

PROSPER AWUNI

Cyber Security Threat Hunter | Threat Intelligence | Threat Engineering | MITRE ATT&CK | CISSP

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am an experienced Cyber Security professional with over five years of progressive security operations experience, specialising in threat hunting, threat intelligence, threat modelling, and Security Information and Event Management (SIEM) engineering. I have a proven track record of proactively searching for and identifying threat actors that have evaded traditional security defences by applying a deep understanding of attacker Tactics, Techniques and Procedures (TTPs), the MITRE ATT&CK Framework, and the cyber kill chain to analyse large datasets and uncover hidden threats. I hold the Certified Information Systems Security Professional (CISSP) certification and bring hands-on expertise with CrowdStrike Falcon Endpoint Detection and Response (EDR), Microsoft Sentinel (Kusto Query Language (KQL)), Splunk, PowerShell scripting, SOAR automation, and Security Operations Centre (SOC) and Computer Incident Response Team (CIRT) processes. I am a creative, analytical problem-solver who works independently and collaboratively to enhance organisational security posture, and I am seeking a hybrid permanent threat hunting role within a specialist financial services environment.

CORE SKILLS AND TECHNICAL STACK

- **Threat Hunting and Threat Engineering:** Proactive hypothesis-driven threat hunting using MITRE ATT&CK Framework, cyber kill chain analysis, attacker TTP profiling, and Indicators of Compromise (IoC) identification
- **Threat Intelligence and Threat Modelling:** Open-source intelligence (OSINT) analysis, threat actor profiling, threat modelling to inform detection logic, integration of threat intelligence feeds into SIEM and EDR
- **SIEM Platforms:** Microsoft Sentinel (KQL), CrowdStrike Falcon Next-Generation Security Information and Event Management (NG-SIEM), Splunk (Security Processing Language (SPL)); detection rule creation, use-case development, log source onboarding
- **EDR Platforms:** CrowdStrike Falcon (EDR, Prevent, Insight, Discover) at expert level; Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI), Microsoft Defender for Microsoft 365 (MDO)
- **SOAR and Automation:** Security Orchestration, Automation and Response (SOAR) playbook development; PowerShell scripting for automated alert triage and response workflows
- **Security Operations:** SOC/CIRT incident response lifecycle (NIST 800-61), alert triage, log analysis (Windows Event Logs, network telemetry, cloud logs), digital forensics
- **Network Security:** Network protocol analysis, firewall (Check Point Harmony Firewall), Intrusion Detection and Prevention Systems (IDS/IPS), understanding of packet-level analysis concepts
- **Vulnerability Management:** Tenable.io, Nessus, AppCheck, Pentera Breach and Attack Simulation (BAS), vulnerability prioritisation and remediation
- **Scripting:** PowerShell, KQL; familiarity with Python for data analysis and automation tasks
- **Frameworks:** MITRE ATT&CK, NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus

PROFESSIONAL EXPERIENCE

University of the Arts, London (UAL)

March 2025 – Present

Senior Cyber Security Analyst / Engineer

- Lead proactive threat hunting campaigns across an 8,000-user hybrid estate, leveraging the MITRE ATT&CK Framework and cyber kill chain to identify threat actors and attacker TTPs that have bypassed perimeter and endpoint controls.
- Perform hypothesis-driven threat hunting using CrowdStrike Falcon NG-SIEM, Falcon Insight and Microsoft Sentinel (KQL), building custom detection queries to uncover hidden threats within large datasets including endpoint telemetry, cloud logs and network flows.

- Develop and maintain threat intelligence-driven detection rules, SIEM correlation logic and SOAR playbooks to translate intelligence on emerging attacker techniques into automated, repeatable detections.
- Conduct threat modelling exercises to assess and prioritise risks against the organisation's attack surface, recommending targeted detection engineering improvements aligned to observed threat actor behaviour.
- Lead Security Operations Centre (SOC) incident response investigations following the NIST 800-61 Incident Response lifecycle: triage, containment, eradication, recovery, and post-incident analysis with lessons-learned reporting.
- Use CrowdStrike Falcon EDR (Prevent, Insight, Discover) to perform real-time endpoint behavioural analysis, threat-scope investigations and adversary hunt operations across the full estate.
- Develop Splunk (Security Processing Language (SPL)) queries and dashboards for operational threat visibility, supplementing primary SIEM capabilities during cross-platform investigations.
- Produce actionable threat intelligence reports for technical and non-technical stakeholders, translating complex attacker TTP analysis into clear risk narratives and prioritised recommendations.
- Mentor junior analysts in threat hunting methodologies, MITRE ATT&CK-based investigation techniques, and structured incident response procedures.

University of the Arts, London (UAL)

March 2022 – March 2025

Cyber Security Analyst, Cyber Security and Identity

- Performed continuous monitoring and triage of security alerts from CrowdStrike Falcon EDR, Microsoft Sentinel, and Microsoft Defender for Endpoint (MDE) and Microsoft Defender for Identity (MDI), analysing large volumes of log data to detect threats and anomalous behaviour.
- Conducted threat hunting activities using MITRE ATT&CK TTPs as a framework, proactively investigating indicators of compromise (IoCs) and suspicious patterns across endpoint, identity and network telemetry.
- Developed and tuned detection rules and KQL-based hunting queries in Microsoft Sentinel to improve signal fidelity and reduce false-positive alert volume.
- Investigated and responded to cyber security incidents following the NIST 800-61 Computer Security Incident Response (CSIR) process, producing detailed incident reports with root cause analysis and remediation recommendations.
- Integrated threat intelligence feeds into SIEM and EDR platforms to enrich alert context and enable proactive defence against newly identified attacker TTPs.
- Supported vulnerability management operations using Tenable.io and AppCheck, correlating vulnerability data with threat intelligence to prioritise remediation based on active exploitation risk.
- Collaborated with the network team on firewall policy reviews and Check Point Harmony Firewall rule optimisation to reduce the organisation's network attack surface.

HICX Solutions Ltd (Software-as-a-Service / FinTech)

February 2021 – March 2022

IT Engineer: Security, Quality and Infrastructure

- Monitored security events across the organisation's cloud and on-premise environments, identifying anomalies and escalating potential threats in line with incident response procedures.
- Managed endpoint security controls and identity access management (IAM) including Microsoft Azure Active Directory (Azure AD) and MFA enforcement, reducing risk of credential-based attacks.
- Conducted internal security quality reviews and contributed to ISO 27001-aligned security policies, supporting the organisation's compliance posture within a FinTech regulated environment.
- Provided escalated security engineering support and liaised with third-party providers on vulnerability remediation and security posture improvement initiatives.

KEY ACHIEVEMENTS

- Delivered a structured threat hunting programme leveraging MITRE ATT&CK and CrowdStrike Falcon NG-SIEM that identified three previously unknown persistent threats within the first six months of programme launch.
- Developed over 40 custom detection rules and KQL-based hunting queries in Microsoft Sentinel, reducing mean time to detect (MTTD) for high-priority threat actor TTPs by over 50%.
- Automated tier-1 SOAR alert triage in Microsoft Sentinel, eliminating manual handling of over 60% of low-complexity security events and freeing analyst time for deep-dive threat hunting and investigation.

- Built and maintained a threat intelligence-driven detection engineering pipeline that translated emerging threat actor TTPs into deployed SIEM detections within 24 hours of intelligence publication.
- Led the full deployment and configuration of CrowdStrike Falcon EDR across an 8,000-user estate, achieving 100% endpoint visibility and enabling organisation-wide threat hunting capability.
- Produced threat modelling assessments that directly informed the prioritisation of £200k+ of security tooling investment, aligning controls to the organisation's most critical threat vectors.

EDUCATION

- M.Sc. Environmental and Resource Engineering
- B.Sc. Chemical Engineering

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
