

PROSPER AWUNI

Senior Cyber Security Engineer | Security Information and Event Management (SIEM) | Endpoint Detection and Response (EDR)

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a results-driven Senior Cyber Security Engineer with over five years of hands-on experience implementing, maintaining, and hardening enterprise security infrastructure across complex, regulated environments. I have deep expertise in endpoint detection and response (EDR) with CrowdStrike Falcon, security information and event management (SIEM) and security orchestration, automation, and response (SOAR) platforms, identity and access management (IAM) with Microsoft Entra ID and Azure Active Directory (Azure AD), and vulnerability management with tools including Tenable.io and AppCheck. I bring a proven track record protecting large-scale, business-critical environments, leading technical security projects from design through deployment, and acting as a senior technical resource within a focused security team. I hold the Certified Information Systems Security Professional (CISSP) qualification and am experienced interfacing directly with senior stakeholders to safeguard sensitive data and reduce organisational risk.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM, Spotlight) - expert level, 8,000-user deployment
- **SIEM / SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, Splunk, SOAR automation and playbooks
- **Identity and Access Management (IAM):** Microsoft Entra ID, Azure Active Directory (Azure AD), Conditional Access, Multi-factor Authentication (MFA), Single Sign-On (SSO)
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune, Tanium
- **Email and Web Security Gateways:** Mimecast email security, web filtering and gateway controls
- **Firewall and Network Security:** Check Point Harmony firewall, perimeter security, Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) mitigation
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus - scan scheduling, remediation tracking, reporting
- **Privileged Access Management (PAM):** BeyondTrust PAM
- **Incident Response:** NIST SP 800-61 framework, MITRE ATT&CK framework, alert triage, threat hunting, containment and recovery
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Scripting and Automation:** PowerShell, SOAR automation, detection engineering
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UArts) - Senior Cyber Security Analyst - Engineer *March 2025 - Present*
 Managed and enhanced the cyber security posture of a large-scale digital infrastructure across a complex, multi-site institutional environment of over 8,000 users.

- Lead the deployment and management of CrowdStrike Falcon (Prevent, EDR, NG-SIEM, Insight, Discover) as the primary endpoint detection and response (EDR) and SIEM platform, configuring detection rules, policies, and response workflows.
- Administer Microsoft Sentinel and Microsoft Defender (MDE, MDI, M365 Defender), authoring Kusto Query Language (KQL) queries and analytics rules for threat detection, incident alerting, and security automation via SOAR playbooks.

- Manage identity and access management (IAM) including Entra ID / Azure Active Directory (Azure AD), Conditional Access policies, Multi-factor Authentication (MFA) rollout, and Single Sign-On (SSO) integration.
- Oversee vulnerability management programme using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS): schedule scans, prioritise findings, and track remediation with technical and business teams.
- Manage Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune and Tanium, enforcing device compliance policies across a large user base.
- Manage Mimecast email security gateway including anti-phishing, anti-malware, and data loss prevention (DLP) policies.
- Maintain BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege access and controlling privileged account lifecycle.
- Lead security incident response activities following the National Institute of Standards and Technology (NIST) SP 800-61 framework, performing alert triage, threat hunting, containment, and post-incident reporting.
- Develop and maintain PowerShell automation scripts for security operations, reducing manual workload and improving response times.
- Support compliance activities aligned to ISO 27001, Cyber Essentials Plus, and NIST Cybersecurity Framework (CSF).

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity
 Delivered day-to-day security operations including SIEM alert triage, endpoint protection and response (EDR), and identity-related incident investigation across the institution. *March 2022 - March 2025*

- Administered and optimised CrowdStrike Falcon EDR platform; configured host groups, policies, prevention settings, and automated detection workflows.
- Supported administration of Microsoft Entra ID (Azure AD), Conditional Access policies, and MFA/SSO configurations across an 8,000-user estate.
- Conducted vulnerability scanning and reporting using Tenable.io and Nessus, coordinating remediation with infrastructure and application teams.
- Managed Microsoft Intune MDM/MAM policies for device onboarding, compliance enforcement, and secure application deployment.
- Performed phishing campaign analysis and user security awareness activities; investigated email-based threats via Mimecast.
- Supported Check Point Harmony firewall rule management and network security hardening activities.
- Contributed to incident response playbooks and post-incident reviews following the MITRE ATT&CK framework and NIST SP 800-61.

HGX Solutions Ltd (SaaS/Fintech) - IT Engineer, Security, Quality and Infrastructure
 Managed security and infrastructure across a cloud-native SaaS Fintech environment, implementing and maintaining security controls aligned to business risk appetite. *February 2021 - March 2022*

- Administered identity and access management (IAM) including Azure Active Directory (Azure AD), MFA, SSO, and user lifecycle management.
- Supported endpoint security tooling deployment, patch management, and vulnerability remediation activities.
- Managed Web Application Firewall (WAF) and network perimeter security controls to protect customer-facing SaaS applications.
- Delivered IT infrastructure support activities including firewall management, network monitoring, and security event investigation.
- Assisted with security quality assurance and compliance reporting activities, contributing to ISO 27001 and SOC 2-aligned processes.

KEY ACHIEVEMENTS

- Led enterprise-wide CrowdStrike Falcon deployment across 8,000 endpoints at UAL, improving threat detection coverage and reducing mean time to detect (MTTD) and mean time to respond (MTTR) for security incidents.

- Delivered a full Microsoft Defender for Endpoint (MDE) rollout across the M365 estate, integrating with Microsoft Sentinel for unified SIEM/XDR visibility and automated alert triage.
- Designed and implemented SOAR automation playbooks in Microsoft Sentinel, automating routine alert triage and incident response actions to reduce analyst workload.
- Established a structured vulnerability management programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), improving remediation SLAs and providing actionable risk reporting to senior leadership.
- Implemented BeyondTrust Privileged Access Management (PAM) to enforce least-privilege access and eliminate uncontrolled privileged account use across the estate.
- Strengthened identity security by deploying Entra ID Conditional Access policies and MFA across 8,000 users, significantly reducing identity-based attack surface.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
