering professional looking to apply my detection engineering and EDR expertise to protect critical UK public sector and government services, and I am available to work on a hybrid basis from London, Bristol, Manchester or Swansea.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon EDR:** Expert-level administration including NG-SIEM detection rule development, Falcon Prevent policy tuning, Falcon Insight threat hunting, Falcon Discover asset visibility and EDR telemetry analysis
- **SIEM Detection Engineering:** Microsoft Sentinel with KQL; detection rule authoring, alert tuning, log source onboarding and MITRE ATT&CK coverage mapping; Splunk SPL (Security Performance Engineering) for search and detection
- **EDR Detection Engineering:** Building and validating EDR detection rules; tuning against live threat actor activity; reducing false-positive rates while maintaining coverage of adversary tactics, techniques and procedures (TTPs)
- **Cloud Telemetry and Security:** Azure cloud security monitoring, cloud workload telemetry onboarding, identity-based detection via Microsoft Defender for Identity (MDI) and Entra ID telemetry
- **MITRE ATT&CK Framework:** Systematic mapping of detection coverage to ATT&CK tactics and techniques; gap analysis and prioritised detection backlog management
- **Threat Hunting:** Proactive hypothesis-driven threat hunting across EDR, SIEM and cloud data sources using CrowdStrike Insight, Microsoft Sentinel and Splunk
- **Vulnerability Management:** Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; using BAS findings to drive detection coverage improvements
- **Incident Response:** NIST 800-61 aligned end-to-end incident handling; containment, eradication, recovery and post-incident improvement
- **Scripting and Automation:** PowerShell scripting for security automation; KQL query development; SOAR (Security Orchestration, Automation and Response) playbook integration
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), ISO 27001, CIS Controls, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 -- Present

Senior Cyber Security Analyst / Engineer

- Building, tuning and validating detection rules across CrowdStrike Falcon NG-SIEM, Microsoft Sentinel SIEM and cloud telemetry sources, systematically mapping coverage to MITRE ATT&CK to identify and close detection gaps across credential access, lateral movement, persistence and exfiltration tactics.
- Administering CrowdStrike Falcon EDR (Endpoint Detection and Response) across 8,000+ endpoints: developing Falcon Prevent policies, Insight threat hunting queries and Discover visibility rules, and tuning

EDR detection logic to suppress false positives while maintaining detection fidelity.

- Engineering Microsoft Sentinel SIEM content using KQL, onboarding cloud and on-premises log sources, validating telemetry quality and developing analytics rules aligned to observed threat actor behaviour.
- Conducting proactive threat hunting campaigns across EDR, SIEM and Azure cloud telemetry, using hypothesis-driven queries to uncover attacker activity that evades automated detection rules.
- Running end-to-end incident response per NIST 800-61, applying lessons learned from each incident to improve detection rule logic and reduce future dwell time.
- Operating the vulnerability management programme using Pentera BAS, Tenable.io and AppCheck; using BAS outputs to simulate adversary techniques and validate or improve detection coverage in real time.
- Administering Azure AD / Entra ID identity telemetry monitoring, Conditional Access policies and BeyondTrust Privileged Access Management (PAM) controls, with Sentinel-based detection for anomalous identity activity.
- Developing PowerShell automation and SOAR playbooks to streamline alert triage and accelerate response to high-volume, low-complexity security events.

University of the Arts, London (UAL) -- Cyber Security and Identity

March 2022 -- March 2025

Cyber Security Analyst

- Performed daily SIEM monitoring and EDR alert triage, investigating security events and refining detection rules to improve signal quality across Microsoft Sentinel and CrowdStrike Falcon.
- Deployed and onboarded CrowdStrike Falcon EDR across the institutional endpoint fleet, establishing Prevent policies and NG-SIEM detection rules from baseline.
- Contributed to MITRE ATT&CK detection coverage mapping, identifying high-priority gaps and developing compensating detection rules within the SIEM and EDR platforms.
- Supported threat hunting activities using CrowdStrike Insight and Splunk, identifying previously undetected indicators of compromise (IoCs) and informing rule development.
- Conducted vulnerability scans using Tenable.io and Nessus, feeding results into the detection engineering backlog to ensure coverage for known vulnerability exploitation techniques.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 -- March 2022

IT Engineer: Security, Quality and Infrastructure

- Maintained endpoint security monitoring, vulnerability management and infrastructure security controls within a cloud-first Software as a Service (SaaS) FinTech environment.
- Supported security incident investigation, log analysis and remediation activities across cloud-hosted and on-premises systems.

KEY ACHIEVEMENTS

- Developed a comprehensive MITRE ATT&CK-aligned detection rule library across CrowdStrike Falcon NG-SIEM and Microsoft Sentinel at UAL, increasing detection coverage across key ATT&CK tactics by over 60% within six months.
- Reduced CrowdStrike Falcon EDR false-positive alert volume by over 40% through systematic Prevent policy tuning and detection rule refinement, enabling the security team to focus analyst capacity on genuine threats.
- Conducted proactive threat hunting campaigns in CrowdStrike Insight that identified active credential harvesting activity from a compromised supplier account, enabling containment before any data was exfiltrated.
- Delivered a Pentera Breach and Attack Simulation (BAS) programme that validated detection coverage against five previously undetected lateral movement paths, directly driving new SIEM and EDR detection rules.
- Automated incident triage using PowerShell and Microsoft Sentinel SOAR playbooks, reducing analyst workload on high-volume phishing events by approximately 30 minutes per investigation.
- Contributed to Cyber Essentials Plus certification for UAL, providing technical evidence for the monitoring, malware protection and access control domains.

EDUCATION

- M.Sc. Environmental and Resource Engineering

- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
