

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM/SOAR | Incident Response | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of hands-on experience protecting complex enterprise environments. I specialise in Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR), Endpoint Detection and Response (EDR) using CrowdStrike Falcon, threat detection and response, vulnerability management, and identity and access security. I have managed security operations for environments of 8,000-plus users, implemented enterprise-grade tooling spanning CrowdStrike Falcon, Microsoft Sentinel, Microsoft Defender, Mimecast, Microsoft Entra ID (formerly Azure Active Directory), Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune. I am adept at operating within small, focused security teams, reporting to senior stakeholders, and delivering measurable improvements across Security Operations Centre (SOC) functions, network security, and cloud environments. I bring a structured, methodical approach to incident response, alert triage, Web Application Firewall (WAF) management, and Distributed Denial of Service (DDoS) mitigation, underpinned by deep familiarity with industry frameworks including NIST CSF, MITRE ATT&CK, CIS Controls, and ISO 27001.

CORE SKILLS AND TECHNICAL STACK

- **EDR/XDR:** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM, Fusion SOAR) - expert-level administration and tuning
- **SIEM/SOAR:** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike NG-SIEM, Splunk/SPL; SOAR playbook development and alert automation
- **Email and Web Security Gateways:** Mimecast (email security), Menlo Security (web gateway); phishing and malware protection
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (AD), Conditional Access, MFA, SSO; BeyondTrust Privileged Access Management (PAM)
- **MDM/MAM:** Microsoft Intune; device compliance, application control, Mobile Device Management and Mobile Application Management policies
- **Vulnerability Management:** Tenable.io, Pentera Breach and Attack Simulation (BAS), AppCheck, Nessus; vulnerability scanning, remediation tracking, and prioritisation
- **Firewalls and Network Security:** Check Point Harmony; WAF and DDoS management; network segmentation and perimeter security
- **Incident Response:** NIST 800-61 lifecycle; L2/L3 triage, threat investigation, and containment; forensic analysis
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Scripting and Automation:** PowerShell scripting; SOAR workflow automation; detection rule and use-case development
- **Frameworks:** NIST CSF, MITRE ATT&CK, CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Administer and optimise CrowdStrike Falcon across EDR, Prevent, Insight, Discover, and NG-SIEM modules for a user base exceeding 8,000; tuning detections and reducing false positives to improve signal quality and SOC efficiency
- Manage SIEM/SOAR infrastructure using Microsoft Sentinel (KQL) and CrowdStrike Fusion SOAR; develop automated detection playbooks, correlation rules, and alert-triage workflows that accelerate mean

time to respond

- Oversee email and web security gateways including Mimecast to enforce anti-phishing, spam filtering, and URL protection policies; review gateway logs and respond to inbound threats in real time
- Administer Microsoft Entra ID / Azure AD Conditional Access policies, MFA enforcement, and SSO configurations; maintain least-privilege access and review privileged accounts via BeyondTrust PAM
- Manage Mobile Device Management and Mobile Application Management policies through Microsoft Intune; enforce device compliance and application security controls across a hybrid workforce
- Lead vulnerability management lifecycle using Tenable.io and Pentera BAS; execute scan schedules, analyse results, prioritise remediation by risk severity, and track closure through to completion
- Handle end-to-end incident response using NIST 800-61; coordinate L2/L3 triage, lead investigations, perform containment and remediation, and produce post-incident reports for senior management
- Conduct proactive threat hunting using MITRE ATT&CK techniques, Sentinel KQL queries, and CrowdStrike Falcon Insight telemetry; identify adversary indicators and improve detection coverage
- Manage WAF and DDoS monitoring; review network traffic anomalies, respond to volumetric and application-layer attacks, and engage upstream providers as required
- Produce security metrics, KPI dashboards, and executive-level reports to evidence the security posture and communicate risk to the IT Security leadership

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Deployed and operationalised Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user estate; reduced endpoint threat exposure and improved identity-based alerting
- Built and tuned SIEM detection rules and KQL-based alerts in Microsoft Sentinel; created analytic rules, workbooks, and watchlists to surface high-priority threats from across the environment
- Performed daily alert triage, incident triage, and investigation within a structured SOC function; escalated confirmed incidents and led containment with the security team
- Administered Mimecast email security policies, reviewed inbound threat intelligence, and responded to phishing campaigns and business email compromise (BEC) attempts
- Configured and managed Microsoft Entra ID / Azure AD Conditional Access, MFA, and SSO; supported identity governance and entitlement reviews
- Executed vulnerability assessments using Nessus and AppCheck; triaged findings, coordinated remediation with infrastructure teams, and tracked patch compliance
- Maintained Check Point Harmony firewall rule sets; reviewed access control lists (ACLs), investigated suspicious traffic, and implemented security policy changes
- Authored and maintained incident response playbooks aligned to NIST 800-61; trained junior analysts on triage procedures and escalation paths
- Contributed to Cyber Essentials Plus accreditation activities; gathered evidence, addressed control gaps, and liaised with the certifying body

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Implemented and managed security tooling and quality controls across cloud and on-premises infrastructure in a SaaS/FinTech environment
- Configured endpoint security policies, administered identity and access management, and enforced MFA and SSO controls across staff accounts
- Conducted vulnerability scans and assisted with remediation activities; maintained patch management schedules and tracked security control effectiveness
- Managed Microsoft Intune MDM policies for mobile and endpoint devices; enforced compliance baselines and application allow-listing
- Supported ISO 27001 compliance activities; contributed to risk assessments, security control documentation, and internal audit preparation
- Monitored network infrastructure for anomalies; responded to security events and contributed to root-cause analysis following security incidents

KEY ACHIEVEMENTS

- Led the deployment of CrowdStrike Falcon Prevent and Insight across an 8,000-user estate at UAL, improving endpoint threat coverage and reducing mean time to detect by streamlining alert workflows
- Designed and automated SOAR playbooks in CrowdStrike Fusion SOAR and Microsoft Sentinel, reducing manual analyst effort on repetitive triage tasks by enabling automated enrichment and containment actions
- Delivered an 8,000-user Microsoft Defender for Endpoint (MDE) and Defender for Identity (MDI) rollout, consolidating endpoint and identity threat detection under a unified Microsoft 365 Defender console
- Developed a comprehensive vulnerability management programme using Tenable.io and Pentera BAS, establishing a regular cadence of scanning, remediation tracking, and executive-level risk reporting
- Maintained Cyber Essentials Plus certification across two consecutive cycles, coordinating evidence gathering and remediating control gaps identified during assessment
- Produced threat-hunting playbooks leveraging MITRE ATT&CK, enabling structured proactive hunting campaigns that identified previously undetected lateral movement activity

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
