

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | IAM/PAM | MDM/MAM

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a dedicated Cyber Security Engineer with over five years of experience managing and maintaining technical security controls across large enterprise environments. I bring expert-level CrowdStrike Falcon skills across Falcon Prevent, Endpoint Detection and Response (EDR), Insight, and Discover, alongside strong proficiency in Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), Identity and Access Management (IAM), Privileged Access Management (PAM), and Mobile Device Management (MDM). I have extensive experience with Mimecast email security gateway administration, Microsoft Intune MDM and Mobile Application Management (MAM), Entra ID / Azure Active Directory (AD) Conditional Access, and Multi-Factor Authentication (MFA). In my current role I protect an 8,000-user environment, running day-to-day security operations, alert triage, vulnerability management, and incident response. I am looking to bring this broad technical toolkit to a hybrid security engineering position in a focused City of London financial services team.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, EDR, Insight, Discover, NG-SIEM – Expert level; real-time response, detection tuning, threat hunting
- **Email & Web Security:** Mimecast gateway administration, inbound/outbound filtering, anti-spoofing, sandboxing, URL protection; Web Application Firewall (WAF) and DDoS defence
- **SIEM / SOAR:** Microsoft Sentinel (KQL), CrowdStrike NG-SIEM, SOAR playbook automation, alert triage and tuning, detection rule development
- **Identity & Access Management (IAM):** Entra ID / Azure Active Directory (AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Group Policy, BeyondTrust PAM
- **Mobile Device Management:** Microsoft Intune MDM/MAM, device compliance policy enforcement, application protection policies across Windows, iOS, and Android
- **Vulnerability Management:** Tenable.io, Pentera Breach Attack Simulation (BAS), AppCheck, Nessus – scan execution, prioritisation, SLA-based remediation tracking
- **Firewall & Network Security:** Check Point Harmony, Intrusion Detection and Prevention Systems (IDS/IPS), network segmentation, security certificate management
- **Incident Response:** NIST 800-61, MITRE ATT&CK, containment, eradication, recovery, post-incident reporting and lessons learned
- **Scripting:** PowerShell – automation, endpoint configuration, compliance reporting
- **Compliance:** ISO 27001, Cyber Essentials Plus, NIST Cybersecurity Framework (CSF), CIS Controls

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) – Senior Cyber Security Analyst / Engineer *March 2025 – Present*

- Manage and optimise the CrowdStrike Falcon platform across 8,000+ endpoints, administering Falcon Prevent, EDR, Insight, and Discover; tuning detection policies and responding to endpoint threats at Tier 2/3 level.
- Administer Mimecast email security gateway, managing filtering rules, anti-spoofing controls, URL protection, and sandboxing to protect against phishing, malware, and Business Email Compromise (BEC).
- Maintain SIEM/SOAR capabilities in Microsoft Sentinel using KQL, authoring analytics rules, tuning alert thresholds, and building SOAR automation playbooks to accelerate incident triage and response.
- Manage BeyondTrust Privileged Access Management (PAM), governing privileged account lifecycles, session recording, and least-privilege enforcement for administrative accounts.
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), enforcing device compliance and application protection policies.

- Configure and maintain Entra ID / Azure Active Directory, including Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Group Policy management.
- Manage WAF and DDoS protections for internet-facing applications, maintaining and reviewing rule sets to block web-layer attacks.
- Lead vulnerability management cycles using Tenable.io and Pentra BAS, conducting scheduled scans, prioritising findings by risk criticality, and tracking remediation SLAs.
- Conduct incident response under NIST 800-61, mapping adversary activity to the MITRE ATT&CK framework and producing post-incident reports for senior stakeholders.
- Deliver security awareness training and phishing simulation campaigns, reducing click-through rates across departments through targeted education and follow-up coaching.
- Manage security certificates and PKI lifecycle across internal and external services, coordinating renewals and replacements to maintain continuity.
- Remediate penetration test findings in collaboration with infrastructure and application teams, managing findings through a risk-prioritised remediation register.

University of the Arts, London (UAL) – Cyber Security Analyst, Cyber Security and Identity

March 2022 – March 2025

- Triage and investigated security alerts from CrowdStrike Falcon, Mimecast, Microsoft Defender, and Microsoft Sentinel, escalating high-severity incidents and coordinating containment and eradication actions.
- Supported deployment and configuration of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across the university estate.
- Administered Check Point Harmony firewall policies, monitoring network traffic for anomalies and managing rules to enforce perimeter controls.
- Managed Tanium endpoint platform for asset discovery, patch compliance reporting, and targeted threat-hunting queries across managed Windows and macOS endpoints.
- Ran vulnerability scans using Nessus and AppCheck, maintaining a risk register and reporting remediation progress to the security manager against agreed SLAs.
- Managed Entra ID role assignments, access reviews, and Conditional Access policies to reduce identity risk and enforce least-privilege principles.
- Participated in incident response activities under NIST 800-61, maintaining incident timelines and contributing to post-incident review documentation.
- Assisted with ISO 27001 and Cyber Essentials Plus evidence-gathering and audit preparation, liaising with external auditors and internal stakeholders.

HICX Solutions Ltd (SaaS/FinTech) – IT Engineer: Security, Quality and Infrastructure

February 2021 – March 2022

- Implemented and maintained endpoint security controls across Windows and macOS fleets, managing EDR, patch management, and antivirus policies in a SaaS FinTech environment.
- Managed Azure Active Directory (AD) identity and access provisioning, enforcing Conditional Access policies and MFA for cloud platform users.
- Conducted vulnerability assessments and collaborated with development and infrastructure teams to remediate findings, supporting a security-first engineering culture.
- Managed firewall rules, network infrastructure, and IT services; supported security incident logging, log analysis, and root cause investigation.
- Developed PowerShell scripts for routine operations automation including account provisioning, compliance checks, and endpoint configuration reporting.

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon EDR across an 8,000+ endpoint estate at UAL, reducing mean time to detect (MTTD) for endpoint threats through refined detection policies and real-time response playbooks.
- Overhauled BeyondTrust PAM governance, eliminating shared administrative credentials and establishing session-recording standards across all privileged accounts, closing a critical audit finding.

- Built Microsoft Sentinel SOAR automation playbooks that reduced manual alert triage effort by automating response actions for high-volume, lower-complexity security events.
- Delivered sustained security awareness and phishing simulation programme that measurably reduced user click-through rates across UAL's diverse staff and student community.
- Supported Cyber Essentials Plus and ISO 27001 recertifications by coordinating technical evidence gathering across infrastructure, identity, endpoint, and application workstreams.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
