

PROSPER AWUNI

Senior Cyber Security Engineer | Cloud and Hybrid Infrastructure Security | Microsoft Azure | SIEM/SOAR | Endpoint Detection and Response

United Kingdom (Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of experience securing hybrid infrastructure and Microsoft Azure environments at enterprise scale. I specialise in strengthening security across cloud and on-premises infrastructure, combining deep expertise in Endpoint Detection and Response (EDR) via CrowdStrike Falcon, cloud-native Security Information and Event Management (SIEM) using Microsoft Sentinel and Kusto Query Language (KQL), and identity security through Microsoft Entra Identity, Conditional Access, and Privileged Access Management (PAM). I have led security operations for an 8,000-user environment spanning Microsoft 365, Azure Active Directory, Microsoft Defender, and hybrid Active Directory, and I bring proven capability in vulnerability management, incident response, detection engineering, and threat hunting. I am motivated by the opportunity to help a leading UK organisation prevent and protect against threats across a hybrid cloud and on-premises infrastructure, working fully remotely as part of a high-performing security team.

CORE SKILLS AND TECHNICAL STACK

- **Cloud and Hybrid Infrastructure Security:** Microsoft Azure security; hybrid Active Directory and Entra ID (Azure Active Directory); cloud identity, access, and workload protection; securing Microsoft 365 tenants
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon (Prevent, Insight, Discover, NG-SIEM) - Expert-level deployment, policy management, alert triage, and threat hunting
- **SIEM/SOAR:** Microsoft Sentinel with KQL; CrowdStrike Falcon NG-SIEM; Splunk/SPL; automated incident response playbooks and SOAR automation
- **Identity and Access Management:** Microsoft Entra ID; Conditional Access; MFA; SSO; Group Policy; BeyondTrust Privileged Access Management (PAM); least-privilege access governance
- **Endpoint and Device Management:** Microsoft Intune MDM/MAM; Microsoft Defender for Endpoint (MDE); Microsoft Defender for Identity (MDI); Microsoft Defender for Microsoft 365; Tanium
- **Vulnerability Management:** Tenable.io; Pentera Breach and Attack Simulation (BAS); AppCheck; Nessus; risk-prioritised remediation aligned to CIS Controls
- **Incident Response and Threat Hunting:** NIST 800-61 incident response lifecycle; MITRE ATT&CK framework; detection engineering; threat hunting across cloud and hybrid telemetry
- **Network and Perimeter Security:** Check Point Harmony firewall; IDS/IPS; Mimecast email security; network access controls
- **Scripting and Automation:** PowerShell scripting; SOAR playbook development; log ingestion and enrichment automation
- **Frameworks:** NIST Cybersecurity Framework (CSF); CIS Controls; ISO 27001; Cyber Essentials Plus; MITRE ATT&CK
- **Certifications:** CISSP; CompTIA Security+; Microsoft Certified Solutions Associate (MCSA); CompTIA A+

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer

March 2025 - Present

University of the Arts, London (UAL)

- Lead the security of a hybrid infrastructure environment encompassing Microsoft Azure, Microsoft 365, on-premises Active Directory, and cloud-connected endpoints, identifying and mitigating risks across the full attack surface
- Administer CrowdStrike Falcon EDR at expert level, including Prevent policy management, Insight threat hunting queries, NG-SIEM alert triage, and Discover asset visibility across hybrid endpoints
- Architect and maintain Microsoft Sentinel as the organisation's primary Security Information and Event Management (SIEM) platform, building KQL detection rules, custom analytics, and automated response

playbooks

- Manage Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft Defender for Microsoft 365, tuning policies and investigating cross-domain threats
- Administer Entra ID (Azure Active Directory) including Conditional Access policy design, MFA enforcement, SSO integrations, and privileged identity management across hybrid Active Directory
- Lead vulnerability management using Tenable.io and Pentera Breach and Attack Simulation (BAS), prioritising findings by risk and tracking remediation through to closure against defined SLAs
- Manage BeyondTrust Privileged Access Management (PAM), including privileged account on-boarding, session recording, and access policy enforcement across administrator accounts
- Lead incident response in alignment with NIST 800-61, coordinating cross-functional response teams, conducting root cause analysis, and producing post-incident reports for senior stakeholders
- Conduct proactive threat hunting across cloud and on-premises telemetry using MITRE ATT&CK to identify gaps in detection coverage and improve security posture
- Manage Microsoft Intune MDM/MAM policies across Windows, iOS, and Android devices, enforcing compliance policies and application protection controls
- Develop and maintain PowerShell automation scripts to streamline security operations, accelerate log analysis, and support SOAR playbook integration

Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

University of the Arts, London (UAL)

- Deployed and operationalised CrowdStrike Falcon EDR across an 8,000-user hybrid environment, replacing legacy antivirus with next-generation endpoint protection and establishing prevention policy baselines
- Built Microsoft Sentinel SIEM environment from the ground up, onboarding log sources from Azure, Microsoft 365, CrowdStrike, Check Point, Mimecast, and on-premises systems, and developing a library of KQL detection rules
- Administered Microsoft Defender for Endpoint and Microsoft Defender for Identity across the Microsoft 365 tenant, managing alert queues and conducting threat investigations aligned to MITRE ATT&CK
- Managed Entra ID and Group Policy across a hybrid Active Directory environment, configuring Conditional Access, MFA, and SSO for cloud and on-premises applications
- Operated vulnerability management lifecycle using Tenable.io and AppCheck, conducting scheduled scans, analysing results, and tracking remediation through to completion
- Provided tier 2 and tier 3 incident response, analysing endpoint and identity telemetry to contain and eradicate threats across cloud and on-premises infrastructure
- Contributed to Cyber Essentials Plus certification and ISO 27001 audit evidence preparation, demonstrating compliance with recognised security frameworks
- Maintained Mimecast email security gateway policies, managing inbound and outbound threat controls, anti-phishing rules, and threat intelligence integration

IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

HICX Solutions Ltd (Software as a Service / FinTech)

- Secured cloud and hybrid SaaS infrastructure, managing endpoint protection, email filtering, network access controls, and vulnerability scanning in an Azure-hosted environment
- Administered user access management aligned to least-privilege principles, conducting periodic access reviews and supporting identity governance processes
- Managed MDM policies for end-user devices across a remote workforce, enforcing security baselines and supporting secure access to cloud applications
- Contributed to ISO 27001 compliance activities, supporting audit evidence collection and security policy documentation
- Supported incident response activities and contributed to infrastructure hardening initiatives in the cloud and on-premises environment

KEY ACHIEVEMENTS

- Deployed CrowdStrike Falcon EDR across 8,000 endpoints at UAL, establishing next-generation endpoint protection and significantly improving threat visibility across a hybrid infrastructure
- Architected and built a Microsoft Sentinel SIEM environment from scratch, integrating cloud and on-premises log sources and developing custom KQL detection rules and automated SOAR playbooks
- Led vulnerability management programme using Tenable.io and Pentera Breach and Attack Simulation (BAS), establishing a risk-prioritised remediation cycle and improving the organisation's overall security posture
- Managed Microsoft Defender across the full Microsoft 365 suite (MDE, MDI, Defender for M365) across an 8,000-user environment, improving cross-domain threat detection and response
- Delivered BeyondTrust PAM implementation, bringing privileged account management under full policy control across hybrid cloud and on-premises administrative accounts
- Contributed to Cyber Essentials Plus certification and ISO 27001 audit readiness, demonstrating a structured and auditable approach to information security management

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
