

PROSPER AWUNI

Senior Cyber Security Engineer | Cloud and Hybrid Infrastructure Security | Azure | CrowdStrike | Microsoft Defender

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with more than five years of experience strengthening security across complex hybrid and cloud infrastructure environments. I have deep expertise in securing Microsoft Azure-based estates and have deployed and operated CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender at scale for large enterprise organisations. I am experienced in Security Information and Event Management (SIEM) engineering using Microsoft Sentinel and Kusto Query Language (KQL), proactive threat hunting aligned to the MITRE ATT&CK framework, and vulnerability management using industry-leading tools. I thrive working independently and autonomously as part of a geographically distributed team, and I bring the technical depth and communication skills to strengthen security across a hybrid infrastructure without requiring close oversight. I am looking for a fully remote permanent Senior Cyber Security Engineer opportunity where I can deliver meaningful impact across a large-scale enterprise security programme.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, Next-Generation SIEM)
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender -- 8,000 user deployment
- **SIEM/SOAR:** Microsoft Sentinel, KQL (Kusto Query Language), Security Orchestration Automation and Response (SOAR), detection engineering, alert triage
- **Cloud and Hybrid Security:** Microsoft Azure, Microsoft Entra ID (formerly Azure Active Directory), Conditional Access, cloud workload protection, hybrid infrastructure hardening
- **Identity and Access Management:** Azure Active Directory (Azure AD), Multifactor Authentication (MFA), Single Sign-On (SSO), Privileged Access Management (PAM) via BeyondTrust
- **Endpoint Management:** Microsoft Intune Mobile Device Management (MDM), Mobile Application Management (MAM), Tanium endpoint management
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS)
- **Threat Intelligence and Hunting:** MITRE ATT&CK framework, indicator of compromise (IOC) analysis, threat-led detection logic
- **Scripting and Automation:** PowerShell scripting for automated response and SOAR workflow development
- **Frameworks:** NIST CSF, NIST 800-61 Incident Response, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UoA) Senior Cyber Security Analyst/Engineer | Jan 2023 – Present

- Deployed and operated CrowdStrike Falcon EDR including Prevent, Insight, and Discover modules, providing comprehensive endpoint visibility, behavioural-based threat prevention, and proactive threat hunting capabilities.
- Engineered detection content in Microsoft Sentinel using KQL, writing analytical rules, workbooks, and hunting queries aligned to MITRE ATT&CK tactics and techniques to improve detection coverage across the hybrid estate.
- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender to more than 8,000 users, integrating telemetry into the SIEM for unified threat detection and response.

- Strengthened Azure and Entra ID security by implementing Conditional Access policies, Multifactor Authentication (MFA), and identity protection controls, reducing the risk of credential-based attacks across cloud services.
- Led incident response investigations in line with NIST 800-61, performing root-cause analysis, containment, eradication, and recovery activities for security events across network, endpoint, and cloud environments.
- Conducted proactive threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying and neutralising threats not captured by automated detections and improving the overall detection baseline.
- Managed a structured vulnerability management programme using Tenable.io, Nessus, AppCheck, and Pentera Breach and Attack Simulation (BAS), providing continuous visibility of the attack surface and driving remediation.
- Developed PowerShell-based SOAR automation scripts to accelerate analyst response to high-frequency alert types, reducing manual effort and improving mean time to respond (MTTR).
- Managed Microsoft Intune MDM and MAM policies, Tanium endpoint management, and Check Point Harmony firewall configurations to maintain consistent security baselines across the hybrid infrastructure.

University of the Arts London (UAL) – Cyber Security Analyst, Cyber Security and Identity
 Managed and configured security alerts across SIEM, EDR, and email security platforms, investigating anomalies and escalating confirmed incidents in accordance with response playbooks. *March 2022 -- March 2025*

- Supported the deployment and configuration of Microsoft Defender for Endpoint (MDE), extending endpoint protection to Windows and macOS devices across the organisation's hybrid estate.
- Managed identity and access controls in Azure Active Directory (Azure AD), including user provisioning, group-based access management, and Conditional Access policy review.
- Conducted vulnerability assessments using Tenable.io and Nessus, producing risk-ranked reports and working with IT teams to track and close identified vulnerabilities.
- Administered Mimecast email security policies for anti-phishing, anti-malware, and data loss prevention (DLP), reducing the volume of malicious emails reaching end-users.
- Supported ISO 27001 and Cyber Essentials Plus compliance activities, contributing to evidence collection, gap analysis, and remediation of identified control weaknesses.
- Delivered security awareness and phishing simulation campaigns, improving staff reporting of suspicious emails and reducing click-through rates on simulated threats.

HGX Solutions Ltd (SaaS/FinTech) – IT Engineer, Security Quality and Infrastructure
 Managed security configurations across SaaS and on-premises estate, including endpoint protection, MFA, and SSO policies to reduce attack surface. *February 2021 -- March 2022*

- Configured and maintained MDM policies for corporate devices, ensuring all endpoints met security baselines before accessing organisational systems.
- Supported infrastructure projects including server provisioning, network security hardening, and identity management improvements across the SaaS environment.
- Conducted internal security quality assurance checks and contributed to vulnerability identification and remediation for the organisation's cloud and on-premises estate.

KEY ACHIEVEMENTS

- Deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) to more than 8,000 users, delivering comprehensive endpoint and identity protection across a large hybrid infrastructure.
- Implemented CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), consolidating log ingestion and detection engineering into a single cloud-native platform and improving analyst efficiency.
- Engineered more than 30 custom KQL detection rules in Microsoft Sentinel mapped to MITRE ATT&CK, improving detection coverage for high-priority threat categories including ransomware, lateral movement, and credential theft.
- Automated SOAR response playbooks using PowerShell, reducing mean time to respond (MTTR) for common alert categories by approximately 40%.
- Led incident response to a significant business email compromise (BEC) attempt, containing the threat within one hour and preventing financial and data loss.

- Contributed to achieving and maintaining Cyber Essentials Plus certification, satisfying the UK Government's baseline cyber security standard for the organisation.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP) -- ISC2
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
