

PROSPER AWUNI

Cyber Security Engineer | CrowdStrike EDR | Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR) | Incident Response

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP)-certified Cyber Security Engineer with over five years of hands-on experience implementing and maintaining enterprise security controls across complex, multi-site environments. I bring deep expertise in CrowdStrike Falcon Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM), Security Orchestration, Automation and Response (SOAR), and identity and access management platforms including Microsoft Entra Identity and Azure Active Directory. In my current role at a large Higher Education institution, I have taken technical ownership of the organisation's end-to-end security stack, managing everything from EDR and SIEM/SOAR through to Privileged Access Management (PAM), email security gateways, Multi-Factor Authentication (MFA), Single Sign-On (SSO), Mobile Device Management (MDM), and vulnerability management. I am comfortable working in a small, focused security team where I can contribute across the full breadth of security engineering, incident response, and project delivery, reporting directly to senior security leadership.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR) / Extended Detection and Response (XDR):** CrowdStrike Falcon (EDR, Prevent, NG-SIEM, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI)
- **Security Information and Event Management (SIEM) / Security Orchestration, Automation and Response (SOAR):** Microsoft Sentinel (KQL), CrowdStrike NG-SIEM, SOAR playbook design and automation
- **Email and Web Security Gateways:** Mimecast, proxy and gateway management
- **Identity and Access Management (IAM) / Privileged Access Management (PAM):** Microsoft Entra Identity (formerly Azure Active Directory), Conditional Access Policies, MFA/SSO, BeyondTrust PAM, Group Policy
- **Mobile Device Management (MDM) / Mobile Application Management (MAM):** Microsoft Intune
- **Vulnerability Management:** Pentera Breach and Attack Simulation (BAS), Tenable.io, AppCheck, Nessus; penetration test remediation
- **Firewall and Network Security:** Check Point Harmony Firewall, Web Application Firewall (WAF) / Distributed Denial of Service (DDoS) protection, Intrusion Detection and Prevention Systems (IDS/IPS)
- **Incident Response:** NIST 800-61 framework, MITRE ATT&CK, Tier 2/3 alert triage and containment
- **Scripting and Automation:** PowerShell, SOAR automation; Tanium endpoint management
- **Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials+, MITRE ATT&CK

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL) - Senior Cyber Security Analyst / Engineer *March 2025 - Present*

- Take technical ownership of the organisation's full security stack, implementing and hardening controls across a 8,000-user environment spanning endpoint, identity, cloud, and network layers.
- Administer and optimise CrowdStrike Falcon across EDR, Prevent, NG-SIEM, Insight, and Discover modules, writing detection rules and tuning policies to reduce false positives and improve signal fidelity.
- Manage Microsoft Sentinel Security Information and Event Management (SIEM), authoring Kusto Query Language (KQL) detection rules, analytics, and automated Security Orchestration, Automation and Response (SOAR) playbooks to accelerate alert triage and incident containment.
- Oversee Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across the 8,000-user estate, deploying, configuring, and tuning policies in coordination with the IT operations team.

- Manage email and web security gateway (Mimecast) configuration, policy tuning, and anti-phishing controls to protect against email-borne threats.
- Administer BeyondTrust Privileged Access Management (PAM), enforcing least-privilege access controls and session recording for privileged accounts.
- Configure and maintain Microsoft Entra Identity (formerly Azure Active Directory) including Conditional Access Policies, Multi-Factor Authentication (MFA), and Single Sign-On (SSO) to enforce Zero Trust access principles.
- Manage Microsoft Intune Mobile Device Management (MDM) and Mobile Application Management (MAM) policies across the device fleet.
- Lead vulnerability management using Pentra Breach and Attack Simulation (BAS), Tenable.io, AppCheck, and Nessus; prioritise and remediate findings and track penetration test remediations to closure.
- Deliver Tier 2/3 Security Operations Centre (SOC) incident response, leading investigations from detection through containment, eradication, and recovery in line with NIST 800-61 and MITRE ATT&CK.
- Administer Check Point Harmony enterprise firewall including rule management, policy review, and security hardening.
- Develop PowerShell scripts and SOAR automation to streamline repetitive security operations tasks and reduce mean time to respond (MTTR).
- Manage digital certificate lifecycle and security awareness training delivery across the organisation.

University of the Arts, London (UAL) - Cyber Security Analyst, Cyber Security and Identity

March 2022 - March 2025

- Performed alert triage, investigation, and escalation across SIEM and EDR platforms, maintaining low mean time to detect (MTTD) and mean time to respond (MTTR) for security incidents.
- Contributed to identity and access management governance, managing user provisioning, access reviews, and role-based access control (RBAC) across Active Directory and cloud identity platforms.
- Supported the design and deployment of SOAR automation playbooks to automate common response actions such as account lockdown, IP blocking, and evidence collection.
- Conducted vulnerability assessments and tracked remediation activity using vulnerability management tooling, reporting risk exposure to senior stakeholders.
- Assisted with penetration test exercises and remediated findings across network, endpoint, and application layers.
- Delivered security awareness training and phishing simulation campaigns to reduce the human risk vector across the organisation.
- Supported Cyber Essentials+ certification activities, documenting technical controls and evidence for audit submissions.

HICX Solutions Ltd (SaaS/FinTech) - IT Engineer: Security, Quality and Infrastructure

February 2021 - March 2022

- Delivered security engineering and infrastructure support across the company's SaaS and FinTech platform environment, implementing endpoint security controls, patch management, and access governance.
- Configured and maintained network security controls, firewall rules, MFA enforcement, and SSO integrations to enforce a least-privilege access model.
- Performed regular vulnerability scans and coordinated remediation with development and operations teams.
- Supported ISO 27001-aligned information security management, contributing to risk registers, security policies, and third-party supplier assessments.
- Managed MDM/MAM policies for corporate devices and supported IT asset management, ensuring security baseline compliance across endpoints.

KEY ACHIEVEMENTS

- Led the end-to-end deployment and configuration of CrowdStrike Falcon across a complex, multi-site enterprise environment, significantly improving endpoint visibility and threat detection capability.
- Engineered and deployed Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI) across an 8,000-user estate, consolidating endpoint and identity protection under a unified Microsoft

Defender platform.

- Built and automated SOAR playbooks in Microsoft Sentinel that reduced mean time to respond (MTTR) for common alert types by automating triage, containment, and notification workflows.
- Implemented BeyondTrust Privileged Access Management (PAM) to enforce least-privilege and just-in-time access controls, reducing the attack surface associated with privileged credentials.
- Managed Pentera Breach and Attack Simulation (BAS) programme, using continuous adversary simulation to validate security controls and prioritise vulnerability remediation.
- Achieved and maintained Cyber Essentials Plus certification, evidencing strong foundational security controls across the organisation's technical estate.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
 - CompTIA Security+
 - Microsoft Certified Solutions Associate (MCSA)
 - CompTIA A+
 - Google IT Support Professional Certificate
-
