PROSPER AWUNI

Senior Cyber Security Engineer | CrowdStrike | SIEM/SOAR | Incident Response | Financial Services

United Kingdom (Hybrid/Remote) | +44 7403 190750 | prosper.awuni@gmail.com | linkedin.com/in/awuniprosper

PROFESSIONAL PROFILE

I am a Certified Information Systems Security Professional (CISSP) with more than five years of progressive experience in cyber security engineering and security operations, specialising in endpoint detection and response, Security Information and Event Management (SIEM) and Security Orchestration, Automation and Response (SOAR) platform management, identity security, and vulnerability management. I have built and maintained comprehensive security tooling stacks, including CrowdStrike Falcon across environments of 8,000 or more users, Microsoft Sentinel with advanced Kusto Query Language (KQL) detection engineering, and enterprise-grade firewall and email security platforms. I thrive as part of a focused, high-impact security team, bringing rigorous threat hunting, incident response, and security engineering skills to complex environments in sectors including higher education and, increasingly, professional and financial services. I am comfortable working to structured shift patterns, handling out-of-hours incidents, and driving continuous improvement in detection and response capabilities.

CORE SKILLS AND TECHNICAL STACK

- **Endpoint Detection and Response (EDR/XDR):** CrowdStrike Falcon (NG-SIEM, Prevent, EDR, Insight, Discover) - Expert; Microsoft Defender for Endpoint (MDE)
- **SIEM and SOAR:** Microsoft Sentinel (KQL), CrowdStrike NG-SIEM, SOAR playbook development and automation
- **Identity and Access Management (IAM):** Azure Active Directory (Azure AD) / Entra ID, Conditional Access, Multi-Factor Authentication (MFA), Single Sign-On (SSO), BeyondTrust Privileged Access Management (PAM)
- **Email and Web Security:** Mimecast email security platform management; policy configuration, threat investigation and incident response
- **Firewall and Perimeter Security:** Check Point Harmony firewall; network perimeter policy management and incident analysis
- **Vulnerability Management:** Tenable.io, Nessus, Pentera Breach and Attack Simulation (BAS), AppCheck; end-to-end vulnerability lifecycle and remediation tracking
- **Mobile Device and Endpoint Management:** Microsoft Intune, Mobile Device Management (MDM), Mobile Application Management (MAM)
- **Incident Response:** NIST 800-61, MITRE ATT&CK framework, full lifecycle IR from triage through containment and post-incident review
- **Security Frameworks:** NIST Cybersecurity Framework (CSF), CIS Controls, ISO 27001, Cyber Essentials Plus, MITRE ATT&CK
- **Scripting and Automation:** PowerShell scripting; SOAR automation; detection rule and alert engineering
- **Additional Tools:** Microsoft Defender for Identity (MDI), Microsoft 365 Defender, Tanium, Splunk/SPL

PROFESSIONAL EXPERIENCE

Senior Cyber Security Analyst / Engineer – University of the Arts London (UAL) *March 2025 – Present*

- Own the end-to-end administration and optimisation of CrowdStrike Falcon (Endpoint Detection and Response, Prevent, Insight, Discover and NG-SIEM modules) across an estate of 8,000 or more users, including policy creation, alert triage, threat hunting and continuous tuning to reduce false positives and detection gaps.
- Manage Microsoft Sentinel as the primary Security Information and Event Management platform, writing and maintaining advanced Kusto Query Language (KQL) detection rules, workbooks and automated SOAR playbooks to accelerate incident investigation and response.
- Lead the Security Operations Centre (SOC) alert triage function, triaging, investigating and resolving security events across endpoint, identity, email and cloud vectors in alignment with the NIST 800-61 incident response lifecycle and MITRE ATT&CK threat intelligence framework.
- Administer Mimecast email security, configuring and tuning threat protection policies, investigating phishing and Business Email Compromise (BEC) campaigns, and driving down mean time to detect (MTTD) and mean time to

respond (MTTR) for email-borne threats.

- Manage Azure Active Directory (Entra ID) identity security including Conditional Access policies, Multi-Factor Authentication (MFA) enforcement, role-based access control (RBAC) and privileged identity controls to prevent unauthorised access and lateral movement.
- Oversee the vulnerability management programme using Tenable.io, Pentera BAS and AppCheck, conducting regular vulnerability scanning, risk prioritisation and remediation tracking in coordination with infrastructure and application teams.
- Administer Microsoft Intune for Mobile Device Management (MDM) and Mobile Application Management (MAM), maintaining endpoint compliance, configuration baselines and security posture across staff and managed devices.
- Support BeyondTrust Privileged Access Management (PAM) operations, managing privileged account access, session monitoring and least-privilege enforcement.
- Maintain firewall security through Check Point Harmony, reviewing and updating policies, investigating perimeter anomalies and supporting penetration test remediation activities.
- Develop PowerShell automation scripts and SOAR playbook integrations to streamline repetitive security tasks and accelerate incident containment workflows.

Cyber Security Analyst, Cyber Security and Identity – University of the Arts London (UAL) *March 2022 – March 2025*

- Performed day-to-day alert triage, threat investigation and incident response across SIEM, EDR and email security platforms, escalating major incidents and coordinating cross-functional remediation.
- Administered identity and access management processes including provisioning, de-provisioning, Conditional Access policy management and MFA roll-out across the 8,000-user estate.
- Contributed to vulnerability scanning cycles using Tenable.io and Nessus, assisting with risk reporting and follow-up remediation validation.
- Maintained Mimecast email security configuration, managing spam filtering, sandboxing and threat intelligence feeds to reduce exposure to phishing and malware campaigns.
- Supported the development and maintenance of security policies and procedures in alignment with ISO 27001 and Cyber Essentials Plus requirements.
- Delivered security awareness training and phishing simulation campaigns using KnowBe4, improving staff reporting rates and reducing click-through rates on simulated phishing exercises.
- Assisted with Intune endpoint management, onboarding new devices, enforcing compliance policies and investigating non-compliant endpoints.
- Documented incident response playbooks, security runbooks and standard operating procedures to strengthen team readiness and reduce incident response times.

IT Engineer: Security, Quality and Infrastructure – HICX Solutions Ltd (SaaS/FinTech) *February 2021 – March 2022*

- Delivered security, quality assurance and infrastructure engineering for a Software as a Service (SaaS) and financial technology (FinTech) platform provider, implementing and maintaining security controls across cloud and on-premises environments.
- Configured and maintained endpoint protection and security monitoring tools, supporting incident detection and initial triage activities.
- Conducted vulnerability assessments and worked with development and infrastructure teams to prioritise and track remediation of identified risks.
- Managed user access, Active Directory group policies and identity controls in line with least-privilege principles and data protection requirements.
- Supported ISO 27001 compliance activities, contributing to internal audits, risk register updates and control implementation documentation.
- Wrote PowerShell scripts to automate routine infrastructure and security tasks, reducing manual workload and improving consistency of operations.

KEY ACHIEVEMENTS

- Deployed and optimised CrowdStrike Falcon across an 8,000-user estate, establishing advanced endpoint detection and response capabilities, bespoke threat hunting queries and automated SOAR-driven response workflows that materially reduced mean time to respond (MTTR) to endpoint incidents.

- Engineered Microsoft Sentinel SIEM with custom Kusto Query Language (KQL) detection rules aligned to the MITRE ATT&CK framework, delivering higher-fidelity alerting, reduced analyst fatigue and faster threat investigation for the Security Operations Centre (SOC) team.
- Managed the end-to-end implementation of Microsoft Defender for Endpoint (MDE), Microsoft Defender for Identity (MDI) and Microsoft 365 Defender across an 8,000-user deployment, significantly improving visibility into endpoint and identity-based threats.
- Led a vulnerability management programme incorporating Pentera BAS, Tenable.io and AppCheck, driving systematic identification and remediation of vulnerabilities and achieving and maintaining Cyber Essentials Plus certification.
- Developed a suite of PowerShell automation scripts and SOAR playbooks that automated alert enrichment, IOC blocking and case closure tasks, freeing analyst time for higher-value investigation and hunting activities.
- Designed and delivered phishing simulation and security awareness training programmes, measurably reducing user susceptibility to social engineering across the organisation.

EDUCATION

- **M.Sc. Environmental and Resource Engineering**
- **B.Sc. Chemical Engineering**

CERTIFICATIONS

- Certified Information Systems Security Professional (CISSP)
- CompTIA Security+
- Microsoft Certified Solutions Associate (MCSA)
- CompTIA A+
- Google IT Support Professional Certificate
