

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | SIEM/SOAR | Endpoint Detection and Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with more than five years of experience protecting complex enterprise environments using industry-leading endpoint protection, Security Information and Event Management (SIEM), and Privileged Access Management (PAM) technologies. I have deep hands-on expertise with CrowdStrike Falcon across the full product suite, including Endpoint Detection and Response (EDR), NG-SIEM, Prevent, Insight, and Discover, and I have deployed Microsoft Defender for Endpoint across an estate of 8,000 users. I excel across the full security operations lifecycle, from alert triage and SIEM/Security Orchestration, Automation and Response (SOAR) management through to firewall administration, vulnerability scanning and remediation, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Mobile Device Management (MDM)/Mobile Application Management (MAM) using Microsoft Intune. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a methodical, high-standards approach to protecting business-critical systems in fast-paced environments.

CORE SKILLS AND TECHNICAL STACK

- **CrowdStrike Falcon:** Endpoint Detection and Response (EDR), NG-Security Information and Event Management (SIEM), Falcon Prevent, Falcon Insight, Falcon Discover
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL) detection engineering; PowerShell-based Security Orchestration, Automation and Response (SOAR) playbook automation
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Identity and Access Management (IAM):** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO)
- **Privileged Access Management (PAM):** BeyondTrust PAM platform, credential vaulting, session recording, least-privilege enforcement
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune device compliance and data protection policies
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus
- **Email and Web Security Gateways:** Mimecast (anti-phishing, anti-spoofing, email encryption, data loss prevention)
- **Firewall and Network Security:** Check Point Harmony, network segmentation, Intrusion Detection System (IDS)/Intrusion Prevention System (IPS) management
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, threat hunting
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Operate and optimise the CrowdStrike Falcon Endpoint Detection and Response (EDR) platform across the enterprise, including alert triage, detection policy tuning, and management of prevention policies, Falcon Insight, and Falcon Discover modules.
- Manage SIEM/SOAR platforms end-to-end, authoring and tuning detection rules in Microsoft Sentinel using Kusto Query Language (KQL), and building PowerShell-based Security Orchestration, Automation and Response (SOAR) playbooks to automate alert response and reduce mean time to respond (MTTR).
- Administer BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege access controls, managing privileged session recording, and overseeing credential vaulting for all privileged accounts across the organisation.

- Manage web and email security gateways, including Mimecast email security, configuring anti-phishing, anti-spoofing, URL protection, and data loss prevention (DLP) policies to protect 8,000+ users from email-borne threats.
- Configure and maintain Multi-Factor Authentication (MFA), Conditional Access policies, and Single Sign-On (SSO) via Microsoft Entra ID, enforcing identity-based security controls across cloud and hybrid environments.
- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) configurations to enforce device compliance posture and protect corporate data on managed and unmanaged endpoints.
- Lead vulnerability scanning and remediation programmes using Tenable.io and Pentera Breach and Attack Simulation (BAS), prioritising critical and high-severity findings and tracking remediation through to closure with infrastructure teams.
- Manage Intrusion Detection System (IDS)/Intrusion Prevention System (IPS) alerts and investigate anomalous network behaviour, escalating confirmed incidents through the formal incident response lifecycle in line with NIST 800-61.
- Deliver security awareness training and phishing simulation campaigns to an 8,000-user community, improving phishing click-through rates and security culture across the organisation.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across 8,000 users, establishing centralised endpoint protection and identity-based threat detection.
- Triaged and investigated security alerts across CrowdStrike Falcon EDR and Microsoft Sentinel SIEM, conducting root cause analysis and documenting findings in line with NIST 800-61 incident response standards.
- Maintained and configured Check Point Harmony firewall rules, network segmentation policies, and VPN gateway access controls to protect the network perimeter.
- Managed Conditional Access and Azure Active Directory (Azure AD) policies to enforce identity-based access controls, reducing attack surface and ensuring compliance with institutional security standards.
- Conducted vulnerability assessments using Nessus and AppCheck, producing actionable remediation plans and collaborating with infrastructure teams to resolve critical and high-severity findings within agreed timescales.
- Developed PowerShell scripts to automate routine security operations tasks across SIEM alert handling, identity management, and endpoint security, improving team efficiency and reducing manual effort.
- Managed Mimecast email security gateway, configuring DMARC, DKIM, SPF, and anti-spoofing policies, reducing phishing exposure across the organisation.
- Supported Cyber Essentials Plus certification assessment and technical remediation activities, ensuring controls across endpoint, identity, and network security met certification requirements.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Designed, implemented, and managed cloud security controls within Microsoft Azure, including identity governance, role-based access control (RBAC), and security policy enforcement across a SaaS environment.
- Administered Microsoft Intune for Mobile Device Management (MDM) across a distributed workforce, enforcing device compliance profiles and mobile application management policies to protect corporate data.
- Managed endpoint security tooling, vulnerability scanning, and patch management across a hybrid cloud-on-premises infrastructure, reducing security risk exposure.
- Deployed and administered Single Sign-On (SSO) and Multi-Factor Authentication (MFA) solutions, strengthening access security and reducing reliance on username-password-only authentication.
- Supported incident response and security event escalation processes, contributing to business continuity and structured post-incident reviews.

KEY ACHIEVEMENTS

- Led deployment of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender to 8,000 users, delivering full enterprise endpoint and identity threat protection coverage.
- Implemented automated Security Orchestration, Automation and Response (SOAR) playbooks using PowerShell, reducing mean time to respond (MTTR) to high-severity alerts by 40% through automated enrichment and initial containment.
- Designed and deployed BeyondTrust Privileged Access Management (PAM) across the enterprise, eliminating uncontrolled privileged access and achieving compliance with internal and regulatory access control requirements.
- Achieved and maintained Cyber Essentials Plus certification by leading technical remediation activities across endpoint protection, identity management, and network security controls.
- Delivered Pentera Breach and Attack Simulation (BAS) programme to continuously validate security controls against real-world attack scenarios, enabling measurable, evidence-based improvements to the security posture.
- Reduced phishing susceptibility across an 8,000-user community through structured security awareness training and simulated phishing campaigns, improving staff reporting rates and reducing click-through rates.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
