

PROSPER AWUNI

Senior Cyber Security Engineer | EDR/XDR | SIEM/SOAR | Cloud Security | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience implementing, maintaining, and optimising technical security controls across complex enterprise environments. I have strong hands-on proficiency across Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) platforms, Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Identity and Access Management (IAM), Privileged Access Management (PAM), and vulnerability management. I have led security operations for an 8,000-user estate, building detection rules, automating response workflows, supporting incident response under the National Institute of Standards and Technology (NIST) framework, and hardening cloud identity infrastructure in Microsoft Azure and Entra ID. I bring solid scripting skills in PowerShell and experience enforcing Zero Trust principles through Conditional Access, network segmentation, and least-privilege access governance. I am seeking a senior engineering role where I can build and maintain technical controls that protect infrastructure, applications, and data in a demanding financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (Prevent, EDR, Insight, Discover, NG-SIEM) – Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender XDR – Strong
- **SIEM / SOAR:** Microsoft Sentinel with Kusto Query Language (KQL), analytics rule development, SOAR playbook automation; CrowdStrike NG-SIEM; Splunk/SPL (moderate)
- **IAM / PAM:** Entra ID / Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust PAM, session recording, privilege lifecycle governance
- **Cloud Security:** Microsoft Azure (Entra ID, Conditional Access, Intune, cloud security posture); Azure hardening and configuration; exposure to AWS security concepts
- **Vulnerability Management:** Tenable.io, Pentera Breach Attack Simulation (BAS), AppCheck, Nessus – scanning, prioritisation, remediation tracking against SLA targets
- **Scripting & Automation:** PowerShell (security automation, reporting, endpoint hardening), SOAR workflow development
- **Zero Trust & Network Security:** Conditional Access policy design, network segmentation, Check Point Harmony firewall, Intrusion Detection and Prevention Systems (IDS/IPS), Data Loss Prevention (DLP)
- **Incident Response:** NIST 800-61 lifecycle, MITRE ATT&CK mapping, containment, eradication, recovery, post-incident reporting
- **Compliance & Frameworks:** ISO 27001, Cyber Essentials Plus, NIST Cybersecurity Framework (CSF), CIS Controls, MITRE ATT&CK
- **Mobile Device Management:** Microsoft Intune MDM/MAM, compliance policy enforcement

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) – Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Implement and maintain technical security controls protecting infrastructure, applications, and data for over 8,000 users, covering EDR, SIEM, IAM, PAM, and endpoint management platforms.
- Administer and optimise CrowdStrike Falcon (Prevent, EDR, Insight, Discover) for endpoint protection and threat detection, tuning detection policies to reduce alert fatigue while maintaining high-fidelity coverage.
- Build and tune detection rules and SOAR automation playbooks in Microsoft Sentinel using KQL, reducing mean time to respond (MTTR) for security incidents across identity, endpoint, and cloud surfaces.
- Configure and harden Microsoft Azure and Entra ID environments, implementing Conditional Access policies, enforcing MFA, and managing SSO integrations to support Zero Trust architecture principles.
- Govern privileged access using BeyondTrust PAM, overseeing account lifecycle management, session recording, and least-privilege enforcement across administrative accounts.

- Lead vulnerability management cycles using Tenable.io and Pentera Breach Attack Simulation (BAS), prioritising findings by risk and tracking remediation to SLA targets.
- Conduct incident response activities aligned to NIST 800-61, mapping adversary techniques to the MITRE ATT&CK framework and producing post-incident reports for senior leadership.
- Develop and maintain PowerShell scripts for security automation, endpoint hardening checks, and operational reporting to reduce manual toil across the security function.
- Support ISO 27001 and Cyber Essentials Plus audit evidence-gathering, coordinating across infrastructure, identity, and application workstreams.
- Manage Microsoft Intune MDM/MAM, enforcing device compliance policies and application protection controls across Windows, iOS, and Android endpoints.

University of the Arts, London (UAL) – Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Triaged and investigated alerts from CrowdStrike Falcon, Microsoft Defender for Endpoint (MDE), Microsoft Sentinel, and Mimecast, escalating high-severity incidents and coordinating containment actions.
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the university estate, onboarding endpoints and configuring baseline policies.
- Administered Check Point Harmony firewall policies, managed network perimeter rules, and monitored traffic for intrusion indicators and policy violations.
- Contributed to vulnerability scanning and remediation cycles using Nessus and AppCheck, maintaining a risk register and reporting findings to the security manager.
- Managed Tanium for endpoint asset visibility, patch compliance reporting, and targeted threat-hunting queries across managed endpoints.
- Supported Entra ID administration including role-based access control (RBAC), access reviews, and Conditional Access policy refinement to reduce identity risk.
- Participated in incident response activities under NIST 800-61, documenting timelines and contributing to lessons-learned and post-incident review processes.

HICX Solutions Ltd (SaaS/FinTech) – IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Implemented and maintained security controls across Windows and macOS endpoints, managing EDR tooling, patch management, and antivirus policies.
- Managed Azure Active Directory (AD) identity and access provisioning, enforcing Conditional Access policies and MFA for SaaS platform users in a FinTech environment.
- Conducted vulnerability assessments and worked with development teams to remediate findings, supporting a security-first engineering culture in a cloud-native product environment.
- Managed firewall and network infrastructure, maintained security incident logs, and conducted root cause analysis for endpoint and network events.
- Developed PowerShell scripts for routine automation tasks including account provisioning, compliance reporting, and endpoint configuration baseline checks.

KEY ACHIEVEMENTS

- Operationalised CrowdStrike Falcon EDR and Microsoft Defender XDR across an 8,000-user estate at UAL, dramatically improving endpoint threat visibility and detection fidelity.
- Developed a library of Microsoft Sentinel KQL detection rules and SOAR automation playbooks, reducing mean time to detect (MTTD) and mean time to respond (MTTR) for common attack patterns.
- Implemented Zero Trust Conditional Access policies in Entra ID, eliminating legacy authentication protocols and enforcing MFA across all remote access scenarios.
- Overhauled BeyondTrust PAM governance to eliminate shared administrative credentials and establish full privileged session recording, closing a critical audit finding.
- Supported successful ISO 27001 and Cyber Essentials Plus recertification, coordinating technical evidence across infrastructure, identity, and endpoint workstreams.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**

- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
