

PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | Security Information and Event Management (SIEM) | Hybrid

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Senior Cyber Security Engineer with over five years of experience implementing and maintaining robust security across enterprise infrastructure in complex, high-stakes environments. I have hands-on expertise managing CrowdStrike Endpoint Detection and Response (EDR), Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platforms, firewalls, Privileged Access Management (PAM), Multi-Factor Authentication (MFA) and Single Sign-On (SSO), Mobile Device Management (MDM) and Mobile Application Management (MAM), and vulnerability scanning and remediation programmes. I hold the Certified Information Systems Security Professional (CISSP) certification and bring a proven track record of responding to security alerts, remediating penetration test findings, conducting security awareness training, and managing security certificates and Identity and Access Management (IAM) controls across hybrid and cloud environments. I am now seeking a hybrid-based senior role where I can apply this breadth of technical security expertise within a focused, collaborative team.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Security and EDR:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover, Next-Generation Security Information and Event Management (NG-SIEM)), Tanium, Microsoft Defender for Endpoint (MDE)
- **SIEM and SOAR:** Microsoft Sentinel (Kusto Query Language (KQL)), CrowdStrike NG-SIEM, Splunk (Security Processing Language (SPL)); SOAR automation and playbook development
- **Email and Web Security Gateways:** Mimecast (email gateway, anti-phishing, data loss prevention (DLP)), web application filtering
- **Identity and Access Management:** Microsoft Entra ID / Azure Active Directory (Azure AD), Conditional Access, MFA, SSO, Group Policy; BeyondTrust Privileged Access Management (PAM)
- **Firewalls and Network Security:** Check Point Harmony Firewall, Intrusion Detection and Prevention Systems (IDS/IPS), Web Application Firewall (WAF) and Distributed Denial of Service (DDoS) mitigation concepts
- **MDM and MAM:** Microsoft Intune (MDM/MAM), device compliance policy management
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS); vulnerability scanning, remediation prioritisation, and penetration test finding remediation
- **Incident Response:** NIST 800-61 Incident Response lifecycle, MITRE ATT&CK Framework, alert triage, threat hunting, digital forensics
- **Scripting and Automation:** PowerShell, KQL
- **Frameworks and Standards:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Certifications:** Certified Information Systems Security Professional (CISSP), CompTIA Security+, Microsoft Certified Solutions Associate (MCSA), CompTIA A+

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 – Present

Senior Cyber Security Analyst / Engineer

- Lead the security operations function across a complex hybrid estate of over 8,000 users, managing CrowdStrike Falcon (EDR, Prevent, NG-SIEM) and Microsoft Sentinel (KQL) to triage, investigate and respond to security alerts and incidents.
- Administer endpoint protection policies across CrowdStrike Falcon EDR, ensuring continuous coverage and rapid response to Endpoint Detection and Response (EDR) alerts, reducing mean time to respond (MTTR) by over 40%.

- Manage Microsoft Entra ID (Azure AD) Conditional Access, MFA, SSO, and Group Policy to enforce least-privilege Identity and Access Management (IAM) controls across the organisation.
- Oversee BeyondTrust Privileged Access Management (PAM) for elevated access workflows, enforcing separation of duties and audit trails for privileged sessions.
- Operate and maintain Mimecast as the organisation's email security gateway, configuring anti-phishing, anti-spoofing and data loss prevention (DLP) policies to reduce phishing-related incidents.
- Manage Microsoft Intune MDM/MAM policies for corporate and bring-your-own-device (BYOD) fleets, including device compliance enforcement and remote wipe capabilities.
- Design and execute vulnerability scanning programmes using Tenable.io, Nessus, and AppCheck; track and remediate findings including critical penetration test vulnerabilities in line with risk appetite.
- Deliver security awareness training and phishing simulation campaigns across staff and faculty populations, improving click-through reporting rates year-on-year.
- Manage security certificates (Public Key Infrastructure (PKI)), IDS/IPS tuning, and firewall rule reviews in coordination with the network and infrastructure teams.
- Contribute to SOAR automation playbook development using Microsoft Sentinel and CrowdStrike Falcon to automate tier-1 alert triage and response.
- Lead threat hunting operations leveraging MITRE ATT&CK Framework to proactively identify indicators of compromise (IoCs) and attacker Tactics, Techniques and Procedures (TTPs).

University of the Arts, London (UAL)

March 2022 – March 2025

Cyber Security Analyst, Cyber Security and Identity

- Monitored and triaged security alerts across CrowdStrike Falcon EDR and Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), managing a user base of 8,000 staff and students.
- Administered Microsoft Entra ID / Azure AD, Conditional Access policies, MFA rollout, and SSO integrations across the organisation's application portfolio.
- Managed Mimecast email gateway configurations including transport layer security (TLS) enforcement, impersonation protection, and attachment sandboxing.
- Conducted vulnerability scanning and remediation tracking using Tenable.io and AppCheck, prioritising findings by severity and business impact.
- Supported incident response investigations following NIST 800-61 procedures, performing alert triage, log analysis, containment and post-incident reporting.
- Configured and maintained Check Point Harmony Firewall rules and reviewed firewall change requests in line with the principle of least-privilege network access.
- Managed BeyondTrust PAM platform for privileged user access workflows and session recording.
- Maintained Microsoft Intune MDM/MAM device enrolment policies and compliance baselines for Windows and iOS endpoints.
- Delivered phishing simulation campaigns and security awareness training sessions to reduce user risk across the institution.

HICX Solutions Ltd (Software-as-a-Service / FinTech)

February 2021 – March 2022

IT Engineer: Security, Quality and Infrastructure

- Implemented and maintained endpoint security controls across the organisation's Windows and cloud-hosted environments, monitoring for security incidents and remediating vulnerabilities.
- Managed identity and access management (IAM) provisioning and deprovisioning workflows, including Azure AD and multi-factor authentication (MFA) enforcement for Software-as-a-Service (SaaS) applications.
- Supported IT infrastructure including firewall administration, network monitoring, and endpoint protection platform management.
- Conducted internal security quality assurance reviews and contributed to ISO 27001-aligned security policies and procedures.
- Provided escalated IT security support and ensured compliance with organisational security standards across SaaS and on-premise systems.

KEY ACHIEVEMENTS

- Deployed and configured CrowdStrike Falcon EDR across an 8,000-user estate, achieving full endpoint visibility and significantly reducing mean time to detect (MTTD) and mean time to respond (MTTR).
- Led the enterprise-wide rollout of Microsoft Entra ID Conditional Access and MFA, eliminating legacy authentication pathways and reducing credential-based attack surface.
- Built and operationalised SOAR automation playbooks in Microsoft Sentinel and CrowdStrike that automated over 60% of tier-1 alert triage, freeing analyst capacity for complex threat investigation.
- Remediated critical and high vulnerabilities identified through Tenable.io and external penetration testing within agreed service level agreement (SLA) timeframes, demonstrably improving the organisation's risk posture.
- Reduced successful phishing incidents by delivering targeted security awareness training programmes across 8,000 staff and students over three consecutive annual cycles.
- Implemented BeyondTrust PAM workflows that provided end-to-end privileged session recording and just-in-time access, satisfying internal audit and regulatory requirements.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
