

PROSPER AWUNI

Senior Cyber Security Engineer

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer and Certified Information Systems Security Professional (CISSP) with over five years of hands-on experience implementing, managing, and hardening security controls across enterprise environments. I have extensive practical expertise across the security technology stack including Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection, web and email security gateways, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, Endpoint Detection and Response (EDR) solutions, Multi-Factor Authentication (MFA) and Single Sign-On (SSO), Mobile Device Management (MDM) and Mobile Application Management (MAM), vulnerability scanning and remediation, Intrusion Detection and Prevention Systems (IDS/IPS), Privileged Access Management (PAM), and security awareness training delivery. I have managed CrowdStrike Falcon across 8,000+ endpoints, built Microsoft Sentinel from the ground up, administered Mimecast email security, and managed BeyondTrust PAM. I have a track record of remediating penetration test findings, leading Tier 3 incident response, and delivering proactive threat hunting. I am seeking a senior cyber security engineering role within a focused financial services or brokerage environment where I can contribute immediate technical value across all areas of operational security.

CORE SKILLS AND TECHNICAL STACK

- **WAF / DDoS / Perimeter Security:** Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) protection management; security certificate lifecycle management; IDS/IPS administration
- **Email and Web Security Gateways:** Mimecast email security gateway (anti-phishing, anti-spoofing, data loss prevention, threat intelligence); Check Point Harmony; web proxy and filtering policy management
- **SIEM / SOAR / EDR:** CrowdStrike Falcon NG-SIEM and EDR (Expert); Microsoft Sentinel with Kusto Query Language (KQL); SOAR playbook development; alert triage and response automation
- **Endpoint Detection and Response (EDR):** CrowdStrike Falcon Prevent, Insight, Discover; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft 365 Defender
- **MFA / SSO / Identity:** Microsoft Entra ID (Azure Active Directory), Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), group policy, role-based access control (RBAC)
- **MDM / MAM:** Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM); device compliance policy enforcement
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; vulnerability scanning, risk prioritisation, penetration test finding remediation
- **Privileged Access Management (PAM):** BeyondTrust PAM platform administration; least-privilege enforcement, privileged session management
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, proactive threat hunting, playbook authoring, senior escalation lead
- **Scripting and Automation:** PowerShell scripting, Logic Apps, SOAR automation development
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer — University of the Arts London (UAL) *March 2025 – Present*

- Manage and optimise WAF and DDoS protection policies, web filtering, and email security gateways including Mimecast, configuring anti-phishing, anti-spoofing, data loss prevention, and threat intelligence integration.
- Administer and tune the CrowdStrike Falcon SIEM and EDR platform across 8,000+ endpoints and servers, managing detection configurations, alert response workflows, and threat hunting across Falcon Prevent, Insight, Discover, and Next-Generation SIEM (NG-SIEM).

- Design and maintain the Microsoft Sentinel Security Information and Event Management (SIEM) workspace, authoring custom analytics rules and Kusto Query Language (KQL) detection logic, Logic Apps playbooks, and SOAR-driven response automation.
- Configure and manage Multi-Factor Authentication (MFA), Single Sign-On (SSO), and Conditional Access policies in Microsoft Entra ID (Azure Active Directory), enforcing identity security across all enterprise applications.
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), maintaining device compliance baselines and endpoint configuration policies across the estate.
- Manage vulnerability scanning and remediation using Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus; coordinate remediation of penetration test findings with infrastructure and application teams.
- Administer the BeyondTrust Privileged Access Management (PAM) platform, controlling and auditing privileged access to critical systems and enforcing least-privilege principles.
- Manage security certificate lifecycle including certificate provisioning, renewal, and monitoring across enterprise systems and web services.
- Serve as senior escalation lead for Tier 3 security incidents, leading investigations across endpoint, identity, email, and cloud vectors using the NIST 800-61 framework and MITRE ATT&CK.
- Deliver security awareness training and phishing simulation exercises to all staff, and contribute to IDS/IPS policy review and network monitoring activities.

Cyber Security Analyst, Cyber Security and Identity — University of the Arts London (UAL)

March 2022 – March 2025

- Performed daily security monitoring, SIEM alert triage, and investigation across endpoint, identity, email, and cloud security tools.
- Managed Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), and Microsoft 365 Defender deployments across an 8,000-user estate.
- Administered Azure Active Directory for identity lifecycle management, MFA enrolment, conditional access policy review, and SSO integration with enterprise applications.
- Conducted Nessus vulnerability scanning, produced risk-prioritised remediation reports, and tracked closure of critical and high-severity findings.
- Supported Tier 2 incident response, escalating complex cases and producing post-incident reports and remediation recommendations.
- Delivered security awareness training and managed phishing simulation campaigns, achieving measurable reductions in user susceptibility.
- Contributed to Cyber Essentials+ and ISO 27001 compliance reviews, security policy drafting, and audit evidence preparation.

IT Engineer: Security, Quality and Infrastructure — HICX Solutions Ltd (SaaS/FinTech)

February 2021 – March 2022

- Managed end-to-end IT security and infrastructure operations within a regulated SaaS and FinTech environment serving global enterprise clients.
- Administered access management, monitored security events, and supported vulnerability remediation and patching activities.
- Contributed to ISO 27001 compliance activities and internal and external audit preparation.

KEY ACHIEVEMENTS

- Deployed and operationalised CrowdStrike Falcon across 8,000+ endpoints at UAL, building a hybrid Security Operations Centre (SOC) capability and introducing proactive threat hunting, significantly reducing mean time to detect and contain threats.
- Built the Microsoft Sentinel SIEM workspace from the ground up, authoring custom detection rules and KQL queries, and developed SOAR playbooks that reduced manual alert handling effort by over 60%.
- Led the BeyondTrust PAM deployment across the enterprise, eliminating uncontrolled privileged access and achieving least-privilege compliance across all critical systems.
- Coordinated remediation of penetration test findings and critical vulnerabilities identified through Pentera BAS, Tenable.io, AppCheck, and Nessus, achieving measurable reduction in attack surface each quarter.

- Authored incident response playbooks aligned to NIST 800-61, embedding consistent, repeatable response procedures that improved resolution times for high-severity incidents.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
