

PROSPER AWUNI

Senior Cyber Security Analyst

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Analyst and Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience in security operations, detection engineering, vulnerability management, and Tier 3 incident response. I have strong cloud security expertise across Microsoft Azure and Microsoft Entra ID (formerly Azure Active Directory), and I have designed, built, and maintained Microsoft Sentinel Security Information and Event Management (SIEM) workspaces with custom analytics rules, Kusto Query Language (KQL) detection logic, and Security Orchestration, Automation and Response (SOAR) playbooks from the ground up. I have led vulnerability assessments and managed end-to-end risk management processes, conducted Tier 3 security incident investigations, and engineered detection content aligned to the MITRE ATT&CK framework across CrowdStrike Falcon and Microsoft Defender for Endpoint (MDE). I have four to five years of Azure cloud security experience and am well versed in Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Conditional Access, and identity-driven security controls. I am seeking a senior analyst role where I can apply this breadth of experience to strengthen security operations, drive detection engineering, and deliver risk management improvements in a collaborative hybrid environment.

CORE SKILLS AND TECHNICAL STACK

- **Microsoft Sentinel SIEM:** Workspace design and deployment, custom analytics rules, Kusto Query Language (KQL) detection logic, Logic Apps SOAR playbooks, workbooks, data connectors, threat intelligence integration
- **SOAR / Automation:** Logic Apps playbook authoring, SOAR workflow automation, PowerShell-driven response automation; Security Orchestration, Automation and Response (SOAR) platform engineering
- **Azure Cloud Security:** Microsoft Azure, Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), RBAC, Azure Policy
- **Microsoft Defender Suite:** Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender; alert triage, investigation, and response
- **CrowdStrike Falcon:** Expert-level EDR, Prevent, Insight, Discover, NG-SIEM; Tier 3 incident escalation, detection tuning, threat hunting
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; vulnerability assessment, risk management, remediation prioritisation and tracking
- **Incident Response:** NIST 800-61 lifecycle, MITRE ATT&CK framework, proactive threat hunting, senior escalation lead, playbook authoring
- **Privileged Access Management (PAM):** BeyondTrust PAM administration; least-privilege enforcement
- **Email and Endpoint Security:** Mimecast; Check Point Harmony; Microsoft Intune MDM / MAM; Tanium
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK, JISC

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer — University of the Arts London (UAL) *March 2025 – Present*

- Design, implement, and maintain the Microsoft Sentinel SIEM workspace across the UAL estate, building custom analytics rules and Kusto Query Language (KQL) detection logic mapped to the MITRE ATT&CK framework, and authoring Logic Apps SOAR playbooks to automate alert triage and incident response.
- Conduct vulnerability assessments using Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus; implement and track end-to-end risk management processes, prioritising findings by risk and coordinating remediation with technical and business stakeholders.
- Respond to Tier 3 security incidents as the senior escalation lead, leading investigations across endpoint, identity, cloud, and email vectors in line with the NIST 800-61 incident response lifecycle and MITRE

ATT&CK framework.

- Engineer and tune detection logic within Microsoft Sentinel and CrowdStrike Falcon Next-Generation SIEM (NG-SIEM), reducing false positives and improving actionable alert quality across the Security Operations Centre (SOC).
- Administer Microsoft Azure and Entra ID security controls including Conditional Access policies, Multi-Factor Authentication (MFA), Single Sign-On (SSO), role-based access controls (RBAC), and Azure Policy to enforce the security baseline.
- Manage Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across 8,000+ users, tuning detections, investigating alerts, and producing threat intelligence-enriched investigation reports.
- Administer the BeyondTrust Privileged Access Management (PAM) platform, enforcing least-privilege access and auditing privileged sessions across all critical systems.
- Conduct proactive threat hunting across endpoint, identity, email, and cloud data sources using KQL in Microsoft Sentinel and CrowdStrike Falcon Insight.
- Maintain Security Orchestration, Automation and Response (SOAR) automation and playbooks using Logic Apps and PowerShell, accelerating alert enrichment, containment, and recovery actions.
- Deliver security awareness training and phishing simulations, and contribute to Cyber Essentials+, ISO 27001, and CIS Controls compliance activities.

Cyber Security Analyst, Cyber Security and Identity — University of the Arts London (UAL)

March 2022 – March 2025

- Performed daily security monitoring, SIEM alert triage, and investigation of security events across endpoint, identity, email, and cloud platforms.
- Supported deployment and day-to-day management of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender across an 8,000-user estate.
- Administered Azure Active Directory for identity lifecycle management, MFA and Conditional Access policy review, and SSO integration maintenance.
- Conducted vulnerability scanning using Nessus, produced prioritised remediation reports, and tracked the closure of critical and high findings with infrastructure teams.
- Contributed to Tier 2 incident response, supporting senior engineers in investigations and preparing post-incident documentation and lessons-learned reports.
- Assisted with phishing simulation campaigns and security awareness content delivery, contributing to measurable improvement in staff security behaviour.
- Contributed to Cyber Essentials+ and ISO 27001 assessments, policy development, and audit evidence preparation.

IT Engineer: Security, Quality and Infrastructure — HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

- Managed security controls, infrastructure operations, and quality assurance processes within a SaaS and FinTech environment serving global enterprise clients.
- Administered access management, monitored security events, and supported vulnerability remediation and patch management activities.
- Contributed to ISO 27001 compliance activities and preparation for internal and external audits.

KEY ACHIEVEMENTS

- Built and deployed the Microsoft Sentinel SIEM workspace from the ground up at UAL, including custom analytics rules, KQL threat detection queries, and automated Logic Apps SOAR playbooks, reducing manual alert handling by over 60%.
- Delivered end-to-end vulnerability management using Pentera BAS, Tenable.io, AppCheck, and Nessus, implementing a structured risk management process and achieving sustained reduction in critical exposure each quarter.
- Served as senior escalation lead for complex Tier 3 incidents, authoring NIST 800-61-aligned playbooks that improved response consistency and reduced time to contain high-severity threats.
- Deployed and managed CrowdStrike Falcon across 8,000+ endpoints, building a hybrid SOC capability that introduced proactive threat hunting and significantly cut mean time to detect threats.

- Led the BeyondTrust PAM deployment across the enterprise, enforcing least-privilege access and eliminating uncontrolled privileged access to critical systems.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
