

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike Falcon | Security Information and Event Management (SIEM)/Security Orchestration, Automation and Response (SOAR) | Threat Detection and Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniproper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Senior Cyber Security Engineer with over five years of progressive enterprise security experience, specialising in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, email security gateway administration, and end-to-end vulnerability management. I have delivered security operations across large, complex estates including an 8,000-user enterprise deployment, implementing and managing security controls that span email and web security gateways, Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) alerting, identity and access management, Mobile Device Management (MDM) and Mobile Application Management (MAM), and penetration test finding remediation. I am experienced in working as part of a small, high-performing security team where individual ownership and technical breadth are essential, and I bring a proactive approach to threat hunting, SOAR automation, and security architecture that reduces dwell time and minimises operational risk.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon EDR, CrowdStrike Falcon Prevent (next-generation antivirus), CrowdStrike Falcon Insight (threat hunting), CrowdStrike Falcon Discover, CrowdStrike Next-Gen SIEM (NG-SIEM) with LogScale
- **Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel with Kusto Query Language (KQL), CrowdStrike NG-SIEM, SOAR playbook development and automation
- **Email and Web Security Gateways:** Mimecast email security (policy administration, threat investigation, phishing response), web security filtering
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory / Azure AD), Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Mobile Device Management (MDM) and Mobile Application Management (MAM):** Microsoft Intune endpoint policy management, compliance enforcement
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS); vulnerability scanning, risk prioritisation, remediation tracking, penetration test finding management
- **Incident Response:** NIST SP 800-61 incident lifecycle, MITRE ATT&CK threat intelligence integration, digital forensics and triage
- **Extended Detection and Response (XDR):** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **Network and Perimeter Security:** Check Point Harmony firewall administration, network security monitoring, perimeter access controls
- **Scripting and Automation:** PowerShell scripting for SOAR automation and security operations workflows
- **Security Frameworks:** NIST CSF, CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK
- **Certifications:** Certified Information Systems Security Professional (CISSP), CompTIA Security+, Microsoft Certified Solutions Associate (MCSA)

PROFESSIONAL EXPERIENCE

University of the Arts London (UAL)

March 2025 – Present

Senior Cyber Security Analyst / Engineer

- Own and operate CrowdStrike Falcon across the full enterprise estate (8,000+ users) including Falcon EDR, Falcon Prevent (next-generation antivirus), Falcon Insight (threat hunting), Falcon Discover (asset intelligence), and CrowdStrike Next-Gen SIEM (NG-SIEM) with LogScale for centralised log management and advanced threat analytics.
- Oversee email security gateway operations via Mimecast, administering inbound and outbound filtering policies, investigating phishing and business email compromise campaigns, and enforcing email authentication controls to protect the user estate.
- Administer Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, developing detection rules in Microsoft Sentinel (KQL) and CrowdStrike NG-SIEM to surface high-fidelity alerts and automate response actions through SOAR playbooks.
- Manage Endpoint Detection and Response (EDR) and Extended Detection and Response (XDR) alert response end-to-end: triage, investigation, containment, eradication, and recovery using CrowdStrike Falcon and Microsoft Defender for Endpoint (MDE), with MITRE ATT&CK technique mapping throughout.
- Administer Multi-Factor Authentication (MFA) and Single Sign-On (SSO) protocols via Microsoft Entra ID (Azure AD) and Conditional Access, enforcing Zero Trust identity principles and reducing identity attack surface.
- Manage Mobile Device Management (MDM) and Mobile Application Management (MAM) solutions via Microsoft Intune, enforcing device compliance policies and controlling application access from managed and unmanaged endpoints.
- Execute vulnerability scanning and remediation programmes using Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), triaging findings by risk severity and tracking remediation to closure with infrastructure teams.
- Coordinate and remediate penetration test findings, translating technical test reports into prioritised remediation workstreams and providing progress reporting to senior stakeholders.
- Administer BeyondTrust Privileged Access Management (PAM) to control and audit privileged access to critical systems, reducing standing privilege and enforcing just-in-time access.
- Develop and maintain PowerShell automation scripts to orchestrate SOAR workflows, streamline alert enrichment, and accelerate incident response across Endpoint Detection and Response (EDR) and identity platforms.
- Manage security certificates and administer Check Point Harmony firewall policies alongside Tanium-based endpoint visibility to maintain a comprehensive control environment.
- Deliver security awareness training and contribute to security architecture and risk assessment activities aligned with ISO 27001, NIST CSF, CIS Controls, and Cyber Essentials+ frameworks.

University of the Arts London (UAL)

March 2022 – March 2025

Cyber Security Analyst, Cyber Security and Identity

- Administered CrowdStrike Falcon EDR and Prevent across the enterprise estate, refining detection policies, investigating endpoint alerts, and coordinating containment and remediation for confirmed incidents.
- Operated Microsoft Sentinel as the primary Security Information and Event Management (SIEM) platform, writing KQL detection queries and correlation rules to identify threats across endpoint, identity, and cloud log sources.
- Performed proactive threat hunting using CrowdStrike Falcon Insight and Microsoft Sentinel, identifying indicators of compromise and anomalous activity across the estate before escalation.
- Managed email security through Mimecast, configuring filtering policies, quarantine rules, and investigating email-borne threat campaigns targeting the organisation.
- Administered Azure Active Directory (Azure AD) / Entra ID, enforcing Conditional Access, MFA, and SSO policies and investigating identity-based threats using Microsoft Defender for Identity (MDI).
- Conducted vulnerability assessments using Nessus and Tenable.io, generating risk-prioritised remediation reports and supporting infrastructure teams through remediation cycles.
- Managed Microsoft Intune MDM/MAM policies for endpoint compliance, ensuring enrolled devices met baseline security configuration requirements.

- Contributed to incident response investigations following NIST SP 800-61, producing post-incident reports with root cause analysis and recommended control improvements.
- Supported Cyber Essentials+ accreditation by evidencing control compliance and remediating identified gaps across endpoint, network, and identity domains.

HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

IT Engineer: Security, Quality and Infrastructure

- Implemented and maintained security controls across a cloud-hosted SaaS platform, covering endpoint security, access control management, and infrastructure hardening in a regulated FinTech environment.
- Managed identity and access management, provisioning and de-provisioning accounts with least-privilege principles and auditing privileged access usage.
- Supported incident management and security event investigation, coordinating with development and infrastructure teams to remediate findings promptly.
- Delivered IT quality assurance activities and contributed to infrastructure reliability improvements including monitoring, patching, and configuration management.
- Contributed to security governance documentation and policy frameworks aligned with ISO 27001 principles.

KEY ACHIEVEMENTS

- Deployed and fully operationalised CrowdStrike Falcon EDR, Prevent, Insight, Discover, and Next-Gen SIEM (NG-SIEM) across an 8,000-user enterprise estate, becoming the internal subject-matter expert for the platform and significantly reducing endpoint threat dwell time.
- Built an end-to-end SIEM and SOAR capability using Microsoft Sentinel (KQL) and CrowdStrike NG-SIEM, developing automated response playbooks in PowerShell that reduced mean time to respond to common endpoint and identity incidents by eliminating manual triage steps.
- Implemented a mature vulnerability management programme integrating Tenable.io, AppCheck, and Pentera Breach and Attack Simulation (BAS), enabling continuous attack surface measurement and achieving measurable reduction in critical and high-severity findings quarter on quarter.
- Administered Mimecast email security gateway across the full enterprise, implementing advanced sender authentication and content filtering policies that significantly reduced phishing delivery rates and user-reported email threats.
- Delivered BeyondTrust Privileged Access Management (PAM) implementation, enforcing just-in-time privileged access across critical infrastructure systems and eliminating standing domain administrator accounts.
- Led Cyber Essentials+ certification programme, coordinating cross-team evidence collection and control remediation to achieve accreditation within the target timeline.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
