

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM/SOAR | Endpoint Detection and Response | Identity and Access Management

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience implementing and maintaining enterprise-grade security across complex infrastructure environments. I specialise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, firewall management, Privileged Access Management (PAM), and vulnerability scanning and remediation. I have led security operations across an 8,000-user Microsoft 365 environment, managing Entra Identity (formerly Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Mobile Device Management (MDM) and Mobile Application Management (MAM) via Microsoft Intune. I bring a strong background in security awareness training delivery, penetration test finding remediation, and incident response aligned to NIST 800-61 and the MITRE ATT&CK framework, and I am comfortable working within a focused security team to implement and maintain robust security across a financial services organisation.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - Expert-level administration, policy management, alert triage and threat hunting
- **SIEM/SOAR:** Microsoft Sentinel with Kusto Query Language (KQL); CrowdStrike Falcon NG-SIEM; Splunk/SPL; SOAR automation and playbook development
- **Email and Web Security:** Mimecast email security gateway; web filtering and secure web gateway configuration; anti-phishing and threat intelligence integration
- **Firewall and Network Security:** Check Point Harmony firewall; Intrusion Detection and Prevention Systems (IDS/IPS); WAF/DDoS management; VPN and network access controls
- **Identity and Access Management:** Microsoft Entra ID (Azure Active Directory); Conditional Access policies; MFA; SSO; Group Policy; BeyondTrust Privileged Access Management (PAM)
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM; Tanium; CrowdStrike Falcon Discover; Microsoft Defender for Endpoint (MDE)
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; vulnerability scanning, prioritisation and remediation tracking
- **Incident Response:** NIST 800-61 lifecycle; MITRE ATT&CK framework; digital forensics; root cause analysis; pen test finding remediation
- **Security Awareness:** Security awareness programme delivery; phishing simulation; user education and training
- **Scripting and Automation:** PowerShell scripting; SOAR automation; log ingestion and enrichment
- **Frameworks:** NIST Cybersecurity Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Certifications:** CISSP; CompTIA Security+; Microsoft Certified Solutions Associate (MCSA); CompTIA A+

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Administer and optimise CrowdStrike Falcon EDR across the enterprise estate, including Prevent policy configuration, Insight threat hunting, and NG-SIEM alert triage and response
- Manage SIEM/SOAR operations within Microsoft Sentinel, building KQL detection rules, custom workbooks, and automated incident response playbooks to reduce mean time to respond

- Oversee email security gateway configuration and threat response through Mimecast, including anti-phishing policy management and executive impersonation protection
- Administer Entra ID (Azure Active Directory) Conditional Access policies, MFA enforcement, SSO configurations, and privileged identity management across a hybrid Active Directory environment
- Manage Microsoft Intune MDM/MAM policies across Windows, iOS, and Android endpoints, including compliance policies, device configuration profiles, and application protection controls
- Lead vulnerability management programme using Tenable.io and Pentera Breach and Attack Simulation, coordinating remediation with infrastructure teams and tracking closure to SLA
- Administer BeyondTrust PAM, managing privileged account on-boarding, session recording, and access policy enforcement
- Conduct security awareness training delivery and phishing simulation campaigns, improving user reporting rates and reducing click-through on simulated phishing
- Lead incident response activities aligned to NIST 800-61, coordinating cross-functional response, root cause analysis, and post-incident review
- Manage and remediate findings from external penetration tests, tracking recommendations through to closure and evidencing remediation for audit purposes
- Maintain Check Point Harmony firewall policies, IDS/IPS rules, and network access controls, reviewing rule sets and decommissioning legacy access paths

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Deployed and operationalised CrowdStrike Falcon EDR across an 8,000-user environment, configuring prevention policies, exclusions, and alert triage workflows
- Built and maintained Microsoft Sentinel detection rules using KQL, ingesting log sources from Entra ID, Microsoft 365, CrowdStrike, and on-premises infrastructure
- Managed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the M365 tenant, tuning policies and investigating alerts
- Configured and maintained Mimecast email security, managing inbound and outbound policies, threat intelligence feeds, and impersonation protection rules
- Supported vulnerability management using Tenable.io and AppCheck, running scheduled scans, analysing results, and liaising with infrastructure teams to prioritise and track remediation
- Administered Entra ID and Group Policy, managing Conditional Access policies, MFA rollout, and SSO integrations with third-party applications
- Provided tier 2 and tier 3 security incident response, analysing endpoint telemetry and identity logs to contain and remediate threats
- Contributed to Cyber Essentials Plus certification assessment and ISO 27001 audit evidence preparation
- Delivered security awareness training sessions and coordinated phishing simulation exercises, tracking metrics and reporting outcomes to senior leadership
- Maintained security operations documentation including runbooks, playbooks, and incident response procedures

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software as a Service / FinTech)

- Implemented and maintained endpoint security controls, network access policies, and infrastructure hardening across a SaaS cloud environment
- Managed security tooling including endpoint protection, email filtering, and vulnerability scanning, supporting ISO 27001 compliance activities
- Administered user access management, ensuring least-privilege principles and conducting periodic access reviews
- Supported incident response activities and contributed to security policy documentation and quality assurance processes
- Configured and maintained MDM policies for end-user devices, enforcing security baselines and supporting remote workforce security requirements

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon EDR across 8,000 endpoints at UAL, significantly improving endpoint threat visibility and reducing detection-to-response time
- Built a comprehensive Microsoft Sentinel SIEM environment with custom KQL detection rules, automated SOAR playbooks, and integrated log sources across cloud and on-premises infrastructure
- Delivered BeyondTrust PAM implementation, bringing privileged account management under full policy control and eliminating unmanaged admin credential risk
- Led Cyber Essentials Plus certification and contributed to ISO 27001 audit readiness, demonstrating adherence to recognised security frameworks
- Reduced phishing susceptibility rates through security awareness training programmes and simulated phishing campaigns, improving user reporting and reducing click-through rates
- Operationalised vulnerability management using Tenable.io and Pentera BAS, establishing a risk-prioritised remediation cycle aligned to CIS Controls

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
