PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike EDR | SIEM/SOAR | Vulnerability Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of experience securing large enterprise environments. I specialise in endpoint detection and response (EDR) using CrowdStrike Falcon, security information and event management (SIEM) and security orchestration, automation and response (SOAR), and end-to-end vulnerability management. I have a proven track record of handling alert triage and incident response, remediating penetration test findings, and managing privileged access management (PAM), mobile device management (MDM), identity and access management, and email security solutions at scale. I am comfortable working in small, focused security teams and am equally adept at driving technical delivery and communicating risk to non-technical stakeholders. I am looking for a permanent senior role in a hybrid environment where I can protect financial services infrastructure and lead security operations improvements.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - Expert; Microsoft Defender for Endpoint (MDE)
- **SIEM and SOAR:** CrowdStrike NG-SIEM; Microsoft Sentinel (with Kusto Query Language (KQL)); Splunk; SOAR automation and playbook development
- **Identity and Access Management (IAM):** Microsoft Entra ID (formerly Azure Active Directory); Conditional Access policies; multi-factor authentication (MFA); single sign-on (SSO)
- **Privileged Access Management (PAM):** BeyondTrust PAM platform - administration and privileged session management
- **Mobile Device and Application Management:** Microsoft Intune - mobile device management (MDM) and mobile application management (MAM)
- **Vulnerability Management:** Tenable.io; Nessus; AppCheck; Pentera breach and attack simulation (BAS)
- **Email and Web Security:** Mimecast email security; web application firewall (WAF) and distributed denial of service (DDoS) mitigation
- **Firewall and Network Security:** Check Point Harmony; perimeter firewall policy management; intrusion detection system (IDS) and intrusion prevention system (IPS)
- **Incident Response:** NIST SP 800-61 framework; MITRE ATT&CK framework; threat hunting and forensic investigation
- **Scripting and Automation:** PowerShell scripting; SOAR automation for alert enrichment and response workflows
- **Security Frameworks:** NIST Cybersecurity Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus
- **Endpoint Management:** Tanium; Microsoft Intune; Group Policy

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)
Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Manage and administer the CrowdStrike Falcon EDR platform (Prevent, Insight, Discover, NG-SIEM) across an 8,000-user endpoint estate, configuring prevention policies, detection rules, and custom indicator of compromise (IOC) lists to maintain comprehensive coverage.
- Lead alert triage and incident investigation across CrowdStrike Falcon EDR, SIEM, and SOAR tooling, escalating threats in line with defined security playbooks and NIST SP 800-61 incident response framework.
- Administer Mimecast email security to defend against phishing, malware, and business email compromise (BEC) threats, configuring detection policies and monitoring delivery telemetry.
- Manage Microsoft Entra ID (formerly Azure Active Directory), enforcing Conditional Access policies, MFA, and SSO to implement zero-trust access controls across the hybrid estate.
- Administer BeyondTrust PAM to enforce least-privilege access and monitor privileged sessions across server, network and cloud infrastructure.

- Manage Microsoft Intune MDM/MAM to enforce device compliance baselines, deploy security configurations, and control corporate application access on managed devices.
- Lead the vulnerability management programme using Tenable.io, Nessus, AppCheck and Pentera BAS; prioritise findings by risk, coordinate remediation with IT teams, and track progress to closure.
- Remediate findings from internal and third-party penetration tests, working across IT operations to close critical and high-severity vulnerabilities within agreed service level agreements.
- Develop and maintain PowerShell automation scripts and SOAR playbooks to reduce manual effort in alert enrichment, triage and response workflows, decreasing mean time to respond (MTTR).
- Manage Check Point Harmony firewall rules and policies, controlling network access and enforcing perimeter security boundaries.
- Deliver security awareness training and phishing simulations to educate staff and reduce the risk of social engineering attacks.
- Perform threat hunting using CrowdStrike Falcon Insight and NG-SIEM to proactively identify indicators of attack (IOA) and anomalous behaviour across endpoints and cloud services.

University of the Arts London (UAL)
Cyber Security Analyst, Cyber Security and Identity *March 2022 - March 2025*

- Deployed CrowdStrike Falcon EDR organisation-wide, configuring prevention policies, exclusion rules and threat intelligence integration to protect endpoints from ransomware, malware and advanced persistent threats (APT).
- Conducted daily SIEM alert triage and investigation, identifying true positives, containing affected systems and co-ordinating incident resolution with IT infrastructure and application teams.
- Administered Microsoft Entra ID and Azure Active Directory (AAD), managing Conditional Access policies, MFA enforcement, and privileged identity management to reduce identity-based attack surface.
- Supported BeyondTrust PAM deployment, onboarding privileged accounts, configuring password rotation policies and session recording for audit compliance.
- Managed vulnerability scanning programme using Tenable.io and AppCheck, generating reports and co-ordinating remediation sprints with IT operations teams.
- Configured Microsoft Intune MDM and MAM policies to enforce security baselines across Windows, macOS, iOS and Android corporate devices.
- Supported Mimecast configuration and ongoing management, tuning email security policies to improve detection accuracy and reduce false positives.
- Documented security incidents, root-cause analyses and post-incident reports to support continuous improvement of detection and response capabilities.
- Contributed to security awareness campaigns and delivered targeted training to high-risk user groups including finance and senior leadership.

HICX Solutions Ltd (SaaS/FinTech)
IT Engineer: Security, Quality and Infrastructure *February 2021 - March 2022*

- Managed endpoint security and patch management across corporate infrastructure in a SaaS and FinTech environment, applying security hardening baselines to Windows workstations and servers.
- Configured and administered MFA and SSO solutions for internal and SaaS platform users, reducing credential-based attack risk.
- Managed MDM deployment to enforce device compliance policies and ensure that only authorised, patched devices could access corporate systems.
- Supported vulnerability management activities including regular scans, results analysis and co-ordinated patching with development and infrastructure teams.
- Contributed to ISO 27001 and CIS Controls compliance activities, supporting internal risk assessments, gap analyses and audit evidence collection.
- Administered firewall rules and IDS/IPS policies to control inbound and outbound network traffic and detect anomalous activity.
- Managed digital certificate lifecycles, monitoring certificate expiry and co-ordinating renewals to ensure continuous service availability.

KEY ACHIEVEMENTS

- Delivered full CrowdStrike Falcon EDR coverage across an 8,000-endpoint estate, including NG-SIEM integration, significantly improving detection and response capability.
- Implemented automated SOAR playbooks for alert triage and enrichment, reducing mean time to respond (MTTR) to critical incidents.
- Rolled out BeyondTrust PAM across university server and network infrastructure, eliminating uncontrolled use of shared privileged credentials.
- Deployed Pentera breach and attack simulation (BAS) to continuously validate security controls and prioritise vulnerability remediation based on real-world exploitability.
- Managed remediation of penetration test findings across UAL, closing critical and high-severity issues within agreed service level agreement (SLA) timescales.
- Delivered Microsoft Intune MDM/MAM rollout for 8,000+ users, enforcing device compliance and conditional access policies across the hybrid device estate.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
